

CODE OF ORDINANCES
VILLAGE OF PARDEEVILLE, WISCONSIN

ORDAINED AND PUBLISHED
BY AUTHORITY OF THE
VILLAGE BOARD

Updated June 2016

FOREWORD

We are pleased to provide this new Code of Ordinances for the Village of Pardeeville, Wisconsin. This codification provides a complete revision and codification of all Ordinances of a general and permanent nature of the Village. All amended Ordinances are brought up to date. The Code also includes certain new Ordinances that were prepared to fill gaps not covered by existing Ordinances.

The Code also includes several features that will facilitate its use. The various chapters and articles follow one another in a natural, logical order. The table of contents, with a complete outline of this order, will often provide sufficient reference points for the reader. In addition, the reader may consult the alphabetical index at the end of the volume. At the beginning of each chapter there is a section-by-section analysis of the articles within the chapter.

Nontextual provisions such as severability clauses, repeals and enacting clauses are omitted from the text but are covered by Title 1 of the Code. In most instances, references to "this ordinance" in the text of an ordinance have been changed to "this chapter" or "this article" as deemed appropriate. Various editorial notes, state law references and amendment notes have been included throughout the Code to clarify its provisions.

We gratefully acknowledge the cooperation and assistance rendered by the Village officials in the preparation of this Code.

**CODE OF ORDINANCES OF THE
VILLAGE OF PARDEEVILLE**

PREFACE

Democracy is a government of laws. Good democracy requires not only good laws, but laws which are readily available in written form to all who are subject to them, to the public officials and police officers who must administer them and to the judges and attorneys who must interpret and apply them. It is for this reason that the Village Board of the Village of Pardeeville has adopted this Code of Ordinances. This Code represents the contribution of the Village Board to the democratic and efficient administration of the government and affairs of the Village of Pardeeville.

OPEN MEETING LAW GUIDE

General Requirements

1. Wisconsin's Open Meeting Law provides that all meetings of governmental bodies shall be open to all citizens at all times. Sec. 19.81(2), Wis. Stats.
2. Meetings of local governing bodies or their subunits must be held in places reasonably accessible to the public.
3. Meetings are open to all members of the public unless specifically provided otherwise by law.
4. When members of a governmental body gather in sufficient numbers to compose a quorum, that meeting is presumed to be convened for the purpose of conducting official business. Such a meeting is in violation of The Open Meeting Law if proper notice was not given and the meeting is not open to the public. Sec. 19.82(2), Wis. Stats.

Public Notice

1. WHO MUST RECEIVE NOTICE. For any meeting, the presiding officer, or his/her designee, shall give notice to the official newspaper and to any other members of the news media who have filed a written request to receive such notices, or if neither exists, in a manner likely to give notice to the public. Notice must also be given as required by any other state statutes.
2. CONSTRUCTION OF NOTICE. The notice for the meeting shall include:
 - (a) the time, date and place of the meeting, and
 - (b) the subject matter of the meeting, including subject matter to be considered in closed session.

The governmental body may discuss, ~~and if urgent, act upon~~ matters which were not specifically referred to in the agenda where the agenda contains a general item, such as "miscellaneous business." Where the presiding officer has specific knowledge that matters may come before the body, they should be included on the agenda.

3. TIME FOR NOTICE. Notice must be given at least twenty-four (24) hours prior to the commencement of the meeting unless for good cause such notice is impossible or impractical, in which shorter notice may be given. In no case may notice be provided less than two (2) hours in advance of the meeting. Sec. 19.84(3), Wis. Stats.
4. COMMITTEES AND SUBUNITS EXEMPTION TO NOTICE REQUIREMENT. A legally constituted subunit of a parent government body may conduct a meeting during the recess of the governing body's

meeting or immediately after the lawful meeting to act or deliberate upon a matter which was the subject of that meeting. For this exemption to apply, the presiding officer must publicly announce the time, place and subject matter of the subunit's meeting in advance at the meeting of the governing body.

Procedure For Closed Sessions.

- (1) Required notice must be given if the presiding officer or his/her designee knows that a closed session is being contemplated. Notice is required regardless of whether a majority of members will or will not support going into closed session at the meeting. Sec. 19.84(2), Wis. Stats.
- (2) After first meeting in open session, with proper notice, or motion made and recorded, supported by majority vote, is required to close, with the vote of each member recorded in the minutes. Sec. 19.85(1), Wis. Stats.
- (3) If the motion to go into closed session is carried, the presiding officer shall announce to those present at the meeting (to be recorded in the minutes) the nature of the business to be considered in the closed session and the specific exemption(s) relied upon in Sec. 19.85, Wis. Stats., under which the closed session is permitted.
- (4) Only matters contained in the presiding officer's announcement of the closed session may be considered during the closed session.
- (5) An open session, with adequate notice, must precede a closed session, even where it was decided at a prior open session to go into a closed session at a subsequent meeting.
- (6) A governmental body may vote to go into closed session at a properly convened open session, for a permitted purpose, where specific notice of intent to consider going into closed session was not included on the agenda at the time notice of the open session was given. However, such procedure requires that the presiding officer or his/her designee did not contemplate or have knowledge that any of the other members contemplated, a closed session at the time notice of the agenda was given.

Specific Exemptions Allowing Closed Sessions.

- (1) Sec. 19.85(1)(a), Wis. Stats., creates an exemption for governmental bodies deliberating after quasi-judicial trials or hearings. However, boards of review cannot rely on this exemption, for Sec. 70.47(2m), Wis. Stats., requires all board of review meetings to be held in open session.
- (2) Sec. 19.85(1)(b), Wis. Stats., is a limited exception to the Open Meeting Law allowing the use of a closed session when a governmental body is considering the demotion, dismissal,

licensing, discipline or tenure of a public employee or a person licensed by a board or commission. This exception permits preliminary discussion and investigation without the necessity of providing actual notice to the individual involved. However, before any evidentiary hearing can be conducted or formal action taken, notice must be given to the person involved so that he or she can exercise his or her right to request an open session for those purposes.

- (3) Sec. 19.85(1)(c), Wis. Stats., sanctions the use of closed sessions where governmental bodies are considering employment, promotion, compensation or performance evaluation of any public employee. Governmental bodies should exercise caution when considering performance to avoid discussing matters that are covered by Sec. 19.85(1)(b), Wis. Stats.
- (4) Sec. 19.85(1)(d), Wis. Stats., permits the use of a closed sessions when applications for parole or probation are being considered, or when crime detection or prevention strategy is to be discussed.
- (5) Sec. 19.85(1)(e), Wis. Stats., allows closed sessions for the purpose of deliberating or negotiating the purchase of public properties, the investing of public funds, or the conducting of other specified public business, as long as competitive or bargaining reasons require a closed session. Under this exception, a governmental body could meet in closed session for the purpose of forming negotiation strategies, although the body must give notice that an open session will be held for the purpose of taking a vote to convene in closed session for the purpose of discussing labor negotiation strategies.
- (6) Discussions by governmental bodies considering the financial, medical, social or personal histories or disciplinary data of specific persons which, if conducted in public, would have a "substantial adverse effect upon the reputation of any person referred to" may be held in closed session under Sec. 19.85(1)(f), Wis. Stats. However, this exemption is unavailable where Sec. 19.85(1)(b), Wis. Stats., is applicable.
- (7) Sec. 19.85(1)(g), Wis. Stats., allows a governmental body to confer with its legal counsel in closed session for the purpose of obtaining oral or written advice concerning strategy to be adopted by the body with respect to present and prospective litigation directly involving the governmental body.
- (8) Closed sessions may be utilized by governmental bodies to consider requests for confidential written advice from ethics boards under Sec. 19.85(1)(h), Wis. Stats.

Limitations on Closed Sessions.

- (1) Sec. 19.85(2), Wis. Stats., makes it impermissible for a governmental body to reconvene in open session within twelve (12) hours after a closed session, unless public notice of the

subsequent open session was given at the same time and in the same manner as was required for the original open session.

- (2) Final ratification or approval of a collective bargaining agreement is required to be in open session under Sec. 19.85(3), Wis. Stats. However, a governmental body can vote to preliminarily approve bargaining proposals in closed session, in order to reach a consensus, as long as final ratification occurs in open session.

Ballots, Votes and Records.

- (1) Unless provided elsewhere by statute, no secret ballot may be utilized by a governmental body to determine any election or decision, except the election of the officers of such body. This narrow exception does not permit use of secret ballots to elect members of committees, officers of the governmental units such as department heads, or fill vacancies on the body itself.
- (2) Any member may require the ascertainment and recording of each vote.
- (3) Records of motions and roll-call votes must be preserved and open for public inspection.

Use of Equipment in Meetings.

- (1) A governmental unit must make a reasonable effort to accommodate the media's equipment.
- (2) Any person may record, film or photograph a meeting in open session, provided that the use of this equipment does not interfere with the conduct of the meeting(s).
- (3) A member of a governmental body does not have the right to tape record a closed session of the board.

INDEX TO CODE

USE OF INDEX: This index is designed for user ease. To locate information found in the code, formulate a specific question. The key words in that question then become guides for using the index. In the event that you do not locate the desired information on your first attempt, the following checklist may help.

- (1) Cross references (when needed) are always located at the beginning of entries. Have you overlooked any?
- (2) Frequently initial questions are too general. Reformulating a more specific question may help.
- (3) Information on officials can be found in two ways. The entry for an official's name contains general duties as well as conditions of his office, such as compensation and tenure. Duties assigned to him by ordinance on specific subjects will be found under those subjects.
- (4) Definitions can be located under the "DEFINITIONS" main heading or in specific subject areas through the subheading "Definitions of terms."

Subch. 11 of Ch. 19, Wis. Stats., and this chapter. The designation of a legal custodian does not affect the powers and duties of an authority under this section.

SEC. 2-9-4

PUBLIC ACCESS TO RECORDS.

- (a) Except as provided in Section 2-9-6 any person has a right to inspect a record and to make or receive a copy of any record as provided in Sec. 19.35(1), Wis. Stats.
- (b) Records will be available for inspection and copying during all regular office hours.
- (c) If regular office hours are not maintained at the location where records are kept, the records will be available for inspection and copying upon at least 48 hours' advance notice of intent to inspect or copy.
- (d) A requester shall be permitted to use facilities comparable to those available to Village employees to inspect, copy or abstract a record.
- (e) The legal custodian may require supervision during inspection or may impose other reasonable restrictions on the manner of access to an original record if the record is irreplaceable or easily damaged. No original public records of the Village shall be removed from the possession of the legal custodian.
- (f) A requester shall be charged a fee to defray the cost of locating and copying records as follows:
 - (1) The cost of photocopying shall be as set forth in Section 1-1-8, excluding accident reports. Said cost has been calculated not to exceed the actual, necessary and direct cost of reproduction.
 - (2) If the form of a written record does not permit copying, the actual and necessary cost of photographing and photographic processing shall be charged.
 - (3) The actual full cost of providing a copy of other records not in printed form on paper, such as films, computer printouts and audio- or video-tapes, shall be charged.
 - (4) If mailing or shipping is necessary, the actual cost thereof shall also be charged.
 - (5) There shall be no charge for locating a record unless the actual cost therefore exceeds fifty (\$50.00) Dollars, in which case the actual cost shall be determined by the legal custodian and billed to the requester. The Village will determine the cost of locating a record by using the hourly rate of thirty (\$30.00) Dollars per hour for employees involved in attempting to locate the record. (amended 10-16-07)
 - (6) The legal custodian shall estimate the cost of all applicable fees and may require a cash deposit adequate to assure payment, if such estimate exceeds Five (\$5.00) Dollars.
 - (7) Elected and appointed officials of the Village shall not be required to pay for public records they may reasonably require for the proper performance of their official duties.

- (8) The legal custodian may provide copies of a record without charge or at a reduced charge where he or she determines that waiver or reduction of the fee is in the public interest.
- (g) Pursuant to Sec. 19.34, Wis. Stats., and the guidelines therein listed, each authority shall adopt, prominently display and make available for inspection and copying at its offices, for the guidance of the public, a notice containing a description of its organization and the established times and places at which, the legal custodian from whom, and the methods whereby, the public may obtain information and access to records in its custody, make requests for records, or obtain copies of records, and the costs thereof. Each authority shall also prominently display at its offices, for the guidance of the public, a copy of Section 2-9-4 through 2-9-6 of this Chapter. This subsection does not apply to members of the Village Board.

SEC. 2-9-5

ACCESS PROCEDURES.

- (a) A request to inspect or copy a record shall be made to the legal custodian. A request shall be deemed sufficient if it reasonably describes the requested record or the information requested. However, a request for a record without a reasonable limitation as to subject matter or length of time represented by the record does not constitute a sufficient request. A request may be made orally, but a request must be in writing before an action to enforce the request is commenced under Sec. 19.37, Wis. Stats. Except as provided below, no request may be refused because the person making the request is unwilling to be identified or to state the purpose of the request. No request may be refused because the request is received by mail, unless prepayment of a fee is required under Section 2-9-4(f)(6). A requester may be required to show acceptable identification whenever the requested record is kept at a private residence or whenever security reasons or federal law or regulations so require.
- (b) Each custodian, upon request for any record, shall, as soon as practicable and without delay, either fill the request or notify the requester of the authority's determination to deny the request in whole or in part and the reasons therefore. If the legal custodian, after conferring with the Village Attorney, determines that a written request is so general as to be unduly time consuming, the party making the request may first be required to itemize his or her request in a manner which would permit reasonable compliance.
- (c) A request for a record may be denied as provided in Section 2-9-6. If a request is made orally, the request may be denied orally unless a demand for a written statement of the reasons denying the request is made by the requester within five business days of the oral denial. If a written request is denied in whole or in part, the requester shall receive a written statement of the reasons for denying the request. Every written denial of a request shall inform the requester that if the request for the record was made in writing, then the determination is subject to

review upon petition for a writ of mandamus under Sec. 19.37(1), Wis. Stats., or upon application to the attorney general or a district attorney.

SEC. 2-9-6

LIMITATIONS ON RIGHT TO ACCESS.

- (a) As provided by Sec. 19.36, Wis. Stats., the following records are exempt from inspection under this Chapter.
 - (1) Records specifically exempted from disclosure by state or federal law or authorized to be exempted from disclosure by state law;
 - (2) Any record relating to investigative information obtained for law enforcement purposes if federal law or regulations require exemption from disclosure or if exemption from disclosure is a condition to receipt of aids by the state;
 - (3) Computer programs, although the material used as input for a computer program or the material produced as a product of the computer program is subject to inspection; and
 - (4) Pursuant to Sec. 905.08, Wis. Stats., a record or any portion of a record containing information qualifying as a common law trade secret. "Trade secrets" are defined as unpatented, secret, commercially valuable plans, appliances, formulas, or processes, which are used for making, preparing, compounding, treating or processing articles, materials or information which are obtained from a person and which are generally recognized as confidential.
- (b) As provided by Sec. 43.30, Wis. Stats., public library circulation records are exempt from inspection under this section.
- (c) In responding to a request for inspection or copying of a record which is not specifically exempt from disclosure, the legal custodian, after conferring with the Village Attorney, may deny the request, in whole or in part, only if he or she determines that the harm to the public interest resulting from disclosure would outweigh the public interest in full access to the request record. Examples of matters for which disclosure may be refused include, but are not limited to, the following:
 - (1) Records obtained under official pledges of confidentiality which were necessary and given in order to obtain the information contained in them.
 - (2) Pursuant to Sec. 19.85(1)(a), Wis. Stats., records of current deliberations after a quasi-judicial hearing.

 - (4) Pursuant to Sec. 19.85(1)(d), Wis. Stats., records concerning current strategy for crime detection or prevention.

- (5) Pursuant to Sec. 19.85(1)(e), Wis. Stats., records of current deliberations or negotiations on the purchase of Village property, investing of Village funds, or other Village business whenever competitive or bargaining reasons require non-disclosure.

- (7) Pursuant to Sec. 19.85(1)(g), Wis. Stats., communications between legal counsel for the Village and any officer, agent or employee of the Village, when advice is being rendered concerning strategy with respect to current litigation in which the Village or any of its officers, agents or employees is or is likely to become involved, or communications which are privileged under Sec. 905.03, Wis. Stats.
- (8) Pursuant to Sec. 19.85(1)(h), Wis. Stats., requests for confidential written advice from an ethics board, and records of advice given by such ethics board on such requests.
- (d) If a record contains information that may be made public and information that may not be made public, the custodian of the record shall provide the information that may be made public and delete the information that may not be made public from the record before release. The custodian shall confer with the Village Attorney prior to releasing any such record and shall follow the guidance of the Village Attorney when separating out the exempt material. If in the judgment of the custodian and the Village Attorney there is no feasible way to separate the exempt material from the nonexempt material without unreasonably jeopardizing non-disclosure of the exempt material, the entire record shall be withheld from disclosure.

 - a. The item or its function has been totally replaced by other Village property and no probable future function exists for it; or
 - b. The Village no longer performs the service for which the item was purchased and no other service can reasonably be provided by the item; or
 - c. The item is no longer able to reliably or economically perform the work required of it.
- (2) Surplus property as defined in this Chapter shall not include land or buildings but shall include fixtures and such salvage as may be taken from a building without structural damage when such fixtures and salvage are not part of a demolition contract. Surplus Village property shall not include property which is obtained by the Village as a result of abandonment or loss by the property's original owner. Surplus Village property shall not include items of property which are traded in for newer items. Surplus Village property shall not include library materials used by the public library for lending purposes.

The department head responsible for the item shall determine the time in which the successful bidder must remove the item. In the event the item is not removed within that time, the item shall revert to the Village and the amount of the bid shall be forfeited to the Village. In the event no bids are received, the item shall be disposed of as directed by the Village Board.
- (4) No public auction or awarding of bids shall occur under this Chapter unless a description of the item to be sold and an advance notice of the time and place for such auction or bid submission is first published as a Class 2 notice in the official Village newspaper.

SEC. 4-2-2 CONSTRUCTION AND REPAIR OF SIDEWALKS AND CURBS AND

- (a) OWNER TO CONSTRUCT. It shall be the duty of the abutting owner to build, repair, construct and perpetually maintain sidewalks along or upon any street, alley or highway in the Village of Pardeeville and to pay the entire cost of construction thereof. Whenever the Village Board shall by resolution determine that a sidewalk be laid or a section rebuilt along or upon any public street, alley or highway within the Village, it shall proceed according to Section 66.6 15 of the Wisconsin Statutes. Sidewalks shall be located in such places as designated by the Village Board. No person shall remove any sidewalk without the permission of the Village Board.
- (b) PERMIT REQUIRED. No person shall hereafter lay, remove, replace or repair any public sidewalk within the Village unless he is under contract with the Village to do such work or has obtained a permit therefore from the Director of Public Works at least seven (7) days before work is proposed to be undertaken. No fee shall be charged for such permits.

(c) SPECIFICATIONS. All sidewalks within the Village hereafter shall be repaired, rebuilt and constructed in accordance with the following specifications:

(1) Subgrade. The subgrade shall be prepared by excavating to the line, grade and cross section as established by the Director of Public Works and approved by the Village Board. Soft and unsuitable material shall be removed and replaced with sand or other satisfactory material, and the subgrade shall be thoroughly and uniformly compacted and moistened immediately before the concrete is placed. When so specified by the Director of Public Works a sub-base of sand, sand and gravel or other approved porous material shall be placed under the sidewalk. On embankments the subgrade shall extend at least one (1) foot beyond each edge of the sidewalk.

(2) Material. All sidewalks shall be of air entrained concrete composed of six (6) bags per cubic yard of one course construction, and built to the established line and grade. Gravel shall be of good quality. Concrete shall be mixed thoroughly for a minimum of one minute after all materials have been placed in the mixer.

(3) a. Forms. Concrete shall be placed in straight forms of wood or metal of sufficient strength to resist springing, tipping or other displacement during the process of depositing and consolidating the concrete. Wood forms shall be surfaced plank of at least two (2) inches thickness except for sharply curved sections. Metal forms shall be of approved section. The forms shall be of full depth of the required walk and shall be of such design as to permit secure fastening. Forms shall be thoroughly cleaned and oiled before the concrete is placed against them. Concrete shall be placed in the forms on a moist subgrade, deposited just above the finished grade and consolidated and spaded sufficiently to bring the mortar to the surface and to prevent honeycombing. It shall then be struck off level with the top of the forms and finished with wooden flats.

b. To provide adequate drainage, the sidewalk shall slope toward the curb at a minimum rate of one-fourth (1/4) inch per foot of width of sidewalk. All joints and edges shall be finished with a one-fourth (1/4) inch radius edging tool. Sidewalks shall be constructed within the limits of the street, and unless otherwise specifically indicated, there shall be one foot strip of street property left between the property line and the edge of the sidewalk.

(4) Width and Thickness. Residential walks shall be four (4) feet in width and not less than four inches thick except within driveway approaches where the minimum thickness shall be six inches; provided that walks in residential areas may be repaired or replaced to a width not less than the existing width on the effective date of this Section. Sidewalks in front of commercial or industrial

establishments shall be not less than eight (8) feet in width and five inches in thickness except within driveway approaches where the minimum thickness shall be seven (7) inches.

- (5) Finishing. Before the last finish has set, the sidewalk shall be steel troweled and brushed in transverse direction. Before the final finishing, the surface shall be checked with a ten (10) foot straight edge and any areas departing more than one-eighth (1/8) inch from the testing edge shall be corrected by adding or removing concrete while the concrete in the walk is still plastic.
 - (6) Jointing. Transverse, full depth, one-half (1/2) inch thick expansion joints of premolded expansion material shall be located every forty feet and at the property line, and where the walk intersects another walk, curb line, building or driveway approach, and at buildings, walls, poles and stop boxes. The expansion joint material shall be placed in a neat and workmanlike manner with its upper edge slightly below the finished sidewalk surface. Dummy groove joints for controlled cracking, at least three-eighths (3/8) inch in thickness and five-sixteenths (5/16) inch in depth, shall be placed at intervals of approximately four (4) feet. All joints shall be at right angles to the direction and grade of the walk. Diagonal joints may be used only when approved by the Director of Public Works.
 - (7) Curing and Drying. As soon as any of the concrete work hereinbefore mentioned has been finished and hardened sufficiently to prevent excessive marring of the surface, it shall be cured and protected against rapid drying. Failure to comply with this requirement shall be deemed sufficient cause for suspension of the work. Curing shall be accomplished by the "Impervious Coating," "Wet Fabric" or "Paper" methods. For impervious coating or membrane curing, only those materials meeting requirements of ASTM Specs. C156-44T, "Method of Test for Efficiency of Materials for Curing Concrete" shall be used. Said specifications are hereby adopted by reference as if fully set forth herein. Walks shall be kept free from all traffic at normal temperatures for forty-eight (48) hours and in cold weather (below 50 degrees F.) for ninety-six (96) hours. No concrete shall be poured when the temperature may be expected to fall below 35 degrees F. in any seventy-two (72) hour period or upon frozen subgrade.
- (d) SIDEWALK REPAIR OR REPLACEMENT. Pursuant to Sec. 66.6 15, Wis. Stats., the Village Board may order property owners to repair or remove and replace any sidewalk which is unsafe, defective or insufficient. If the property owner shall fail to so repair or remove and replace such sidewalk for a period of twenty (20) days after service of the notice provided in Sec. 66.6 15(3)(c), Wis. Stats., the Village Board shall repair or construct such sidewalk and the Village Clerk-Treasurer shall enter the total cost thereof upon the tax roll as a special tax against said lot or parcel of land.
- (e) UNSAFE SIDEWALKS. The Village Board may at any time, by

(f) CONSTRUCTION AND REPAIR OF CONCRETE CURB AND GUTTER. The provisions of Section 66.60, Wis. Stats., shall be followed in the case of the construction and repair of concrete curb and gutter provided that the property deemed benefited by said construction and repair shall pay one hundred (100%) percent of the costs thereof.

ARTICLE A

General Provisions

SEC. 5-2-1 PURPOSE.

The purpose of this Chapter is to regulate the sewer use charges to all users of the Village of Pardeeville wastewater facilities, ensuring that all users pay a proportionate share of the costs of sewer service. Further, it is the purpose of this Chapter to ensure that sufficient revenues are collected to pay all Village costs associated with owning, operating and maintaining the wastewater facilities.

SEC. 5-2-2 AUTHORITY.

This Chapter is adopted under the authority granted by Sections 62.18, 62.185 and 66.076 of the Wisconsin Statutes.

SEC. 5-2-3 GRANT ACCEPTANCE COMPLIANCE.

This Chapter is designed to comply with the requirements of Section 144.24(8)(a)3 of the Wisconsin Statutes and NR 128.11(9) and NR 128.13 of the Wisconsin Administrative Code, which statute and codes pertain to the user charge system in conjunction with the acceptance of a construction grant.

SEC. 5-2-4 VALIDITY.

- (a) CONFLICT. All ordinances or parts of ordinances in conflict with this Chapter are hereby repealed.
- (b) SEPARABILITY OF PROVISIONS. If any section, subsection, sentence, clause or phrase of this Chapter is for any reason held to be invalid or unconstitutional by reasons of any decision of any competent jurisdiction, such decisions shall not affect the validity of any other section, subsection, sentence, clause, phrase or portion thereof.

SEC. 5-2-5 DEFINITIONS.

- (a) Unless the context specifically indicates otherwise, the meaning of terms used in this Chapter shall be as follows:
 - (1) Biochemical oxygen demand (BOD) shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days at twenty (20) degrees C., expressed in milligrams per liter or pounds.
 - (2) Compatible pollutant means biochemical oxygen demand,

- suspended solids, pH, or fecal coliform bacteria, plus additional pollutants identified in the WPDES permit for the Village's wastewater treatment works if such works were designed to treat such additional pollutants, and in fact, does remove such pollutants to a substantial degree.
- (3) Composite sample denotes a sampling consisting of portions of a waste taken in proportion to the volume of the flow of said waste.
 - (4) DNR means Wisconsin Department of Natural Resources.
 - (5) Domestic wastes shall mean wastewater discharged from sanitary conveniences which contains none of the prohibited discharges set forth in Article B of this Sewer Use Chapter.
 - (6) Incompatible pollutant means any pollutant which is not a compatible pollutant.
 - (7) Industrial user means any non-governmental, nonresidential user of the public sewer system which discharges more than the equivalent of twenty-five thousand (25,000) gallons per day (gpd) of sanitary wastes and which is identified in the Standard Industrial Classification Manual, 1972, United States Office of Management and Budget, as amended and supplemented as of October 1, 1978 under one of the following divisions?

Division A Agriculture, Forestry and Fishing
Division B Mining
Division D Manufacturing
Division E Transportation, Communications, Electric,
Gas and Sanitary Services
Division I Services

In determining the amount of a user's discharge, domestic wastes or discharges from sanitary conveniences may be excluded.

After applying the sanitary waste exclusion, dischargers in the above divisions that have a volume exceeding twenty-five thousand (25,000) gpd or the weight of biochemical oxygen demand (BOD) or suspended solids (SS) equivalent to that weight found in twenty-five thousand (25,000) gpd of sanitary waste, are considered industrial users. Sanitary wastes, for purposes of this calculation of equivalency, are the wastes discharged from residential users. The strength of the residential waste discharges is defined as 250 mg/l biological oxygen demand (BOD) and 250 mg/l suspended solids (SS). Therefore, dischargers with BOD discharge exceeding 52.15 lbs/day or SS exceeding 52.15 lbs/day are considered as industrial users even though this volume does not exceed twenty-five thousand (25,000) gpd.

Any non-governmental user of the public sewer system which discharges wastewater which contains toxic pollutants or poisonous solids, liquids, or gases in sufficient quantity either singly or by interaction with other wastes to

contaminate the sludge of any municipal system, or injure or interfere with any sewage treatment process, constitutes a hazard to humans or animal, creates a public nuisance, or creates any hazard in or has an adverse effect on the waters receiving any discharge from the treatment works; is also considered an "industrial user."

- (8) Major contributing industry means an industrial or commercial facility that is a discharger to the public wastewater facilities and
 - a. has a waste discharge flow of fifty thousand (50,000) gallons or more per average work day;
 - b. has a waste discharge flow greater than five (5%) percent of the flow carried by the public system receiving the waste;
 - c. has in its waste a toxic pollutant in toxic amounts as defined in Wisconsin Administrative Code, Chapter NR 215, or in Article D of this Sewer Use Chapter; or
 - d. has a waste which the Village or the DNR determines has or, in the case of a new source, will have a significant impact either singly or in combination with other wastes on the Village wastewater treatment works or on the quality of effluent from such works.
- (9) Pretreatment means the treatment of waste waters to remove or reduce the quantity of one or more pollutants prior to discharge to the Village wastewater treatment works.
- (10) Public sewer shall mean a common sewer controlled by the municipality.
- (11) Replacement means the expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary during the useful life of the treatment works to maintain the capacity and performance for which such works were designed and constructed.
- (12) Sanitary sewer shall mean a sewer that carries liquid and water-carried wastes from residences, commercial buildings, industrial plants and institutions together with minor quantities of ground, storm, and surface waters that are not admitted intentionally.
- (13) Sewage is the spent water of a community. The preferred term is "waste- water," Subsection (a) (18) below.
- (14) Sewer shall mean a pipe or conduit that carries wastewater or drainage water.
- (15) Suspended solids shall mean total suspended matter that either floats on the surface of, or is in suspension in, water, wastewater, or other liquids and that is removable by laboratory filtering as prescribed in "Standard Methods for the Examination of Water and Wastewater" and referred to as nonfilterable residue.
- (16) User charges means the amount charged to a user for newer services and includes debt retirement on treatment plant construction costs, operation and maintenance costs and replacement costs.
- (17) User class means a particular group of users with similar discharges.
- (18) Wastewater shall mean the spent water of the community.

From the standpoint of source, it may be a combination of the liquid and water-carried wastes from residences, commercial buildings, industrial plants, and institutions together with any groundwater, surface water, and storm water that may be present.

- (19) Wastewater facilities shall mean the structures, equipment, and processes required to collect, carry away, and treat domestic and industrial wastes and dispose of the effluent.
- (20) Wastewater treatment works shall mean an arrangement of devices and structures for treating wastewater, industrial wastes, and sludge. Sometimes used as synonymous with "waste treatment plant" or "wastewater treatment plant" or "water pollution control plant" or "publicly owned treatment works."

RESERVED.

ARTICLE B

User Charge System

SEC. 5-2-10 ESTABLISHMENT OF REVENUE SYSTEM.

A user charge shall be assessed to all users by the Village in accordance with the provisions of this Chapter.

SEC. 5-2-11 USER CHARGE RATES.

- (a) User charge rates shall be established so that revenues collected cover debt retirement on the wastewater treatment facilities, the cost of operation and maintenance of the wastewater collection and treatment facilities and replacement costs, except that any portion of the debt retirement may be collected by ad valorem taxes.
- (b) The user charge rates established shall be such that all users pay a proportionate share of the cost of service based on actual use. To ensure proportional distribution of costs, user charge rates shall include a volume parameter, a BOD parameter, a suspended solids parameter, and a customer parameter.

SEC. 5-2-12 SEWER SERVICE CHARGE. Amended 03-18-03

- (a) SERVICE CHARGE. In addition to the user charge rates, each user shall be charged a service charge which shall include a customer cost and an infiltration cost.
- (b) SEWER CONNECTION FEE. (1) The fee for connection to the Village of Pardeeville's wastewater collection system shall be set forth in Section 1-1-8:

SEC. 5-2-13 ADDITIONAL CHARGES.

Additional charges shall be billed to the user to which they apply:

- (a) Actual costs incurred for monitoring and sampling performed by the Village or agents of the Village for the purpose of verifying wastewater concentrations or establishing quantities for billing purposes;
- (b) Actual costs incurred for user-requested monitoring and sampling;
- (c) Actual costs incurred for monitoring and sampling performed by the Village or agents of the Village for the purpose of determining compliance with the Sewer Use Ordinance;
- (d) Actual costs incurred for monitoring and sampling or other services performed by the Village or agents of the Village relative to any pretreatment facilities;

- (e) Any increased costs of managing the effluent or the sludge at the wastewater treatment facilities due to a user's discharge or toxic or other incompatible pollutants;
- (f) Actual costs incurred for handling a user's check returned for insufficient funds;
- (g) Actual costs incurred for special handling not provided for elsewhere in this Chapter

SEC. 5-2-14 BUDGET AND RATE SETTING.

The Water and Sewer Commission shall annually prepare an estimate of anticipated costs and set the user charge rates and service charges. These estimates and rates shall be submitted to the Village Board for approval.

SEC. 5-2-15 PARAMETERS.

The user charge rates shall be established using a volume parameter, a BOD parameter, a suspended solids parameter and a customer parameter. All costs shall be allocated to these parameters in a logical and reasonable manner. A definition of each parameter is as follows:

- (a) VOLUME - the volume parameter is that portion of the costs related to flow.
- (b) HOD - the BOD parameter is that portion of the costs that are related to the removal of BOD. The HOD parameter will be equated to a volume charge for all users discharging domestic strength waste which is defined as 250 mg/i BOD.
- (c) SUSPENDED SOLIDS -- the suspended solids parameter is that portion of the costs that is related to the removal of suspended solids. The suspended solids parameter will be equated to a volume charge for all users discharging domestic strength waste which is defined as 250 mg/I suspended solids.
- (d) CUSTOMER -- the customer parameter is that portion of the costs that are not dependent on the other parameters, but occur because there are users. These costs will be divided equally among all users.

SEC. 5-2-16 VOLUME DETERMINATION.

- (a) Water meter readings shall be used to determine the volume for computation of the user charges. A second meter shall be installed to measure such water. The user must, at his own expense, make necessary changes in the water piping and install couplings so that a meter can be set. The charge for such meters shall be in accordance with the Public Service Commission of Wisconsin rate charges.
- (b) Where it is not possible to obtain a water meter reading or in cases where no water meter exists, the water use will be estimated based on previous meter readings or other appropriate

means. Any estimated volume shall be indicated as such on the bill. The difference shall be adjusted when a meter reading is available.

SEC. 5-2-17 BOD AND SUSPENDED SOLIDS DETERMINATION.

All residential users and other users discharging domestic-strength waste (250 mg/i HOD, 250 mg/lSS) shall be assumed to discharge domestic-strength waste. The BOD and suspended solids concentration for all other users will be determined by monitoring and sampling or by published estimates for the user type if agreed upon by the user and the Village.

SEC. 5-2-18 INFILTRATION/INFLOW.

The costs for treating infiltration/inflow shall be distributed equally among all users.

SEC. 5-2-19 REPLACEMENT FUND.

A replacement fund shall be established for the purpose of replacement as defined in Section 5-2-5 of this Chapter. This fund shall be a separate and distinct fund and used exclusively for replacement.

SEC. 5-2-20 USER CLASSES.

- (a) USER CLASSES. The Village shall establish user classes and each user shall be placed in the appropriate class. A user class shall be made up of users that have similar discharges and/or are similar in character. User classes shall be, but are not limited to, the following:
 - (1) Residential - all single or multi-family dwelling units whose main purpose is to provide housing for individual family units and whose wastewater flow is less than twenty-five thousand (25,000) gallons per day.
 - (2) Commercial - all private establishments such as restaurants, hotels, retail and wholesale stores, filling stations and industries with a daily wastewater flow of less than twenty-five thousand (25,000) gallons per day; and all private, nonprofit entities such as churches, schools, hospitals and charitable organizations with a daily wastewater flow less than twenty-five thousand (25,000) gallons per day.
 - (3) Industrial - all users that are defined as an industrial user according to Section 5-2-5 of this Chapter.
 - (4) Public - any user that is a governmental unit including such users as public schools and municipal facilities.
- (b) REVENUES. Each user class shall pay a proportionate share of the sewer service costs. Any excess revenues from a user class shall be applied to the costs of operation and maintenance

attributable to that class the next year, and the user charge rate shall be adjusted accordingly.

SEC. 5-2-21 RECORD-KEEPING SYSTEM.

The Village shall maintain an adequate record-keeping system to implement the user charges pursuant to this Chapter and to show compliance with 40 CFR Subpart E.

ARTICLE A

SEC. 5-3-1 PURPOSE OF CHAPTER.

- (a) The Chapter sets forth uniform requirements for discharges into the Village of Pardeeville wastewater facilities and enables the Village to protect the public health in conformity with all applicable local, state and federal laws relating thereto.
- (b) The purpose of this Chapter is:
 - (1) To ensure proper design and construction of all connections to the Village wastewater facilities;
 - (2) To prevent the introduction of pollutants into the Village wastewater facilities which will interfere with the normal operation of the facilities or contaminate the resulting treatment works' sludge; and
 - (3) To prevent the introduction of pollutants into the wastewater facilities which do not receive adequate treatment in the Village treatment works, and which will pass through the system into receiving waters or the atmosphere or otherwise be incompatible with the facilities.

SEC. 5-3-2 AUTHORITY.

This Chapter is adopted under the authority granted by Sections 62.18, 62.185 and 66.076 of the Wisconsin Statutes.

SEC. 5-3-3 DEFINITIONS.

- (a) Unless the context specifically indicates otherwise, the meaning of terms used in this shall be as follows:
 - (1) Biochemical Oxygen Demand (BOD) shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days at twenty (20) degrees C., expressed in milligrams per liter or pounds.
 - (2) Building Drain shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer beginning five (5) feet outside the inner face of the building wall
 - (3) Building Sewer shall mean the extension from the building drain to the public sewer or other place of disposal, also called house connection.
 - (4) Combined Sewer shall mean a sewer intended to receive both wastewater and storm or surface water.
 - (5) Compatible Pollutant means biochemical oxygen demand,

suspended solids, pH, or fecal coliform bacteria, plus additional pollutants identified in the WPDES permit for the Village's wastewater treatment works if such works were designed to treat such additional pollutants, and in fact, does remove such pollutants to a substantial degree.

- (6) Composite Sample denotes a sampling consisting of portions of a waste taken in proportion to the volume of the flow of said waste.
- (7) DNR means Wisconsin Department of Natural Resources.
- (8) Domestic Wastes shall mean wastewater discharged from sanitary conveniences which contains none of the prohibited discharges set forth in Article E of this Chapter.
- (9) Easement shall mean an acquired legal right for a specific use of land owned by others.
- (10) EPA means United States Environmental Protection Agency.
- (11) Floatable Oil is oil, fat, or grease in a physical state such that it will separate by gravity from wastewater by treatment in an approved pretreatment facility. A wastewater shall be considered free of floatable fat if it is properly pretreated and the wastewater does not interfere with the collection system.
- (12) Garbage shall mean the animal and vegetable waste resulting from the handling, preparation, cooking, and serving of foods.
- (13) Holding Tank Waste is any waste from holding tanks such as chemical toilets, campers, trailers, septic tanks, and vacuum pump tank trucks.
- (14) Incompatible Pollutant means any pollutant which is not a compatible pollutant.
- (15) Industrial User means any nongovernmental, nonresidential user of the public sewer system which discharges more than the equivalent of twenty-five thousand (25,000) gallons per day (gpd) of sanitary wastes and which is identified in the Standard Industrial Classification Manual, 1972, United States Office of Management and Budget, as amended and supplemented as of October 1, 1978 under one of the following divisions:

Division A	Agriculture, Forestry and Fishing
Division B	Mining
Division D	Manufacturing
Division E	Transportation, Communications, Electric Gas and Sanitary Services
Division I	Services

In determining the amount of a user's discharge, domestic wastes or discharges from sanitary conveniences may be excluded.

After applying the sanitary waste exclusion, dischargers in the above divisions that have a volume exceeding twenty-five thousand (25,000) gpd or the weight of biochemical oxygen demand (BOD) or suspended solids (SS) equivalent to that weight found in twenty-five thousand (25,000) gpd of

sanitary waste, are considered industrial users. Sanitary wastes, for purposes of this calculation of equivalency, are the wastes discharged from residential users. The strength of the residential waste discharges is defined as 250 mg/l biological oxygen demand (BOD) and 250 mg/l suspended solids (55). Therefore, dischargers with BOD discharge exceeding 52.15 lbs/day or SS exceeding 52.15 lbs/day are considered as industrial users even though this volume does not exceed twenty-five thousand (25,000) gpd.

Any nongovernmental user of the public sewer system which discharges wastewater which contains toxic pollutants or poisonous solids, liquids, or gases in sufficient quantity either singly or by interaction with other wastes to contaminate the sludge of any municipal system, or injure or interfere with any sewage treatment process, constitutes a hazard to humans or animal, creates a public nuisance, or creates any hazard in or has an adverse effect on the waters receiving any discharge from the treatment works; is also considered an "industrial user."

- (16) Major Contributing Industry means an industrial or commercial facility that is a discharger to the public wastewater facilities and
 - a. has a waste discharge flow of fifty thousand (50,000) gallons or more per average work day;
 - b. has a waste discharge flow greater than five (5%) percent of the flow carried by the public system receiving the waste;
 - c. has in its waste a toxic pollutant in toxic amounts as defined in Wisconsin Administrative Code, Chapter NR 215, or in Article D of this Sewer Use Chapter; or
 - d. has a waste which the Village or the DNR determines has or, in the case of a new source, will have a significant impact either singly or in combination with other wastes on the Village wastewater treatment works or on the quality of effluent from such works.
- (17) May is permissive (see Shall).
- (18) Natural Outlet shall mean any outlet including storm sewers and combined sewer overflows into a watercourse, pond, ditch, lake, or other body of surface or groundwater.
- (19) Person shall mean any individual, firm, company, association, society, corporation, or group.
- (20) Shall mean the logarithm of the reciprocal of the hydrogenion concentration. The concentration is the weight of hydrogen ions in grams per liter of solution. Neutral water, for example, has a pH value of 7 and a hydrogen-ion concentration of 10^{-7}
- (21) Pretreatment means the treatment of wastewaters to remove or reduce the quantity of one or more pollutants prior to discharge to the Village wastewater treatment works.
- (22) Properly Shredded Garbage shall mean the wastes from the preparation, cooking and dispensing of food that has been

- shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one (1) inch (1.27 centimeters) in any dimension.
- (23) Public Sewer shall mean a common sewer controlled by the municipality.
 - (24) Sanitary Sewer shall mean a sewer that carries liquid and water-carried wastes from residences, commercial buildings, industrial plants and institutions together with minor quantities of ground, storm, and surface waters that are not admitted intentionally.
 - (25) Sewage is the spent water of a community. The preferred term is "waste- water."
 - (26) Sewer shall mean a pipe or conduit that carries wastewater or drainage water.
 - (27) Shall is mandatory (see May).
 - (28) Slug shall mean any discharge of water or wastewater which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five (5) times the average twenty- four (24) hour concentration or flows during normal operation and shall adversely affect the collection system and/or performance of the wastewater treatment works.
 - (29) Standard Methods shall mean the examination and analytical procedures set forth in the latest edition of Standard Methods for the Examination of Water and Wastewater as prepared, approved and published jointly by the American Public Health Association, American Water Works Association, and the Water Pollution Control Federation, and is in compliance with Federal Regulations 40 CFR 136, "Guidelines Establishing Test Procedures for Analysis of Pollutants."
 - (30) Storm Drain (sometimes termed Storm Sewer shall mean a drain or sewer for conveying water, groundwater, subsurface water, or unpolluted water from any source.
 - (31) Suspended Solids shall mean total suspended matter that either floats on the surface of, or is in suspension in, water, wastewater, or other liquids and that is removable by laboratory filtering as prescribed in "Standard Methods for the Examination of Water and Wastewater" and referred to as nonfilterable residue.
 - (32) Unpolluted Water is water of quality equal to or better than the effluent criteria in effect or water that would not cause violation of receiving water quality standards and would not be benefited by discharge to the sanitary sewers and wastewater treatment facilities provided.
 - (33) Wastewater shall mean the spent water of the community. From the standpoint of source, it may be a combination of the liquid and water-carried wastes from residences, commercial buildings, industrial plants, and institutions together with any groundwater, surface water, and storm water that may be present.

- (34) Wastewater Facilities shall mean the structures, equipment, and processes required to collect, carry away, and treat domestic and industrial wastes and dispose of the effluent.
- (35) Wastewater Treatment Works shall mean an arrangement of devices and structures for treating wastewater, industrial wastes, and sludge. Sometimes used as synonymous with "waste treatment plant" or "wastewater treatment plant" or "water pollution control plant" or "publicly owned treatment works."
- (36) Watercourse shall mean a natural or artificial channel for the passage of water either continuously or intermittently.
- (37) WPDES Permit means the permit to discharge pollutants obtained under the Wisconsin Pollutant Discharge Elimination System pursuant to Chapter 147 of the State of Wisconsin Statutes.

- (f) VILLAGE'S OPTION TO ABATE NUISANCE. In any case where the owner, occupant or person in charge of the property shall fail to cut their lawn, grass or weeds as set forth above, then and in that event, the Village may elect to cut said lawn, grass or weeds as follows:

Amended 5-20-14 and 11-18-14

- (a) PROCEDURE. Whenever the holder of any license under this Chapter violates any portion of this Chapter or Title 9, Chapter 5 of this Code of Ordinances, proceedings for the revocation of such license may be instituted in the manner and under the procedure established by this Section.

- (b) ABANDONMENT OF PREMISES. Any licensee holding a license to sell alcohol beverages who abandons such business shall forfeit any right or preference he may have to the holding of or renewal of such license. Abandonment shall be sufficient grounds for revocation of an alcohol beverage license. The closing of the licensed premises for at least six (6) months shall be prima facie evidence of an abandonment, unless extended by the Village Board.
- (c) LICENSE REVOCATION OR SUSPENSION.
- (1) Notice and Hearing. Whenever a person holding a license to sell alcoholic beverages has failed to maintain the premises according to standards prescribed for sanitation, or in whose premises persons are permitted to loiter for purposes of prostitution, or that the licensee has not observed and obeyed any lawful order of the Village Board or police officers of the Village has violated Village ordinances, or for any other good reason, the Village Board shall issue a summons, to be signed by the Clerk-Treasurer, commanding the licensee complained of to appear before the Public Protection Committee or a special committee designated by the Village Board on a day and time and at a place named in the summons to show cause why the license should not be revoked or suspended. Such summons shall be served not less than three (3) and not more than ten (10) days before the time at which the licensee is commanded to appear, and may be served personally upon the licensee or the agent of the licensee or upon the person in charge of the licensed premises. The complaint shall be served with the summons and shall set forth the offense allegedly committed, the date, and place of said offense, and the facts constituting the alleged offense. If such licensee shall not appear as required by the summons, the complaint shall be taken as true, and if the Committee deems its allegations sufficient, the Committee shall recommend revocation or suspension of the license as provided herein.
- (2) Procedure on Hearing; Effect of Revocation.
- a. The Public Protection Committee or a designated committee shall serve as a hearing agency for the Village Board.
- b. The Chairman of the Committee, or the Chair's designee, shall conduct the hearing, administer oaths to all witnesses and may issue subpoenas. So far as practical, the rules of evidence provided in Sec. 227.08, Wis. Stats., shall be followed. The complainant shall have the burden of proving the charges to a preponderance of the evidence. The licensee and the complainant may be represented by counsel, may call and examine witnesses and cross-examine witnesses of the other party. All proceedings and testimony shall be recorded and transcribed. If either party requests a stenographic recording and transcription, the Village shall make the necessary arrangements, but the expenses shall be borne by the requesting party. The Clerk/Recorder shall serve as secretary to the Committee and shall mark and receive all exhibits admitted into the record.
- c. Within ten (10) days of the completion of the hearing and filing of briefs, if any, the Committee, upon the testimony and evidence presented at the hearing, shall

determine by simple majority vote of those present whether the charges are true and if so, submit a report to the Village Board including its findings of fact, conclusions of law and a recommendation as to what action, if any, the Village Board should take with respect to the license. The committee shall provide the complainant and the licensee with a copy of the report. Either the complainant or the licensee may file an objection to the report and shall have the opportunity to present arguments supporting the objection to the Village Board. The Village Board shall determine whether the arguments shall be presented orally or in writing or both. If the Village Board, after considering the committee's report and any arguments presented by the complainant or the licensee, finds the complaint to be true, or if there is no objection to a report recommending suspension or revocation, the license shall be suspended or revoked. If the recommendation is to suspend the license, it shall be for a period of not less than ten (10) days or more than ninety (90) days; in like manner, the recommendation may be to revoke the license. If the Committee determines that the charges are not substantiated, it shall recommend to the Village Board that the complaint be dismissed without cost to either party. The Committee's recommendation shall be promptly filed with the Clerk-Treasurer. The Clerk-Treasurer shall prepare five (5) copies of the transcript of the proceedings, all exhibits and the recommendation of the Committee.

- d. At the regular meeting of the Village Board after the filing of the Committee's recommendation, the Village Board shall act on the recommendation. The recommendation of the Committee shall become the decision of the Village Board unless reversed. Only those members of the Village Board who have certified to the Clerk-Treasurer in writing that they have read the transcript, exhibits and recommendation made shall be permitted to vote on the matter. The Clerk-Treasurer shall make the said certifications a part of the record. The decision of the Village Board shall be a final determination for purposes of judicial review.
- e. If the complaint is found to be true, the licensee shall pay to the Village the actual cost of the proceedings. If the complaint is found by the Village Board to be malicious and without probable cause, the complainant shall pay the cost of the proceedings in the same amount.
- f. When a license is revoked it shall be so entered of record by the Clerk-Treasurer, and no other license shall be granted to such licensee or for such premises for a period of twelve (12) months from the date of the revocation, nor shall any part of the money paid as application fee for any license so revoked be refunded.

license issued pursuant to this Chapter not be renewed. The Chairman of the Committee shall, in writing, notify the licensee of the consideration of nonrenewal. Such notification shall be in the form of and shall serve as the summons and complaint and shall include a statement of the reasons for the consideration of the nonrenewal of the license in the same specificity required for a summons and complaint for revocation or suspension. If the license is recommended for nonrenewal, costs may be assessed against the licensee and any renewal application fee shall be forfeited. In all other respects, the provisions of Subsection (c) above shall apply. The commencement of this action shall stay action by the Village Board on the licensee's application until the Committee makes its recommendation.

- (e) OTHER PROVISIONS. Any license issued pursuant to this Chapter shall be subject to such further regulations and restrictions as may be imposed by the Village Board by amendment to this section or by the enactment of new ordinances. If any licensee shall fail or neglect to meet the requirements imposed by such new restrictions and regulations his license may be revoked in accordance with this section. In case of revocation of any license or any violation of any provision of this Chapter in accordance with this section or by the court or for any reasonable cause except the imposition of new restrictions, no refund shall be made of any part of the license fee.

- (d) PRINCIPAL STRUCTURES. All principal structures shall be located on a lot, and only one principal structure shall be located, erected or moved onto a lot, except for planned area developments in accordance with the provisions of this Chapter.
- (e) PRESERVATION OF TOPOGRAPHY. In order to protect the property owner from possible damage due to change in the existing grade of adjoining lands, and to aid in preserving and protecting the natural beauty and character of the landscape, no change in the existing topography of any land shall be made which would result in increasing any portion of the slope to a ratio greater than one and one-half (1-1/2) horizontal to one 1 vertical, within a distance of twenty (20) feet from the property line, except with the written consent of the owner of the abutting property and with the approval of the Plan Commission; or which would alter the existing drainage or topography in any way as to adversely affect the adjoining property. In no case shall any slope exceed the normal angle of slippage of the material involved, and all slopes shall be protected against erosion.
- (f) ESTABLISHMENT OF GRADES. (Amended 10-21-03) No person, corporation, or entity shall establish grade for a building erected, structurally altered, or relocated under this ordinance without prior approval of the building inspector. This provision applies to all applications for zoning permits, including one and two-family residences in the R-1, R-2 and R-3 Residential zoning districts.

Elevations for buildings shall be established as based on an average building-to-street height relationship which shall be a minimum of two (2) feet with a front yard/driveway slope range of between 1% and 10% as illustrated within Attachment A of this amendment. The Building Inspector shall review information regarding the building-to-street height relationship within information submitted at the time of the zoning permit request. If the building-to-street height relationship is not provided at the time of the permit request or if verification is required,

the Building Inspector may require the permittee to supply necessary elevations on a plan drawing, prepared by a qualified contractor, land surveyor, or Engineer prior to permit issuance.

The building-to-street height relationship shall be referenced from the curb grade as defined in Section 10-1-150(28), or street centerline grade where no curb is present. For streets of significant slope, the average elevation shall be used and is considered to be the mean of two (2) street elevations taken at the straight projection on the frontage street of the side building lines. Additional information may be required in the cases of non-uniform lot dimensions, non-uniform building lines or reversed corner lots, as determined by the Building Inspector.

The building-to-street height relationship may be dictated as based on existing utility services, such as Village sanitary sewer service. In the case of a conflict between interests between sanitary sewer and street grades, the most restrictive condition shall apply.

The building elevation shall be taken on the finished top of concrete foundation wall, or finished garage slab, of the existing or planned building. The building Inspector shall determine the building-to-street height relationship based on this information and identify the controlling building level where surface storm water drainage above that elevation would adversely affect exterior or interior building appurtenances. Buildings with walk-out provisions and partial exposure amenities are deemed special conditions that may require more information for review prior to permit action.

If the Building Inspector in this review does not see a potential problem with regard to site grades, the permit shall be issued pursuant to other permit requirements that may be imposed. The zoning permit shall be issued simultaneously with the building permit request.

If the Building Inspector, upon the review of this information, determines a potential problem in the site grading or drainage aspect to a neighboring property, the Building Inspector shall notify the permittee/applicant and the Director of Public Works. No building permit shall be issued until zoning permit requirements have been met in plan. The Village may require written consent of neighboring properties for the appropriate activity prior to any permit action. In any case the Village shall not be responsible for grading or drainage conflicts if a problem has or has not been identified in the permit process.

For any accessory building, establishment of grade shall be determined per the provisions of this Section, and/or Section 10-1-17, and/or sub-section (e) above, and/or existing or new driveway permit conditions, and/or applicable deed restrictions on the subject property, and/or applicable restrictive covenants,

and/or referenced off the existing principal structure, which ever is more restrictive in the intent of the establishment of grade as determined by the Building Inspector and/or Director of Public Works.

As determined by the Building Inspector and/or the Director of Public Works, deviations that are proposed outside the minimum or maximum standard as set forth above, for the cases outlined above, shall be forwarded to the Village for review and approval, through the variance procedures as referenced in Article L of this Ordinance, prior to permit issuance/approval.

Non-Conforming Buildings: Buildings that are deemed non-conforming by this provision may also be subject to the specifications of Article H of the Zoning Ordinance.

- (g) PRIVATE SEWER AND WATER. In any district where public sewerage service is not available, the width and area of all lots shall be sufficient to permit the use of an on-site sewage disposal system, designed in accordance with Sec. H65, Wisconsin Administrative Code. In any district where a public water service or public sewerage service is not available, the lot width and area shall be determined in accordance with Sec. H65, Wisconsin Administrative Code, but for one-family dwellings shall be not less than one hundred (100) feet and not less than twenty thousand (20,000) square feet respectively.

- (a) PURPOSE. The primary purpose of this District is to preserve, for an extended period in agricultural and related open space land uses, those lands generally located in the path of expected future development of incorporated urban centers. It is the intent that urban development be deferred in such areas until the appropriate legislative bodies concerned determine that it is economically and financially feasible to provide public services and facilities for uses other than those permitted in the District. It is intended that the status of all areas in this District be reviewed by the appropriate planning bodies no less frequently than every five (5) years in order to determine whether, in light of current land development trends, there should be a transfer of all or any part of such areas to some other appropriate use district. Any such review will consider the need for permitting other uses on such land, the nature of the use or uses to be permitted, and the cost and availability of the public services and facilities which will be necessitated by such new use or uses. As a matter of policy, rezoning only to those districts identified for those lands in the Land Use Plan will be approved.

SEC. 10-1-38 PLANNED UNIT DEVELOPMENT DISTRICT (PUD).

- (a) PURPOSE. The Planned Community Development District is established to provide a regulatory framework designed to promote improved environmental design in the Village of Pardeeville by allowing for greater freedom, imagination and flexibility in compliance to the basic intent of the zoning ordinance and the general plan for community development. It allows diversification and variation in the relationship of used, structures, open spaces and heights of structures in developments conceived and implemented as comprehensive and cohesive unified projects.
- (b) PERMITTED USES. The following uses are permitted in the Planned Unit Development District, provided however, that no use shall be permitted except in conformity with a specific and precise development plan pursuant to the procedural and regulatory provisions as hereinafter set forth:
 - (1) Any use permitted by right or as a conditional grant in any of the other districts of this Chapter may be permitted, subject to the criteria as established herein, but such requirements as are made a part of an approved, recorded precise development plan shall be, along with the recorded plan itself, construed to be enforced as part of this Chapter.
 - (2) Lot area, lot width, height, floor area ratio, yard and usable open space requirements. In the Planned Unit Development District, there shall be no predetermined specific lot area, lot width, height, yard and usable open space requirements, but such requirements as are made a part of an approved recorded precise development plan shall be, along with the recorded plan itself, construed to be and enforced as a part of this Chapter.

- (3) Off-street parking. In the Planned Unit Development District, off-street parking facilities shall be provided in accordance with applicable regulations herein set forth and such requirements as area made a part of an approved recorded precise development plan.
- (c) CRITERIA FOR APPROVAL. As a basis for determining the acceptability of a Planned Unit Development District application, the following criteria shall be applied to the precise development plan for such district with specific consideration as to whether or not it is consistent with the spirit and intent of this Chapter, has been prepared with competent professional advice and guidance, and produces significant benefits in terms of environmental design:
 - (1) Character and intensity of land use. In a Planned Unit Development District, the uses proposed and their intensity and arrangement on the site shall be a visual and operational character which:
 - a. Are compatible to the physical nature of the site.
 - b. Would produce an attractive environment of sustained aesthetic and ecologically desirability, economic stability and functional practicality.
 - c. Would not adversely affect the anticipated provision for school or other municipal services.
 - d. Would not create a traffic or parking demand incompatible with the existing or proposed facilities to serve it.
 - (2) Economic feasibility and impact. The proponents of a Planned Unit Development District application shall provide evidence satisfactory to the Village Board of its economic feasibility, of available adequate financing, and that it would not adversely affect the economic prosperity of the Village or the values of surrounding properties.
 - (3) Engineering design standards. The width of street right-of-way, width and location of street or other paving, outdoor lighting location of sewer and water lines, provision for storm water drainage or other similar environmental engineering consideration shall be based upon determination as to the appropriate standards necessary to implement the specific function in the specific situation, provided, however, that in no case shall standards be less than those necessary to insure the public safety and welfare as determined by the Village.
 - (4) Preservation and maintenance of open space. In a Planned Unit Development District, adequate provision shall be made for the permanent preservation and maintenance of common open space either by private reservation or dedication to the public.
 - a. In the case of private reservation, the open area to be reserved shall be protected against building development by conveying to the Village, as part of the conditions for project approval, an open space easement over such open areas.
 - b. The care and maintenance of such open space reservation shall be assured by establishment of

appropriate management organization for the project. The manner of assuring maintenance and assessing such cost to individual properties shall be included in any contractual agreement with the Village and shall be included in the title to each property.

- c. Ownership and tax liability of private open space reservation shall be established in a manner acceptable to the Village and made a part of the conditions of plan approval.

- (5) Implementation Schedule. The proponents of a Planned Unit Development District shall submit a reasonable schedule for the implementation of the development to the satisfaction of the Village Board, including suitable provisions for assurance that each phase could be brought to completion in a manner which would not result in adverse effect upon the community as a result of termination at that point.

- (d) PROCEDURE. The Procedure for rezoning to a Planned Unit Development District shall be as required for any other zoning district change under this Chapter, except that in addition thereto the rezoning may only be considered in conjunction with a development plan and shall be subject to the following additional requirements:

If the Board fails to initiate such a change within thirty (30) days, the petitioner may file a petition directly with the Village Clerk-Treasurer.
 - c. Approval of the rezoning and related general development plan shall establish the basic right of use for the area in conformity with the plan as approved, which shall be recorded as an integral component of the district regulations, but such plan shall be conditioned upon approval of a specific implementation plan, and shall not make permissible any of the uses as proposed until a specific implementation plan is submitted and approved for all or a portion of the general development plan.
- (3) Specific implementation plan. A specific and detailed plan implementation of all or a part of a proposed Planned Unit Development District must be submitted within a reasonable period of time, as determined by the Village Board. ARTICLE D

Conditional Uses

SEC. 10-1-40 STATEMENT OF PURPOSE - CONDITIONAL USES.

The development and execution of this Article is based upon the division of the Village into districts, within which districts the use of land and buildings, and bulk and location of buildings and structures in relation to the land, are mutually compatible and substantially uniform. However, there are certain uses which, because of their unique characteristics, cannot be properly classified as unrestricted permitted uses in any particular district or districts, without consideration, in each case, of the impact of those uses upon neighboring land or public facilities, and of the public need for the particular use at a particular location. Such uses, nevertheless, may be necessary or desirable to be allowed in a particular district provided that due consideration is given to location, development and operation of such uses. Such uses are classified as conditional uses.

SEC. 10-1-41 AUTHORITY OF THE PLAN COMMISSION; REQUIREMENTS.

The Plan Commission shall request such review and await the highway agency's recommendation for a period not to exceed sixty (60) days before taking final action.
- (c) Conditions such as landscaping, architectural design, type of construction, construction commencement and completion dates, sureties, lighting, fencing, planting screens, operation control, hours of operation, improved traffic circulation, deed restrictions, highway access restrictions, increased yards, or parking requirements, may be required by the Plan Commission upon its finding that these are necessary to fulfill the purpose and intent of this Chapter.
- (d) Compliance with all other provisions of this Chapter, such as lot width and area, yards, height, parking, loading, traffic, highway access, and performance standards, shall be required of all conditional uses.

SEC. 10-1-42 INITIATION OF CONDITIONAL USE.

Any person, firm, corporation or organization having a freehold interest or a possessory interest entitled to exclusive possession, or a contractual interest which may become a freehold interest, or an exclusive possessory interest, and which is specifically enforceable in the land for which a conditional use is sought may file an application to use such land for one or more of the conditional uses provided for in this Article in the zoning district in which such land is located.

SEC. 10-1-50 COMPLAINTS REGARDING CONDITIONAL USES.

The Plan Commission shall retain continuing jurisdiction over all conditional uses for the purpose of resolving complaints against all previously approved conditional uses. Such authority shall be in addition to the enforcement authority of the Building Inspector to

order the removal or discontinuance of any unauthorized alterations of an approved conditional use, and the elimination, removal or discontinuance of any violation of a condition imposed prior to or after approval or violation of any other provision of this Code. Upon written complaint by any citizen or official, the Plan Commission shall initially determine whether said complaint indicates a reasonable probability that the subject conditional use is in violation of either one or more of the standards set forth in Section 10-1-46 above, a condition of approval or other requirement imposed hereunder. Upon reaching a positive initial determination, a hearing shall be held upon notice as provided in Section 10-1-45 above. In the event that no reasonable modification of such conditional use can be made in order to assure that Standards (a) and (b) in Section 10-1-46 will be met, the Plan Commission may revoke the subject conditional approval and direct the Building Inspector and the Village Attorney to seek elimination of the subject use. Following any such hearing, the decision of the Plan Commission shall be furnished the current owner of the conditional use in writing stating the reasons therefor.

- (b) STAY OF PROCEEDINGS. An appeal shall stay all legal proceedings in furtherance of the action appealed from, unless the officer from whom the appeal is taken certified to the Board that by reason of facts stated in the certificate a stay would, in his opinion, cause immediate peril to life or property. In such cases, proceedings shall not be stayed otherwise than by a restraining order which may be granted by the Board of Appeals or by a court of record on application, on notice to the officer from whom the appeal is taken, and on due cause shown.
- (c) CONCURRING VOTE. The concurring vote of four (4) members of the

Compliance with all other provisions of this Chapter shall be required.
- (g) PERMITS. The Board may reverse, affirm wholly or partly, modify

the requirements appealed from, and may issue or direct the issue of a permit.

SEC. 10-1-134 VARIATIONS. Amended 01-21-03

(a) PURPOSE.

- (1) A request for a variance may be made when an aggrieved party can submit proof that strict adherence to the provisions of this Zoning Code would cause him undue hardship, or create conditions causing greater harmful effects than the initial condition. A variance granted to a nonconforming use brings that use into conformance with the district and zoning requirements.
- (2) The Board of Appeals may authorize upon appeal, in specific cases, such variance from the terms of the Zoning Ordinances as will not be contrary to the public interest, where owing to special conditions a literal enforcement of the provisions of the Zoning Ordinances will result in unnecessary hardship and so that the spirit of the Zoning Ordinance shall be observed and substantial justice done. No variance shall have the effect of allowing in any district uses prohibited in that district, permit a lower degree of flood protection than the flood protection elevation for the particular area, or permit standards lower than those required by state law. The Board of Appeals shall apply the standards of Sec. 10-1-133(d).
- (3) For the purposes of this section, "unnecessary hardship" shall be defined as an unusual or extreme decrease in the adaptability of the property to the uses permitted by the zoning district which is caused by facts, such as rough terrain or good soil conditions, uniquely applicable to the particular piece of property as distinguished from those applicable to most or all property in the same zoning district.

(b) APPLICATION FOR VARIATION. The application for variation shall be filed with the Clerk-Treasurer. Applications may be made by the owner or lessee of the structure, land or water to be affected. The application shall contain the following information:

- (1) Name and address of applicant and all abutting and opposite property owners of record.
- (2) Statement that the applicant is the owner or the authorized agent of the owner of the property.
- (3) Address and description of the property.
- (4) Plat of Survey prepared by a registered land surveyor showing all of the information required under Section 10-1-12 for a Zoning permit.
- (5) Additional information required by the Plan Commission, Village Engineer, Board of Zoning Appeals, or Building Inspector.
- (6) Fee receipt from the Clerk-Treasurer in the amount as set forth in Section 1-1-8.

(c) PUBLIC HEARING OF APPLICATION. The Board of Appeals shall conduct

at least one (1) public hearing on the proposed variation. Notice of such hearing shall be given not more than thirty (30) days and not less than ten (10) days before the hearing in one or more of the newspapers in general circulation in the Village of Pardeeville, and shall give due notice to the parties in interest, the Building Inspector, and the Plan Commission. At the hearing the appellant or applicant may appear in person, by agent, or by attorney. The Board shall thereafter reach its decision within thirty (30) days after the final hearing and shall transmit a written copy of its decision to the appellant or applicant, Zoning Inspector and Plan Commission.

(d) ACTION OF THE BOARD OF APPEALS. For the Board to grant a variance it must find that:

- (1) Denial of variation may result in hardship to the property owner due to physiographical considerations. There must be exceptional, extraordinary, or unusual circumstances or conditions applying to the lot or parcel, structure, use, or intended use that do not apply generally to other properties or uses in the same district and the granting of the variance would not be of so general or recurrent nature as to suggest that the Zoning Ordinance should be changed.
- (2) The conditions upon which a petition for a variation is based are unique to the property for which variation is being sought, and that such variance is necessary for the preservation and enjoyment of substantial property rights possessed by other properties in the same district and same vicinity.
- (3) The purpose of the variation is not based exclusively upon a desire to increase the value or income potential of the property.
- (4) The granting of the variation will not be detrimental to the public welfare or injurious to the other property or improvements in the neighborhood in which the property is located.
- (5) The proposed variation will not undermine the spirit and general and specific purposes of the Zoning Code.

(f) CONDITIONS. The Board of Appeals may impose such conditions and restrictions upon the premises benefited by a variance as may be necessary to comply with the standards established in this Section.

(g) EXPIRATION. Variances, substitutions or use permits granted by the Board shall expire within six (6) months unless substantial work has commenced pursuant to such grant.

(h) REVIEW BY COURT OF RECORD. Any person or persons aggrieved by any decision of the Board of Zoning Appeals may present to the court of record a petition duly verified setting forth that such decision is illegal and specifying the grounds of the illegality. Such petition shall be presented to the court within thirty (30) days after the filing of the decision in the office of the Board of Zoning Appeals.

- (a) AUTHORITY.
 - (1) Whenever the public necessity, convenience, general welfare or good zoning practice require, the Village Board may, by ordinance, change the district boundaries or amend, change or supplement the regulations established by this Ordinance or amendments thereto.
 - (2) Such change or amendment shall be subject to the review and recommendation of the Plan Commission and the appropriate Joint Extraterritorial Zoning Committee.
- (b) INITIATION. A change or amendment may be initiated by the Village Board, Plan Commission, or by a petition of one or more of the owners or lessees of property within the area proposed to be changed.
- (c) PETITIONS. Petitions for any change to the district boundaries or amendments to the regulations shall be filed with the Clerk-Treasurer, describe the premises to be rezoned or the regulations to be amended, list the reasons justifying the petition, specify the proposed use and have attached the following:
 - (1) Plot Plan drawn to a scale of one (1) inch equals one hundred (100) feet showing the area proposed to be rezoned, its location, its dimensions, the location and classification of adjacent zoning districts, and the location and existing use of all properties within two hundred (200) feet of the areas proposed to be rezoned.
 - (2) Owners' Names and Addresses of all properties lying within two hundred (200) feet of the area proposed to be rezoned.
 - (3) Additional Information required by the Plan Commission, Joint Extraterritorial Zoning Committee, or Village Board.
 - (4) Fee Receipt from the Clerk-Treasurer in the amount as set forth in Section 1-1-8.
- (d) RECOMMENDATIONS.
 - (1) The Plan Commission shall review all proposed changes and amendments within the corporate limits and shall recommend that the petition be granted as requested, modified, or denied. The recommendation shall be made at a meeting subsequent to the meeting at which the petition is first submitted and shall be made in writing to the Village Board.
 - (2) The appropriate Joint Extraterritorial Zoning Committee and the Plan Commission shall review all proposed changes and amendments within the extraterritorial zoning jurisdiction, but only the members of the appropriate Joint Committee shall vote on matters relating to their zoning jurisdiction.
- (e) HEARINGS.
 - (1) The Village Board shall hold a public hearing upon each recommendation, giving at least ten (10) days' prior notice by publication at least two (2) times during the preceding thirty (30) days, listing the time, place, and the changes or amendments proposed. 	(9) Discourage development in a floodplain if there is any practicable alternative to locate the activity, use or structure outside of the floodplain.	
1.4	<u>TITLE</u>	
	This ordinance shall be known as the Floodplain Zoning Ordinance for the Village of Pardeeville, Wisconsin.	
1.5	<u>GENERAL PROVISIONS</u>	
	(1) <u>AREAS TO BE REGULATED</u>	
	This ordinance regulates all areas that would be covered by the regional flood or base flood as shown on the Flood	

Insurance Rate Map (FIRM) or other maps approved by DNR. Base flood elevations are derived from the flood profiles in the Flood Insurance Study (FIS) and are shown as AE, A1-30, and AH Zones on the FIRM. Other regulatory zones are displayed as A and AO zones. Regional Flood Elevations (RFE) may be derived from other studies. If more than one map or revision is referenced, the most restrictive information shall apply.

(2) OFFICIAL MAPS & REVISIONS

The boundaries of all floodplain districts are designated as A, AE, AH, AO or A1-30 on the maps based on the Flood Insurance Study (FIS) listed below. Any change to the base flood elevations (BFE) or any changes to the boundaries of the floodplain or floodway in the FIS or on the Flood Insurance Rate Map (FIRM) must be reviewed and approved by the DNR and FEMA through the Letter of Map Change process (see s. 8.0 *Amendments*) before it is effective. No changes to RFE's on non-FEMA maps shall be effective until approved by the DNR. These maps and revisions are on file in the office of the Village Clerk, Village of Pardeeville. If more than one map or revision is referenced, the most restrictive information shall apply.

(a) OFFICIAL MAPS : Based on the FIS:

1. Flood Insurance Rate Map (FIRM), panel number 55021C0287F, 55021C0289F, 55021C0291F, and 55021C0293F, dated May 16, 2016;

Approved by: The DNR and FEMA

(3) ESTABLISHMENT OF FLOODPLAIN ZONING DISTRICTS

The regional floodplain areas are divided into three districts as follows:

- (a) The Floodway District (FW), is the channel of a river or stream and those portions of the floodplain adjoining the channel required to carry the regional floodwaters and are contained within AE Zones as shown on the FIRM.
- (b) The Floodfringe District (FF) is that portion between the regional flood limits and the floodway and displayed as AE Zones on the FIRM.
- (c) The General Floodplain District (GFP) is those areas that may be covered by floodwater during the regional flood and does not have a BFE or floodway boundary determined, including A, AH and AO zones on the FIRM.

(4) LOCATING FLOODPLAIN BOUNDARIES

Discrepancies between boundaries on the official floodplain zoning map and actual field conditions shall be resolved using the criteria in subd (a) or (b) below. If a significant difference exists, the map shall be amended according to s. 8.0 *Amendments*. The zoning administrator can rely on a boundary derived from a profile elevation to grant or deny a land use permit, whether or not a map amendment is required. The zoning administrator shall be responsible for documenting actual pre-development field conditions and the basis upon which the district boundary was determined and for initiating any map amendments required under this section. Disputes between the zoning administrator and an applicant over the district boundary line shall be settled according to s. 7.3(3) and the criteria in (a) and (b) below. Where the flood profiles are based on established base flood elevations from a FIRM, FEMA must approve any map amendment or revision pursuant to s. 8.0 *Amendments*.

- (a) If flood profiles exist, the map scale and the profile elevations shall determine the district boundary. The regional or base flood elevations shall govern if there are any discrepancies.
- (b) Where flood profiles do not exist for projects, the location of the boundary shall be determined by the map scale.

(5) REMOVAL OF LANDS FROM FLOODPLAIN

Compliance with the provisions of this ordinance shall not be grounds for removing land from the floodplain unless it is filled at least two feet above the regional or base flood elevation, the fill is contiguous to land outside the floodplain, and the map is amended pursuant to s. 8.0 *Amendments*.

(6) COMPLIANCE

Any development or use within the areas regulated by this ordinance shall be in compliance with the terms of this ordinance, and other applicable local, state, and federal regulations.

(7) MUNICIPALITIES AND STATE AGENCIES REGULATED

Unless specifically exempted by law, all cities, villages, towns, and counties are required to comply with this ordinance and obtain all necessary permits. State agencies are required to comply if s. 13.48(13), Stats., applies. The construction, reconstruction, maintenance and repair of state highways and bridges by the Wisconsin Department of Transportation is exempt when s. 30.2022, Stats., applies.

(8) ABROGATION AND GREATER RESTRICTIONS

(a) This ordinance supersedes all the provisions of any municipal zoning ordinance enacted under ss. 59.69, 59.692 or 59.694 for counties; s. 62.23 for cities; s. 61.35 for villages; or s. 87.30, Stats., which relate to floodplains. A more restrictive ordinance shall continue in full force and effect to the extent of the greater restrictions, but not otherwise.

(b) This ordinance is not intended to repeal, abrogate or impair any existing deed restrictions, covenants or easements. If this ordinance imposes greater restrictions, the provisions of this ordinance shall prevail.

(9) INTERPRETATION

In their interpretation and application, the provisions of this ordinance are the minimum requirements liberally construed in favor of the governing body and are not a limitation on or repeal of any other powers granted by the Wisconsin Statutes. If a provision of this ordinance, required by ch. NR 116, Wis. Adm. Code, is unclear, the provision shall be interpreted in light of the standards in effect on the date of the adoption of this ordinance or in effect on the date of the most recent text amendment to this ordinance.

(10) WARNING AND DISCLAIMER OF LIABILITY

The flood protection standards in this ordinance are based on engineering experience and research. Larger floods may occur or the flood height may be increased by man-made or natural causes. This ordinance does not imply or guarantee that non-floodplain areas or permitted floodplain uses will be free from flooding and flood damages. This ordinance does not create liability on the part of, or a cause of action against, the municipality or any officer or employee thereof for any flood damage that may result from reliance on this ordinance.

(11) SEVERABILITY

Should any portion of this ordinance be declared unconstitutional or invalid by a court of competent jurisdiction, the remainder of this ordinance shall not be affected.

(12) ANNEXED AREAS FOR CITIES AND VILLAGES

The Columbia County floodplain zoning provisions in effect on the date of annexation shall remain in effect and shall be enforced by the municipality for all annexed areas until the municipality adopts and enforces an ordinance which meets the requirements of ch. NR 116, Wis. Adm. Code and 44 CFR 59-72, *National Flood Insurance Program* (NFIP). These annexed lands are described on the municipality's official

zoning map. County floodplain zoning provisions are incorporated by reference for the purpose of administering this section and are on file in the office of the municipal zoning administrator. All plats or maps of annexation shall show the regional flood elevation and the floodway location.

2.0 GENERAL STANDARDS APPLICABLE TO ALL FLOODPLAIN DISTRICTS

The community shall review all permit applications to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is in a flood-prone area, all new construction and substantial improvements shall be designed and anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads; be constructed with flood-resistant materials; be constructed to minimize flood damages and to ensure that utility and mechanical equipment is designed and/or located so as to prevent water from entering or accumulating within the equipment during conditions of flooding.

Subdivisions shall be reviewed for compliance with the above standards. All subdivision proposals (including manufactured home parks) shall include regional flood elevation and floodway data for any development that meets the subdivision definition of this ordinance and all other requirements in s. 7.1(2). Adequate drainage shall be provided to reduce exposure to flood hazards and all public utilities and facilities, such as sewer, gas, electrical, and water systems are located and constructed to minimize or eliminate flood damages.

2.1 HYDRAULIC AND HYDROLOGIC ANALYSES

(1) No floodplain development shall:

- (a) Obstruct flow, defined as development which blocks the conveyance of floodwaters by itself or with other development, causing any increase in the regional flood height; or
- (b) Cause any increase in the regional flood height due to floodplain storage area lost.

(2) The zoning administrator shall deny permits if it is

determined the proposed development will obstruct flow or cause any increase in the regional flood height, based on the officially adopted FIRM or other adopted map, unless the provisions of s. 8.0 *Amendments* are met.

2.2 WATERCOURSE ALTERATIONS

No land use permit to alter or relocate a watercourse in a mapped floodplain shall be issued until the local official has notified in writing all adjacent municipalities, the Department and FEMA regional offices, and required the applicant to secure all necessary state and federal permits. The standards of s. 2.1 must be met and the flood carrying capacity of any altered or relocated watercourse shall be maintained.

As soon as is practicable, but not later than six months after the date of the watercourse alteration or relocation and pursuant to s. 8.0 *Amendments*, the community shall apply for a Letter of Map Revision (LOMR) from FEMA. Any such alterations must be reviewed and approved by FEMA and the DNR through the LOMC process.

2.3 CHAPTER 30, 31, WIS. STATS., DEVELOPMENT

Development which requires a permit from the Department, under chs. 30 and 31, Stats., such as docks, piers, wharves, bridges, culverts, dams and navigational aids, may be allowed if the necessary permits are obtained and amendments to the floodplain zoning ordinance are made according to s. 8.0 *Amendments*.

2.4 PUBLIC OR PRIVATE CAMPGROUNDS

Public or private campgrounds shall have a low flood damage potential and shall meet the following provisions:

- (1) The campground is approved by the Department of Health Services;
- (2) A land use permit for the campground is issued by the zoning administrator;

- (4) There is an adequate flood warning procedure for the campground that offers the minimum notice required under this section to all persons in the campground. This procedure shall include a written agreement between the campground owner, the municipal emergency government coordinator and the chief law enforcement official which specifies the flood elevation at which evacuation shall occur, personnel responsible for monitoring flood elevations, types of warning systems to be used and the procedures for notifying at-risk parties, and the methods and personnel responsible for conducting the evacuation;
- (5) This agreement shall be for no more than one calendar year, at which time the agreement shall be reviewed and updated - by the officials identified in sub. (4) - to remain in compliance with all applicable regulations, including those of the state Department of Health Services and all other

applicable regulations;

- (6) Only camping units that are fully licensed, if required, and ready for highway use are allowed;
- (7) The camping units shall not occupy any site in the campground for more than 180 consecutive days, at which time the camping unit must be removed from the floodplain for a minimum of 24 hours;
- (8) All camping units that remain on site for more than 30 days shall be issued a limited authorization by the campground operator, a written copy of which is kept on file at the campground. Such authorization shall allow placement of a camping unit for a period not to exceed 180 days and shall ensure compliance with all the provisions of this section;
- (9) The municipality shall monitor the limited authorizations issued by the campground operator to assure compliance with the terms of this section;
- (10) All camping units that remain in place for more than 180 consecutive days must meet the applicable requirements in either s. 3.0, 4.0 or 5.0 for the floodplain district in which the structure is located;
- (11) The campground shall have signs clearly posted at all entrances warning of the flood hazard and the procedures for evacuation when a flood warning is issued; and
- (12) All service facilities, including but not limited to refuse collection, electrical service, gas lines, propane tanks, sewage systems and wells shall be properly anchored and placed at or floodproofed to the flood protection elevation.

5.0 GENERAL FLOODPLAIN DISTRICT (GFP)

5.1 APPLICABILITY

The provisions for this district shall apply to all floodplains mapped as A, AO or AH zones.

5.2 PERMITTED USES

(1) APPLICABILITY

If these standards conform with s. 59.69(10), Stats., for counties or s. 62.23(7)(h), Stats., for cities and villages, they shall apply to all modifications or additions to any nonconforming use or structure and to the use of any structure or premises which was lawful before the passage of this ordinance or any amendment thereto.

- (2) The existing lawful use of a structure or its accessory use which is not in conformity with the provisions of this ordinance may continue subject to the following conditions:

- (a) No modifications or additions to a nonconforming use or structure shall be permitted unless they comply with this ordinance. The words "modification" and "addition" include, but are not limited to, any alteration, addition, modification, structural repair, rebuilding or replacement of any such existing use, structure or accessory structure or use. Maintenance is not considered a modification; this includes painting, decorating, paneling and other nonstructural components and the maintenance, repair or replacement of existing private sewage or water supply systems or connections to public utilities. Any costs associated with the repair of a damaged structure are not considered maintenance.

The construction of a deck that does not exceed 200 square feet and that is adjacent to the exterior wall of a principal structure is not an extension, modification or addition. The roof of the structure may extend over a portion of the deck in order to provide safe ingress and egress to the principal structure.

- (b) If a nonconforming use or the use of a nonconforming structure is discontinued for 12 consecutive months, it is no longer permitted and any future use of the property, and any structure or building thereon, shall conform to the applicable requirements of this ordinance;

- (c) The municipality shall keep a record which lists all nonconforming uses and nonconforming structures, their present equalized assessed value, the cost of all modifications or additions which have been permitted, and the percentage of the structure's total current value those modifications represent;

- (d) No modification or addition to any nonconforming structure or any structure with a nonconforming use, which over the life of the structure would equal or exceed 50% of its present equalized assessed value, shall be allowed unless the entire structure is permanently changed to a conforming structure with a conforming use in compliance with the applicable requirements of this ordinance. Contiguous dry land access must be provided for residential and commercial uses in compliance with s. 4.3(1). The costs of elevating the lowest floor of a nonconforming building or a building with a nonconforming use to the flood protection elevation are excluded from the 50% provisions of this paragraph;

- (e) No maintenance to any nonconforming structure or any structure with a nonconforming use, the cost of which would equal or exceed 50% of its present equalized assessed value, shall be allowed unless the entire structure is permanently changed to a conforming structure with a conforming use in compliance with the applicable requirements of this ordinance.

Contiguous dry land access must be provided for residential and commercial uses in compliance with s. 4.3(1).

- (f) If on a per event basis the total value of the work being done under (d) and (e) equals or exceeds 50% of the present equalized assessed value the work shall not be permitted unless the entire structure is permanently changed to a conforming structure with a conforming use in compliance with the applicable requirements of this ordinance. Contiguous dry land access must be provided for residential and commercial uses in compliance with s. 4.3(1).
- (g) Except as provided in subd. (h), if any nonconforming structure or any structure with a nonconforming use is destroyed or is substantially damaged, it cannot be replaced, reconstructed or rebuilt unless the use and the structure meet the current ordinance requirements. A structure is considered substantially damaged if the total cost to restore the structure to its pre-damaged condition equals or exceeds 50% of the structure's present equalized assessed value.
- (h) For nonconforming buildings that are substantially damaged or destroyed by a nonflood disaster, the repair or reconstruction of any such nonconforming building shall be permitted in order to restore it to the size and use in effect prior to the damage event, provided that the minimum federal code requirements below are met and all required permits have been granted prior to the start of construction.

1. Residential Structures

- a. Shall have the lowest floor, including basement, elevated to or above the base flood elevation using fill, pilings, columns, posts or perimeter walls. Perimeter walls must meet the requirements of s. 7.5(2).
- b. Shall be anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy and shall be constructed with methods and materials resistant to flood damage.
- c. Shall be constructed with electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed and/or elevated so as to prevent water from entering or accumulating within the components during conditions of flooding.
- d. In A Zones, obtain, review and utilize any flood data available from a federal, state or other source.

- e. In AO Zones with no elevations specified, shall have the lowest floor, including basement, meet the standards in s. 5.3(1).
 - f. in AO Zones, shall have adequate drainage paths around structures on slopes to guide floodwaters around and away from the structure.
2. Nonresidential Structures
- a. Shall meet the requirements of s. 6.1(2)(h)1a-b, e-f.
 - b. Shall either have the lowest floor, including basement, elevated to or above the regional flood elevation; or, together with attendant utility and sanitary facilities, shall meet the standards in s. 7.5(1) or (2).
 - c. In AO Zones with no elevations specified, shall have the lowest floor, including basement, meet the standards in s. 5.3(1).
- (3) A nonconforming historic structure may be altered if the alteration will not preclude the structure's continued designation as a historic structure, the alteration will comply with s. 3.3(1), flood resistant materials are used, and construction practices and floodproofing methods that comply with s. 7.5 are used. Repair or rehabilitation of historic structures shall be exempt from the development standards of s. 6.1(2)(h)1 if it is determined that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure and is the minimum necessary to preserve the historic character and design of the structure.

6.2 FLOODWAY DISTRICT

- (1) No modification or addition shall be allowed to any nonconforming structure or any structure with a nonconforming use in the Floodway District, unless such modification or addition:
- (a) Has been granted a permit or variance which meets all ordinance requirements;
 - (b) Meets the requirements of s. 6.1;
 - (c) Shall not increase the obstruction to flood flows or regional flood height;
 - (d) Any addition to the existing structure shall be floodproofed, pursuant to s. 7.5, by means other than the use of fill, to the flood protection elevation; and
 - (e) If any part of the foundation below the flood protection elevation is enclosed, the following standards shall apply:

1. The enclosed area shall be designed by a registered architect or engineer to allow for the efficient entry and exit of flood waters without human intervention. A minimum of two openings must be provided with a minimum net area of at least one square inch for every one square foot of the enclosed area.  - b. Hydraulic modeling
The regional flood elevation shall be based on the standards in ch. NR 116.07(4), Wis. Admin. Code, *Hydraulic Analysis: Determination of Regional Flood Elevation* and the following:
 - i. determination of the required limits of the hydraulic model shall be based on detailed study information for downstream structures (dam, bridge, culvert) to determine adequate starting WSEL for the study.

- ii. channel sections must be surveyed.
 - iii. minimum four foot contour data in the overbanks shall be used for the development of cross section overbank and floodplain mapping.
 - iv. a maximum distance of 500 feet between cross sections is allowed in developed areas with additional intermediate cross sections required at transitions in channel bottom slope including a survey of the channel at each location.
 - v. the most current version of HEC_RAS shall be used.

 - viii. standard accepted engineering practices shall be used when assigning parameters for the base model such as flow, Manning's N values, expansion and contraction coefficients or effective flow limits. The base model shall be calibrated to past flooding data such as high water marks to determine the reasonableness of the model results. If no historical data is available, adequate justification shall be provided for any parameters outside standard accepted engineering practices.
 - ix. the model must extend past the upstream limit of the difference in the existing and proposed flood profiles in order to provide a tie-in to existing studies. The height difference between the proposed flood profile and the existing study profiles shall be no more than 0.00 feet.
- c. Mapping

- ii. If any part of the proposed development is in the floodway, it must be added to the base model to show the difference between existing and proposed conditions. The study must ensure that all coefficients remain the same as in the existing model, unless adequate justification based on standard accepted engineering practices is provided.

2. Zone AE Floodplains

a. Hydrology

If the proposed hydrology will change the existing study, the appropriate method to be used shall be based on ch. NR 116.07(3), Wis. Admin. Code, *Hydrologic Analysis: Determination of Regional Flood Discharge*.

b. Hydraulic model

The regional flood elevation shall be based on the standards in ch. NR 116.07(4), Wis. Admin. Code, *Hydraulic Analysis: Determination of Regional Flood Elevation* and the following:

i. Duplicate Effective Model

The effective model shall be reproduced to ensure correct transference of the model data and to allow integration of the revised data to provide a continuous FIS model upstream and downstream of the revised reach. If data from the effective model is available, models shall be generated that duplicate the FIS profiles and the elevations shown in the Floodway Data Table in the FIS report to within 0.1 foot.

ii. Corrected Effective Model.

The Corrected Effective Model shall not include any man-made physical changes since the effective model date, but shall import the model into the most current version of HEC-RAS for Department review.

iii. Existing (Pre-Project Conditions) Model.

iv. Revised (Post-Project Conditions) Model.

The Revised (Post-Project Conditions) Model shall incorporate the Existing Model and any proposed changes to the topography caused by the proposed development. This model shall reflect proposed conditions.

v. All changes to the Duplicate Effective Model and subsequent models must be supported by certified topographic information, bridge plans, construction

plans and survey notes.

- vi. Changes to the hydraulic models shall be limited to the stream reach for which the revision is being requested. Cross sections upstream and downstream of the revised reach shall be identical to those in the effective model and result in water surface elevations and topwidths computed by the revised models matching those in the effective models upstream and downstream of the revised reach as required. The Effective Model shall not be truncated.

c. Mapping

Maps and associated engineering data shall be submitted to the Department for review which meet the following conditions:

- i. Consistency between the revised hydraulic models, the revised floodplain and floodway delineations, the revised flood profiles, topographic work map, annotated FIRMs and/or Flood Boundary Floodway Maps (FBFMs), construction plans, bridge plans.

 6. Allow any alteration of an historic structure, including its use, which would preclude its continued designation as an historic structure.
- (d) When a floodplain variance is granted the Board shall notify the applicant in writing that it may increase risks to

life and property and flood insurance premiums could increase up to \$25.00 per \$100.00 of coverage. A copy shall be maintained with the variance record.

7.4 TO REVIEW APPEALS OF PERMIT DENIALS

- (1) The Zoning Agency (s. 7.2) or Board shall review all data related to the appeal. This may include:

Increases may only be allowed after amending the flood profile and map and all appropriate legal arrangements are made with all adversely affected property owners as per the requirements of s. 8.0 *Amendments*; and
 - (b) Grant the appeal where the Board agrees that the data properly demonstrates that the project does not cause an increase provided no other reasons for denial exist.

7.5 FLOODPROOFING STANDARDS FOR NONCOMFORMING STRUCTURES OR USES

Local ordinances or bylaws may require additional notice, exceeding these minimums.
39. HIGH FLOOD DAMAGE POTENTIAL - Damage that could result from flooding that includes any danger to life or health or any significant economic loss to a structure or building and its contents.

44. LOWEST ADJACENT GRADE - Elevation of the lowest ground surface that touches any of the exterior walls of a building.
45. LOWEST FLOOR - The lowest floor of the lowest enclosed area (including basement). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access or storage in an area other than a basement area is not considered a building's lowest floor; provided that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of 44 CFR 60.3.
46. MAINTENANCE - The act or process of restoring to original soundness, including redecorating, refinishing, non structural repairs, or the replacement of existing fixtures, systems or equipment with equivalent fixtures, systems or structures.
47. MANUFACTURED HOME - A structure transportable in one or more sections, which is built on a permanent chassis and is designed to be used with or without a permanent foundation when connected to required utilities. The term "manufactured home" includes a mobile home but does not include a "mobile recreational vehicle."

49. MOBILE/MANUFACTURED HOME PARK OR SUBDIVISION, EXISTING - A parcel of land, divided into two or more manufactured home lots for rent or sale, on which the construction of facilities for servicing the lots is completed before the effective date of this ordinance. At a minimum, this would include the installation of utilities, the construction of streets and either final site grading or the pouring of concrete pads.
50. MOBILE/MANUFACTURED HOME PARK, EXPANSION TO EXISTING - The preparation of additional sites by the construction of facilities for servicing the lots on which the manufactured homes are to be affixed. This includes installation of utilities, construction of streets and either final site grading, or the pouring of concrete pads.

Manufactured homes that are towed or carried onto a parcel of land, but do not remain capable of being towed or carried, including park model homes, do not fall within the definition of "mobile recreational vehicles."
52. MODEL, CORRECTED EFFECTIVE - A hydraulic engineering model that corrects any errors that occur in the Duplicate Effective Model, adds any additional cross sections to the Duplicate Effective Model, or incorporates more detailed topographic information than that used in the current effective model.

60. NEW CONSTRUCTION - For floodplain management purposes, "new construction" means structures for which the start of construction commenced on or after the effective date of floodplain zoning regulations adopted by this community and includes any subsequent improvements to such structures. For the purpose of determining flood insurance rates, it includes any structures for which the

"start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures.

61. NONCONFORMING STRUCTURE - An existing lawful structure or building which is not in conformity with the dimensional or structural requirements of this ordinance for the area of the floodplain which it occupies. (For example, an existing residential structure in the floodfringe district is a conforming use. However, if the lowest floor is lower than the flood protection elevation, the structure is nonconforming.)

67. PERSON - An individual, or group of individuals, corporation, partnership, association, municipality or state agency.
68. PRIVATE SEWAGE SYSTEM - A sewage treatment and disposal system serving one structure with a septic tank and soil absorption field located on the same parcel as the structure. It also means an alternative sewage system approved by the Department of Safety and Professional Services, including a substitute for the septic tank or soil absorption field, a holding tank, a system serving more than one structure or a system located on a different parcel than the structure.
69. PUBLIC UTILITIES - Those utilities using underground or overhead transmission lines such as electric, telephone and telegraph, and distribution and collection systems such as water, sanitary sewer and storm sewer.

floodplain and that any subsurface waters related to the base flood will not damage existing or proposed buildings.

71. REGIONAL FLOOD - A flood determined to be representative of large floods known to have occurred in Wisconsin. A regional flood is a flood with a one percent chance of being equaled or exceeded in any given year, and if depicted on the FIRM, the RFE is equivalent to the BFE.
72. START OF CONSTRUCTION - The date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond initial excavation, or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling, nor does it include the installation of streets and/or walkways, nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms, nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For an alteration, the actual start of construction means the first alteration of any wall, ceiling, floor or other structural part of a building, whether or not that alteration affects the external dimensions of the building.
73. STRUCTURE - Any manmade object with form, shape and utility, either permanently or temporarily attached to, placed upon or set into the ground, stream bed or lake bed, including, but not limited to, roofed and walled buildings, gas or liquid storage tanks, bridges, dams and culverts.
74. SUBDIVISION - Has the meaning given in s. 236.02(12), Wis. Stats.
75. SUBSTANTIAL DAMAGE - Damage of any origin sustained by a structure, whereby the cost of restoring the structure to its pre-damaged condition would equal or exceed 50 percent of the equalized assessed value of the structure before the damage occurred.
76. SUBSTANTIAL IMPROVEMENT - Any repair, reconstruction, rehabilitation, addition or improvement of a building or structure, the cost of which equals or exceeds 50 percent of the equalized assessed value of the structure before the improvement or repair is started. If the structure has sustained substantial damage, any repairs are considered substantial improvement regardless of the work performed. The term does not, however, include either any project for the improvement of a building required to correct existing health, sanitary or safety code violations identified by the building official and that are the minimum necessary to assure safe living conditions; or any alteration of a historic structure provided that the alteration will not preclude the structure's

continued designation as a historic structure.

77. UNNECESSARY HARDSHIP - Where special conditions affecting a particular property, which were not self-created, have made strict conformity with restrictions governing areas, setbacks, frontage, height or density unnecessarily burdensome or unreasonable in light of the purposes of the ordinance.
78. VARIANCE - An authorization by the board of adjustment or appeals for the construction or maintenance of a building or structure in a manner which is inconsistent with dimensional standards (not uses) contained in the floodplain zoning ordinance.
79. VIOLATION - The failure of a structure or other development to be fully compliant with the floodplain zoning ordinance. A structure or other development without required permits, lowest floor elevation documentation, floodproofing certificates or required floodway encroachment calculations is presumed to be in violation until such time as that documentation is provided.
80. WATERSHED - The entire region contributing runoff or surface water to a watercourse or body of water.
81. WATER SURFACE PROFILE - A graphical representation showing the elevation of the water surface of a watercourse for each position along a reach of river or stream at a certain flood flow. A water surface profile of the regional flood is used in regulating floodplain areas.
82. WELL - means an excavation opening in the ground made by digging, boring, drilling, driving or other methods, to obtain groundwater regardless of its intended use.

Proposed streets shall be extended to the boundary lines of the tract to be subdivided, unless prevented by topography or other physical conditions, or unless in the opinion of the Plan Commission and/or Village Engineer such extension is not necessary or desirable for the coordination of the layout of the subdivision with existing layout or the most advantageous future development of adjacent tracts.
- (f) VISIBILITY. Streets shall afford maximum visibility and safety and shall intersect at right angles, where practicable.
- (g) GRADES. Street grades shall not exceed six (6%) percent and shall be at least .5 (0.5%) percent.
- (h) INTERSECTIONS.
 - (1) Property lines at street intersections shall be rounded with a radius of fifteen (15) feet or of a greater radius where the Plan Commission and/or Village Engineer considers it necessary.
 - (2) Street jogs with centerline offsets of less than one hundred twenty-five (125) feet shall not be permitted.
- (i) STREET NAMES. New street names shall not duplicate the names of existing streets, but streets that are continuations of others already in existence and named shall bear the names of the existing streets. Street names shall be subject to approval by the Plan Commission and/or Village Engineer.
- (j) STREET DESIGN STANDARDS. The minimum right-of-way and roadway width of all proposed streets shall be as specified by the Village Master Plan.

- (k) In the absence of specific road width standards which are not provided by the Village Master Plan the Village Engineer shall determine both overall right-of-way widths and pavement widths based on adjacent existing streets and other planning issues.

SEC 10-3-6

DESIGN STANDARDS - BLOCK DESIGN

- (a) LENGTH. The lengths, widths and shapes of blocks shall be appropriate for the topography and the type of development contemplated, but block length in residential areas shall not exceed one thousand five hundred (1,500) feet, nor have less than sufficient width to provide for two tiers of lots of appropriate depth between street lines. As a general rule, blocks shall not be less than six hundred (600) feet in length.
- (b) RIGHT ANGLE INTERSECTIONS. Wherever possible, right angle street intersections should be encouraged.
- (c) PEDESTRIAN PATHWAYS. Pedestrian pathways, not less than ten (10) feet wide, may be required by the Plan Commission through the center of a block more than nine hundred (900) feet long, where deemed essential to provide circulation or access to schools, playgrounds, shopping centers, transportation, and other community facilities.
- (d) TREES. The Village Board may require that certain species of trees be planted on both sides of all streets.

SEC. 10-3-7

DESIGN STANDARDS - LOTS

- (a) Size, shape and orientation of lots shall be appropriate for the location of the subdivision and for the type of development contemplated, provided that no residential lot shall be smaller in area than the minimum lot size for the appropriate zone as established by the Zoning Code.
- (b) Lot dimensions shall conform to the requirements of the Zoning Code, but in no case shall have a frontage of less than sixty (60) feet at the building line or a depth of less than one hundred (100) feet.
- (c) Depth and width of properties reserved or laid out for commercial or industrial purposes shall be adequate to provide for the off-street service and parking facilities required by the type of use and development contemplated, as required by the Zoning Code.
- (d) Corner lots for residential use shall have extra width to permit building setback from both streets, as required by the Zoning Code.
- (e) Every lot shall abut or face a public street.
- (f) Side lot lines shall be at right angles to or radial to abutting street lines.
- (g) Double frontage and reversed frontage lots shall be avoided except where necessary to provide separation of residential

development from traffic arteries or to overcome specific disadvantages of topography and orientation.

SEC. 10-3-8 **FLOOD PROTECTION**

- (a) Filling of all lots in each subdivision is required to a point not less than one (1) foot above the flood protection elevation for the particular area as specified on the flood profile appended to the Floodplain Zoning Ordinance.
- (b) Areas to be filled shall also include all street rights-of-way and other appropriate areas, such as park and open space lands, so that they bear a reasonable relationship to adjoining properties.

SEC. 10-3-9 **DRAINAGE SYSTEM**

- (a) DRAINAGE SYSTEM REQUIRED. A drainage system shall be designed and constructed by the Owner to provide for the proper drainage of the surface water of the subdivision and the drainage area of which it is a part. A final plat shall not be approved until the Owner shall submit plans, profiles and specifications as specified in this Section, which have been prepared by a registered professional engineer and approved by the Village Engineer.
- (b) DRAINAGE SYSTEM PLANS.
 - (1) The Owner shall submit to the Village Engineer and Plan Commission a report on the ability of existing watercourse channels, storm sewers, culverts, and other improvements pertaining to drainage or flood control within the subdivision to handle the additional runoff which would be generated by the development of the land within the subdivision. Additional information shall be submitted to adequately indicate that provision has been made for disposal of surface water without any damage to the developed or undeveloped land downstream of or below the proposed subdivision. The report shall also include:
 - a. Estimates of the quantity of storm water entering the subdivision naturally from areas outside the subdivision.
 - b. Quantities of flow at each inlet or culvert.
 - c. Location, sizes and grades of required culverts, storm drainage sewers and other required appurtenances.
 - (2) A grading plan for the streets, blocks and lots shall be submitted by the Owner for the area within the subdivision.
 - (3) The drainage system shall provide for a 100 year storm capacity. This shall include any additional upstream storage required due to down stream restrictions. The Owner*s Engineer shall submit to the Village Engineer a separate set of drainage plans showing existing and

proposed drainage patterns, flow rates and storage volumes. This document will be signed and stamped by the Owner's Engineer certifying that the proposed development will not adversely affect any downstream properties with either a greater runoff volume or a higher runoff velocity than is currently existing.

- (4) Material and construction specifications for all drainage projects (i.e., pipe, culverts, seed, sod, etc.) shall be in compliance with specifications provided by the Village Board or Village Engineer.

- (c) GRADING. The Owner shall grade each subdivision in order to establish street, block and lot grades in proper relation to each other and to topography as follows:

- (1) The Owner shall grade the full width of the right-of-way of all proposed streets in accordance with the approved plans.
- (2) Block grading shall be completed by one or more of the following methods:

- a. A ridge may be constructed along the rear lot lines which provides for drainage onto the streets.
- b. Parts of all lots may be graded to provide for drainage to the street or to a ditch along the rear lot line,
- c. Draining across rear or side lot lines may be permitted provided that drainage onto adjoining properties is skillfully controlled.

- (3) Lot grading shall be completed so that water drains away from each proposed building at a minimum grade of two (2%) percent and provisions shall be made to prevent excessive drainage onto adjacent properties.
- (4) The topsoil stripped by grading shall not be removed from the site and shall be uniformly spread over the lots when rough grading is finished.

- (d) DRAINAGE SYSTEM REQUIREMENTS, The Owner shall install all the storm drainage facilities indicated on the plans required in Subsection (a) of this Section.

- (1) Street Drainage. All streets shall be provided with an adequate storm drainage system. The street storm system shall serve as the primary drainage system and shall be designed to carry street, adjacent land and building storm water drainage. No storm water shall be permitted to be run into the sanitary sewer system within the proposed subdivisions.

- (2) Off-Street Drainage. The design of the off-street drainage system shall include the watershed affecting the subdivision and shall be extended to a watercourse or ditch adequate to receive the storm drainage. When the drainage system is outside of the street right-of-way, the Owner shall make provisions for dedicating an easement to the Village to provide for the future maintenance of said system. Easements shall be a minimum of twenty (20) feet,

but the Village may require larger easements if more area is needed due to topography, size of watercourse, etc.

- (e) PROTECTION OF DRAINAGE SYSTEMS. The Owner shall adequately protect all ditches to the satisfaction of the Village Engineer. Ditches and open channels shall be seeded, sodded or paved depending upon grades and soil types. (Generally ditches or channels with grades tip to one [1%] percent shall be seeded; those with grades up to four [4%] percent shall be sodded and those with grades over four [4%] percent shall be paved.)

SEC. 10-3-10 **EXTRA-SIZE OR OFF-SITE IMPROVEMENTS.**

- (a) DESIGN CAPACITY. All improvements shall be installed to satisfy the service requirements for the service or drainage area in which the subdivision is located and the improvements shall be of sufficient capacity to handle the expected development of the overall service or drainage area involved.
- (b) EXTRA-SIZE IMPROVEMENTS. Where improvements in excess of the size needed to serve just the proposed subdivision are required, the Owner shall pay for the total cost of improvements Owner is required to install to serve Owner*s subdivision. The additional costs which result from the extra-size improvement shall be paid for by the Village. Thus, when conditions within the whole drainage area will require an eighteen (18) inch sanitary sewer, for example, and a twelve (12) inch sewer will adequately serve the subdivision involved, the Owner shall construct the eighteen (18) inch utility and bill the Village for the difference in material costs between a twelve (12) inch and eighteen (18) inch sewer pipe.
- (c) OFF-SITE EXTENSIONS. When streets or utilities are not available at the boundary of proposed subdivision, the Village, or its duly authorized representative, shall require, as a prerequisite to approval of a final plat, assurances that such improvement extensions shall be provided as follows:
 - (1) Extensions of utilities onto the property involved shall be adequate to serve the total development requirements of the service or drainage area. Utilities leaving the property shall be constructed in such a manner as to make their extension practical for servicing the adjacent areas of the service or drainage area.
 - (2) If the Village, or its duly authorized representative, find that extensions across undeveloped areas would not be warranted as a special assessment to the intervening properties or as a governmental expense until some future time, the developer shall be required, if he wishes to proceed with the development, to obtain necessary easements or rights-of-way and construct and pay for such extensions. Such improvements shall be available for connections by Owners of adjoining land and the Owner may contract with

adjacent property owners and/or owners of adjacent land for reimbursement of the oversize and/or off-site improvements constructed.

- (d) Where sanitary sewer lift stations and force mains are required to lift sewage to the gravity system in, the Owner shall have plans, profiles and specifications prepared for the installation of such facilities. The installation, inspection supervision and engineering fees for lift stations and/or force mains shall be paid for by the Owner unless otherwise determined and agreed upon by the Village Board.

SEC. 10-3-11 **NON-RESIDENTIAL SUBDIVISIONS.**

(a) GENERAL.

- (1) If a proposed subdivision includes land that is zoned for commercial or industrial purposes, the layout of the subdivision with respect to such land shall meet such provisions as the Village may require.
- (2) A non-residential subdivision shall also be subject to all the requirements of site plan approval set forth in the Zoning Code. A non-residential subdivision shall be subject to all the requirements of these regulations, as well as such additional standards required by the Village, and shall conform to the proposed land use standards established in the Village Master Plan and Zoning Ordinance.

(b) STANDARDS. In addition to the principles and standards in these regulations, which are appropriate to the planning of all subdivisions, the Owner shall demonstrate to the satisfaction of the Village that the street, parcel, and block pattern proposed is specifically adapted to the uses anticipated and takes into account other uses in the vicinity. The following principles and standards shall be observed:

- (1) Proposed industrial parcels shall be suitable in area and dimensions to the types of industrial development anticipated.
- (2) Street rights-of-way and pavement shall be adequate to accommodate the type and volume of traffic anticipated to be generated thereupon.
- (3) Special requirements may be imposed by the Village with respect to street, curb, gutter and sidewalk design and construction.
- (4) Special requirements may be imposed by the Village with respect to the installation of public utilities, including water sewer and storm water drainage.
- (5) Every effort shall be made to protect adjacent residential areas from potential nuisance from a proposed commercial or industrial subdivision, including the provision of extra depth in parcels backing up on existing or potential

residential development and provisions for permanently landscaped buffer strip when necessary.

- (6) Streets carrying non-residential traffic, especially truck traffic, shall not normally be extended to the boundaries of adjacent existing or potential residential areas.

SEC. 10-3-12
IMPROVEMENTS.

REQUIREMENTS AND DESIGN STANDARDS FOR PUBLIC

- (a) IMPROVEMENTS COMPLETED. All improvements required under this Chapter shall be constructed in accordance with its provisions prior to filing the final plat with the Village Administrator for approval by the Village Board. In lieu of construction of any of the public improvements, the Owner may furnish a Letter of Credit as provided in Subsection (b) of this Section.
- (b) FINANCING. Before a Final Plat is approved by the Village Board, the Owner shall submit an agreement and Letter of Credit or cash escrow agreement to assure the following:
 - (1) The Owner shall pay for the cost of all improvements required in the subdivision by the Village Board.
 - (2) Guaranteed completion of the required improvements within a two (2) year period.
 - (3) Payment by the Owner for all costs incurred by the Village for review and inspection. This would include preparation and review of plans and specification by the Engineer, Planner and Attorney, as well as other costs of a similar nature including Commission and Board Meeting fees.
 - (4) The Village may elect to install any of the required improvements under the terms of a cash escrow agreement.
 - (5) The performance bond or cash escrow agreement shall be equal to one and one-quarter (1-1/4) times the Village Engineer's estimated cost of the required improvements.
 - (6) If the required improvements are not complete within the two (2) year period, all amounts held under the escrow agreement or Letter of Credit shall be turned over and delivered to the Village and applied to the cost of the required improvements. Any balance remaining after such improvements have been made shall be returned to the Owner. The Village Board at its option, may extend the bond period for an additional period not to exceed two (2) years.
- (c) PROCEDURE.
 - (1) Plans and Specifications. After approval by the Village Board of the Preliminary Plan the Owner shall submit to the Village Engineer four (4) copies of the Final Plans, Specifications and Final Plat for review and recommendation to the Plan Commission. Included as part of the Final Plans submittal will be paving design calculations, storm water runoff calculations, water main sizing calculations, Engineer's Cost Estimate including quantities, evidence of

capacity to provide a letter of credit and any other information requested by the Village Engineer during the review of the preliminary plan.

- (2) Action by the Village Engineer. The Village Engineer shall review or cause to be reviewed the plans and specifications for conformance with the requirements of this Chapter. If he rejects the plans and specifications, he shall notify the Owner, who shall modify the plans or specifications or both accordingly. When the plans and specifications are corrected, the Village Engineer shall approve them in writing and so notify the Plan Commission so that it may approve the plans and specifications for transmittal to the Village Board. The Village Board shall approve the plans and specifications before the improvements are installed. The costs associated with the review of the plans and specifications by the Village Engineer shall be charged back to the developer. (01-21-03)
- (3) Construction and Inspection.
 - a. Prior to starting any of the work covered by the plans approved above, written authorization to start the work shall be obtained from the Village Engineer upon receipt of all necessary permits and in accordance with the construction methods of Subsection (k) below. Specifically included as required for approval to start work are all permits for Sanitary and Water extensions as required by the DNR and either a NOI for erosion control or a letter signed and stamped by the Owner's Engineer that the project does not require a NOI.
 - b. Construction of all improvements required by this Chapter shall be completed within two (2) years from the date of approval of the preliminary plat by the Plan Commission, unless good cause can be shown for the Village President and Village Board to grant an extension.
 - c. During the course of construction, the Village Engineer shall make such inspections as he deems necessary to insure compliance with the plans and specifications as approved. The Owner shall pay the actual cost incurred by the Village for such inspection. This fee shall be the actual cost to the Village of inspectors, engineers, and other parties necessary to insure satisfactory work. It is the responsibility of the Owner to ensure that the Village Engineer is fully informed of the construction schedule and is notified prior to any work starting.
- (4) "As-Built" Plans. After completion of all public improvements and prior to final acceptance of said improvements, the Owner shall make or cause to be made a map showing the actual location of all valves, manholes,

stubs, sewers and water mains, and such other facilities as the Village Engineer shall require. This map shall be in black pencil on tracing paper and shall bear the signature and seal of a professional engineer registered in Wisconsin. The presentation of the map shall be a condition of final acceptance of the improvements and release of the bond assuring their completion. This shall specifically include electronic CADD Files of all project documents including Final Plans, As-Built Plans, Specifications, and Final Plat. CADD files will be provided either in DGN or DXF File Format. Project Documents will be provided in WordPerfect Version 7 or 8. Final CADD drawings will be three dimensional. Roadways and utilities will be drawn at their correct elevation and location. Plan and profile sheets are not required with approval from the Village Engineer.

(d) REQUIRED IMPROVEMENTS: Adopted 10-15-02

(1) The Developer shall install all improvements as shown on the Final Plans and as specified in the approved specifications. All required improvements shall meet Specifications for Sewer and Water Construction in Wisconsin, the latest edition. Other items listed in this specification are exceptions to the Standard specifications and take precedent over it.

a. Concrete and Bituminous Pavement Removal and Disposal and Concrete Sidewalk Removal and Disposal: The bid price for improvements shall include the removal and disposal of concrete pavement, bituminous pavement, sidewalk and driveways. All excavated areas in the roadways shall immediately be patched with cold mix and maintained by the contractor until the permanent surface has been installed.

b. Temporary Water Service: Under no circumstance shall any customer be on "temporary" water service for more than 7 calendar days. Failure to comply with this provision will result in a \$200 per day liquidated damages provision being invoked. The Contractor shall note that customers cannot be removed from temporary service and hooked onto the new water main until a bacteriological safe sample has been obtained. This test takes 24 hours. The Contractor shall adjust his work forces and employ whatever construction practices and methods that are required to insure completion within the above time constraints.

c. Replacement of Street, etc.: Responsibility for street resurfacing, sidewalk and driveway replacement, and lawn restoration may vary from location to location. The responsibility is indicated on each drawing. The cost of resurfacing, replacing, and restoring is not

to be included in the cost of installing the water main; the cost should be included as a separate bid item. New streets shall be asphaltic concrete with open graded base course and compacted base course materials. All curb and gutter shall be barrier type concrete curb and gutter. Streets shall be cross slopes at two (2%) percent from the crown to the front of the curb and gutter.

- d. Videotaping: The contractor is responsible for videotaping all streets, driveways, sidewalks, terraces and curbs before beginning work. Each property shall be identified by voice on the tape. The tape shall be made available to the Village of Pardeeville to resolve disputes.
- e. Sanitary Sewer and Storm Sewer: (Amended 10-21-03) When it is the Village's intention to not replace any existing sanitary sewer main, sanitary sewer laterals, storm sewer main, or catch basin leads, the Contractor must protect these pipes. When working near these existing pipes, the Contractor shall exercise care and use the construction methods necessary to insure these pipes are not damaged. These mains are typically vitrified clay pipe or concrete pipe and the sewer laterals are 4-inch vitrified clay. Typically these pipes have been bedded and backfilled with the excavated clay material. The contractor shall notify DPW of any damage to, removal of or undermining of any sewer main or lateral. The contractor is responsible for all repairs to these facilities. All existing sewer pipes that are located less than twenty four (24) inches vertically or horizontally from any part of the excavation shall be exposed and physically examined to determine if they have been damaged. Exposure shall be done by "pot holing", hand excavation or other methods approved by the Engineer. New installations of sanitary sewer systems will contain concrete manholes and PVC piping. All piping will be a minimum of eight (8") inches in diameter and all manholes will be a minimum of four (4') feet. Sanitary laterals will be PVC with a minimum diameter of four (4") inches. All new streets will have storm sewers including curb inlets and storm water manholes in the paved street. Storm sewer construction shall be all concrete except for frames and grates which will be steel.
- f. Extended Warranty: The normal one (1) year guarantee period shall be extended an additional one (1) year for a total of two years to cover the possible defects or damage to any of the sewer pipes or laterals resulting from the contractor's excavation,

backfilling, compaction or other work.

(2) WATER MAIN MATERIALS, INCLUDING ALL VALVES & HYDRANTS

- a. Ductile iron Pipe: Water main shall be ductile iron and a minimum of eight (8") inches in diameter, unless stated otherwise. Water mains equal to or less than ten (10") inches in diameter are not considered as oversized for purposes of recapture of costs from the Village. The pipe shall be standard cement lined water main pipe meeting the latest edition of AWWA specifications C-151 and shall be ANSI Thickness Class 50 for 12 inch, 14 inch and 16 inch pipe and ANSI Thickness Class 52 for 6 inch, 8 inch and 10 inch pipe. Pipe installed through or under a river or slough shall be Class 56 with ball and socket joints. Pipe based on Failure Pressure Class may be substituted for pipe based on ANSI Thickness Class. However, in no circumstances may the wall thickness of the pipe based on the Failure Pressure Class be less than the wall thickness of the pipe based on the ANSI Thickness Class. The minimum failure pressure to be used is 350 psi. All lengths of water main pipe shall be the "push-on" rubber gasket joint type unless otherwise identified on the drawings. Mechanical joints shall be used on all valves, fittings and where ordered by the Director of Public Works. All joints shall be constructed in accordance with the latest edition of AWWA specifications C-111. All installation and construction methods shall be in accordance with the latest edition of AWWA specification C-600. Gaskets in areas with low levels of petroleum contamination should be "nitro". Gaskets in areas with high levels of petroleum contamination should be "viton". If either of these types of gaskets is needed they will be identified on the drawing. If contaminated soils are not identified on the drawings but are found in the field, a gasket change may be necessary. All ductile iron pipe and fittings shall be wrapped in a polyethylene bag. They shall be taped at three foot intervals and both sides of the joint as outlined in the DIPRA installation guide.
- b. Nuts and Bolts: All mechanical joint fittings shall be supplied and installed with "Core-10" or equal nuts and bolts.

All road boxes shall be backfilled with bedding material or select backfill material,

from the bottom of the valve to within 4" of the finished elevation of the road box. Select backfill shall extend a minimum of 6" beyond the outside diameter of the road box. The road boxes shall be wrapped in polyethylene.

Valve box adaptors shall be installed on all valves. The adaptors shall be those manufactured by Adaptors, Inc.

- e. Thrust Blocking: The Contractor is responsible for providing all blocking for fittings and hydrants, as needed. Poured concrete is to be used for the blocking. Wood is not to be used for blocking or supporting of water main or fittings. All temporary supports are to be removed before backfilling. Mechanical joint restraint connections such as megalug and EBAA IRON 2000PV may be used. If they are, the contractor is responsible for insuring that a sufficient number of pipe lengths are tied together to provide adequate protection against thrust.
- f. Hydrants: The Contractor shall furnish and install all hydrants. All hydrants shall be 6" mechanical joint Waterous WB67 Pacer hydrants, or Clow Medallion with a 5 1/4" valve opening, 16" break away section, 2 - 2 1/2" nozzles, 1 - 4 1/2" steamer nozzle and a national Standard bronze valve seat that screws into a bronze insert. The hydrant shall be designed such that the distance from finished ground grade to the centerline of the nozzle is 19 3/8". All hydrants shall be designed to allow for a 7 1/2 foot trench depth (7feet of cover over the top of the 6" hydrant lead). All hydrants shall be painted red. All paint materials and workmanship shall be approved by the Director of Public Works. The Contractor shall be responsible for preparing and "touching up" all paint chips and scratch marks. All exterior bolts buried below ground surface shall be hardened "Core-10" or approved equal. The 6" hydrant lead shall be furnished and installed by the Contractor and shall be included in the bid price per hydrant. The hydrant lead shall be ductile iron pipe that is corrosion protected with polyethylene wrap. All hydrant leads shall include a 6-inch resilient seated, wedge valve (as specified in # g below). All leads shall be connected to the main with an anchoring tee.
- g. Valves: For all 4", 6", 8"and 10" valves, the

Contractor shall furnish and install approved, resilient seated, wedge valves conforming to the latest revision of AWWA standard specification C-509, and furnish and install the specified valve road box. The only acceptable valves shall be those manufactured by Mueller, Clow or any equal approved valve meeting the following specifications: all exterior bolts shall be hardened "Core-10" or approved equal. Wedge shall be constructed of ductile iron, fully encapsulated in synthetic rubber except for guide and wedge nut areas. Wedge rubber shall be molded in place and bonded to the ductile iron portion, and shall not be mechanically attached with screws. Rivets, or similar fasteners. Wedge shall seat against seating surfaces arranged symmetrically about the centerline of the operating stem, so that seating is equally effective regardless of direction of pressure unbalance across the wedge. All seating surfaces in body shall be inclined to the vertical at minimum angle of 327 degrees (when stem is in vertical position) to eliminate abrasive wear of rubber sealing surfaces. Stem shall be sealed by at least two O-rings; all stem seals shall be replaceable with valve open and subjected to full rated pressure. Waterway shall be smooth and shall have no depressions or cavities seat area where foreign material can lodge and prevent closure or sealing. Valve body and bonnet shall be ductile iron and coated inside and out with a fusion bonded epoxy, which meets or exceeds the latest edition of AWWA C-550 Standards for Protective Interior Coatings For Valves & hydrants. All 12" and 16" valves shall be offset butterfly valves in conformance with the latest edition of AWWA C-504. The Water Utility shall approve the manufacture and design. The Contractor shall obtain approval prior to supplying these 16" valves. All exterior bolts shall be hardened "Core-10" or approved equal.

- h. Water Services: The Contractor shall furnish all workmanship and material, make the tap and completely install 1" or 1 ½" copper water services to each lot. The Contractor shall be responsible for bidding the cost of installation and all materials as a lump sum bid price for short and for long service laterals. Material shall be as follows:

Corporation	1"	McDonald	#4701T
	1 ½, 2"	McDonald	#4001-B-ZZ
Curb Stops		McDonald	#6100-22
Curb Boxes		McDonald	#5601-7' with 48"Stainless steel rod
Copper	1", 1 ½", 2"		Type K

The Contractor shall obtain written permission from the Public Works Director if he wishes to substitute for any of the above-specified material with other manufacturer's material. The water service may be installed in the same trench as the sanitary sewer lateral. The Director of Public Works shall approve all workmanship, material, bedding and cover material and backfilling. The service shall be wrapped in polyethylene from the water main, including the corporation stop, to the curb stop. The curb stop shall equal the size of the copper installed from the main to the curb stop not the size of the service from the curb stop to the property.

(1" copper = 1" Curb Stop, 1.5" copper = 1.5" curb stop)

Ductile water main shall never be dry tapped; always wet tapped. After they have been installed, leave the corporation stops or curb stops turned off until a safe sample has been obtained. For curb boxes in the terrace, use the McDonald #5601-7. For curb boxes in concrete or asphalt use the McDonald #5601-7 with cement cap.

- i. Pipe Insulation: The contractor shall have on the job site sufficient quantities of approved 1" and 2" thick 4' x 8' sheets of rigid extruded polystyrene insulation (Dow "blue board" or equal) to insulate water mains and services where required. In general, where water mains have less than 6' of cover 2" of insulation shall be required above the pipe. Where water mains cross over storm sewers, insulation will be placed both below and above the water main as directed. Where directed, the Contractor shall enclose the water main in a "box" of insulation. Workmanship and material shall conform to Chapter 4.7.0 of the latest edition of Wisconsin Standard Sewer and Water Specifications.
- j. High Density Polyethylene Pipe (HDPE): If High Density Polyethylene Pipe is specified, the pipe shall be in conformance with the latest edition of AWWA C906. The pipe shall have a maximum SDR of 11.0 and have a nominal outside diameter equal to the outside diameter of the ductile iron pipe it is replacing. The pipe joints shall be butt fused. HDPE pipe shall never be used in petroleum contaminated soils. If contaminated soils are identified in the field, a change order may be issued to change the pipe type. Fittings shall be made from material meeting the same requirements as the pipe. Polyethylene fittings shall be molded or fabricated by the manufacturer of the pipe. Where applicable, the fittings shall meet the requirements of AWWA C906. Molded fittings shall be manufactured

in accordance with ASTM 3261. The HDPE pipe shall be connected to the adjoining pipe using mechanical joint adapters specifically designed for use with HDPE and the adjoining pipe material. The material used in the production of the pipe and fittings shall be PE3408 High Density Polyethylene meeting ASTM D3350 cell classification of

345434c. The National Sanitation Foundation shall approve the material. The manufacturer shall certify that the materials used meet the requirements of this specification.

- k. Lead Joints: Lead joints or pipe may not be used on water main or services.

(3) WATER MAIN INSTALLATION

- a. Excavated Materials: The Contractor shall be responsible for disposing of excavated material.
- b. Traffic Control and Enforcement: The Contractor shall provide traffic control in the area where he is working and has completed work. There may be other utilities working in the same area. Traffic control must be coordinated with the other utilities. The Contractor shall, upon completion of the work for each day, provide residents access to their driveways. The contractor must also provide access to all intersections at night. The intersections must be properly signed for safety hazards. One lane traffic in each direction shall be maintained at night and over weekends. When working in a block, traffic in both directions can be closed. No more than two blocks can be closed at a time. Because of threat of liability claims and insurance premiums, the Contractor shall note that those sections of the Village of Pardeeville's Standard Specifications pertaining to public safety, barricades, and traffic control, will be strictly enforced. If traffic control and safety are not adequate, the Village may hire someone to provide adequate traffic and safety control and bill the Contractor.
- c. Tie-in Existing Pipe: When new water mains, or relayed mains, are to be connected into existing mains by means of mechanical joint fittings such as solid sleeves, duo sleeves, cutting-in-sleeves, tees and crosses, it shall be the Contractor's responsibility to furnish and have on the job site all required fittings that are compatible with the existing pipe. The Water Utility shall approve all fittings used in all connections. No existing water main shall be put out of service and sawed or snapped until the correct fittings and sleeves are on the job site. It shall be the contractor's responsibility to verify the OD of

existing water mains or have on site sufficient quantity and type of fittings necessary to complete the mechanical joint water main connections as directed. All labor and material costs associated with providing the required fittings shall be the responsibility of the contractor. Whenever a tie in involves service outages to customers, the contractor shall keep working until the customer has their service back on.

- d. Water Main Offsets: When the water main is to be dipped under the storm sewer main and/or the sanitary sewer main, gas main or other obstructions the contractor shall have the option of using rodded offsets, rodded bends, "cracking" water pipe joints, or a combination of the above methods. Water main joints shall not be "cracked" and the pipe shall not be dipped under conflicting utilities in areas where the resulting depth of water main would result in valves being more than 7.5 feet deep or hydrants more than 7.5 feet deep unless designed as such, or written approval is first obtained from the Director of Public Works. Whenever conflicts with other pipes or obstructions are anticipated, the contractor shall plan in advance and excavate at the point of conflict to determine the elevation of the existing pipe or conflict far enough in advance of his pipe laying operation in order to begin "cracking" joints of the water main and thus avoiding the conflict.
- e. Water Main Trench Depth: Water Main shall be installed as shown on drawings. Wherever possible, a minimum cover from the top of pipe to the finished grade of 6 feet shall be maintained. When crossing a river or slough, the water main is to have a minimum cover below the river or slough bottom of 2 feet.
- f. Disinfection: It is of the utmost importance that the Contractor employ whatever construction methods and techniques are necessary to insure that all mains pass the bacteriological test the first time tested. Failure to pass the bacteriological test will result in unnecessary lengths of time in which customers will be connected to temporary water services.
- g. Hydrostatic Testing: The Contractor shall be responsible for hydrostatic testing of all water main and fittings installed. The test shall be performed at 150 psi for a minimum of 2 hours. A leakage test may be performed at a minimum of 100 psi for a minimum of one hour. All test corporations not located in manholes must be removed after successful testing, and replaced with brass corporation stop plugs.
- h. Boring Under Trees: The Contractor shall tunnel, bore

or "rat hole" under large trees to prevent excessive damage to the tree's roots. The length of bore shall vary, but in general, shall extend 2 feet on each side beyond the diameter of the trunk (i.e., a 3 foot diameter tree will require a 7 foot bore).

i. Protection of Trees: Trees shall be protected as follows:

2. To prevent excessive root damage, all roots exposed in the trenches shall be carefully "root pruned" as directed.

3. All trees in the immediate area of construction shall be wrapped with wood snow fence to protect the trunk's bark from damage resulting from accidentally being hit by equipment. Wrapping shall be done as directed.

4. Where directed, the Contractor shall use a small rubber-tired backhoe to excavate in tight areas next to trees.

5. The Contractor shall use extreme care and adjust his operation such that damage to limbs is minimized. Under no circumstances shall limbs be haphazardly broken off. All damaged limbs shall be trimmed and pruned by a professional tree nurseryman. All costs associated with this work shall be the responsibility of the Contractor.

6. It is almost impossible to place a value on some of these trees. The Contractor shall protect them from damage. Damage to these trees will be charged back to the Contractor and it could conceivably be very expensive. The Contractor is advised to exercise extreme care.

7. Any small bushes in the area of the work may be dug up and transplanted after the water main is backfilled.

j. Street Light Poles, Railroad Signals, Street Signs and Traffic Signals: These items if existing, will require temporary support while trenching next to them. These poles and standards shall be backfilled with bedding material and firmly compacted to prevent the poles and standards from tipping. Contact the City Public Works Department for location of underground electric wires for the decorative streetlights and wiring for traffic signals. New street lamps will be installed by the Developer. New street signs will conform to existing street signs in appearance and signage.

k. Sidewalk Installation: Sidewalks are required on both sides of the street. All sidewalk panels will be five

(5') feet wide by five (5') feet long with a thickness of four (4") inches except driveway approaches where a minimum thickness shall be six (6") inches with a compacted base not less than four (4") inches thick.

1. Ductile iron Pipe Installation: All ductile iron water pipe in roadways or under sidewalks or driveways shall be backfilled with 3/4 inch clear stone, which is thoroughly worked and compacted around the pipe haunches, to six (6) inches over the top of the pipe. Granular backfill meeting the approval of the Director of Public Works and the requirement of Section 6.43.4 GRANULAR BACKFILL of the Standard Specifications for Sewer & Water Construction in Wisconsin, shall be used above the 3/4" clear stone level. The initial lift shall be one (1) foot over the top of the pipe prior to mechanical compaction. Each subsequent compacted lift of granular backfill shall be six (6) inches. Under roadways, sidewalks, driveways or aprons, the top twelve (12) inches shall be compacted 3/4 inch crusher run. Compaction shall achieve a uniform consolidation of the fill material and a minimum of 95% Standard Proctor Density. The Contractor shall provide the Engineer:

1. The results of a Standard Proctor Test (ASTM D698, AASHTO T99) Moisture Density Relationship of compacted soils run by a certified laboratory, on each block of construction.
2. A laboratory sieve analysis for each 1000 cubic yards of the granular backfill material, verifying the material meets the specification.

Ductile iron water main installed in future specified grass areas shall be backfilled per above except that excavated material may be used from the 3/4" clear stone to a point 12 inches from final grade. The top twelve (12) inches shall be topsoil. If restoration of the lawn is identified on the drawings, as the responsibility of the contractor, the seed type and spreading density are to be as shown in the Standard Specifications for Sewer and Water Construction in Wisconsin. The Contractor may use sod, if so desired.

- m. Installation of HDPE Pipe: If HDPE is to be used to cross a waterway; weights shall be used to keep the pipe submerged until the final backfill is placed. Bedding, haunching, initial backfill, and the final backfill outside of the waterway limits shall be in accordance with the recommendations of the pipe manufacturer. The final backfill in the waterway limits shall be as described on the drawings.
- n. Abandonment of Water Utility manholes: for manholes

that are to be abandoned, remove the first three feet of the manhole. The manhole must be filled with 3/4 inch crusher stone and backfill compacted to 95% Standard Proctor Density. The stone shall be placed in six-inch lifts to the top of the manhole

- o. Abandonment of Road Boxes: Remove the top section of the road box. Backfill with 3/4 inch crusher stone and compact to 95% Standard Proctor Density.
- p. Abandonment of Hydrants and Leads: If the hydrant lead is connected to the active water distribution system, disconnect the lead and plug both the active water main and the lead, with mechanical tee plugs. If the lead is connected to the water main that is to be abandoned, see "abandonment of water main" below. In either case, remove the hydrant and plug the lead at the hydrant. Return the hydrant to the Water Utility. Backfill with 3/4 inch crusher stone, and compact to 95% Standard Proctor Density.
- q. Abandonment of Water Main and Valves: After new water main is installed and services have been transferred to the new water main, abandon the existing water main. Plug the old water main and the existing water main with mechanical plugs. Backfill with 3/4 inch crusher stone, and compact to 95% Standard Proctor Density.
- r. Abandonment - General: For all abandonment's, use mechanical plugs. Remove all lead fittings in active water main and replace with mechanical fittings or sleeves. Size and style of bulkheads are the responsibility of the contractor. Wood may not be used as a bulkhead material.
- s. Abandonment of Services: Existing services cannot be abandoned until new services are installed and usable. If the abandoned service is connected to a live water main, shut the corporation stop on the abandoned service, and disconnect at both the curb stop and the corporation stop. If the abandoned service is connected to an abandoned water main, disconnect the service at the curb stop. Backfill with 3/4 inch crusher stone, and compact to 95% Standard Proctor Density.

t. Wisconsin Department of Natural Resources: All water main shall be installed in accordance with the requirements of the Wisconsin DNR as described in NR811.61-811.77.

- (e) OTHER UTILITIES. No electrical or telephone service shall be located on overhead poles except where impossible due to exceptional topography or other physical barrier. Plans indicating the proposed location of all gas, electrical power and telephone distribution and transmission lines required to service the plat shall be included as part of the Final Plan submission.

- (f) MATERIAL STANDARDS. All improvements constructed under this Chapter shall be of the standards, where applicable, established by the "Wisconsin Standard Specification", WisDot Standard Specifications or as approved by the Village Engineer.
- (g) STORM WATER DRAINAGE FACILITIES. Pursuant to sec. 10-3-9, the Owner shall provide storm water drainage facilities which shall include curb and gutter, catch basins and inlets, and storm sewers, as may be required. All such facilities are to be of adequate size and grade to hydraulically accommodate the one hundred (100) year storm. Storm drainage facilities shall be so designed as to present no hazard to life or property, and the size, type and installation of all storm water drains and sewers proposed to be constructed shall be in accordance with the plans and specifications approved by the Village Board.

SEC. 10-3-13 **EASEMENTS.**

- (a) UTILITY EASEMENTS. The Village Board, on the recommendation of the Plan Commission and other appropriate agencies of the Village shall require utility easements for poles, wires, conduits, storm and sanitary sewers, gas, water and head mains or other utility lines. It is the interest of this Chapter to protect all established easements so as to assure proper grade, assure maintenance of the established grade, prohibit construction of permanent fences or retaining walls over underground installation and prevent the planting of trees in the easement area.
- (b) DRAINAGE EASEMENTS. Where a subdivision is traversed by a watercourse, drainage way, channel or stream:
 - (1) There shall be provided a storm water easement or drainage right-of-way conforming substantially to the lines of such watercourse and such further width or construction, or both, as will be adequate for the purpose and as may be necessary to comply with this Section; or
 - (2) The watercourse, drainage way, channel or stream may be relocated in such a manner that the maintenance of adequate drainage will be assured and the same provided with a storm water easement or drainage right-of-way conforming to the lines of the relocated watercourse, and such further width or construction, or both, as will be adequate for the purpose and may be necessary to comply with this Section.
 - (3) Wherever possible, it is desirable that drainage be maintained by an open channel with landscaped banks and adequate width for maximum potential volume of flow. In all cases, such watercourse shall be of a minimum width established at the high water mark, or in the absence of such specification, not less than thirty (30) feet.
- (c) EASEMENT LOCATIONS. Such easements shall be at least twelve (12) feet wide and may run across lots or alongside of rear lot lines. Such easements should preferably be located along rear lot lines.

Evidence shall be furnished the Plan Commission that easements and any easement provisions to be incorporated in the plat or in deeds have been reviewed by the individual utility companies or the organization responsible for furnishing the services involved.

SEC. 10-3-14 **PUBLIC SITES AND OPEN SPACES.**

- (a) PURPOSE. The requirements of this Subsection are established to insure that adequate parks, open spaces and sites for other public uses are properly located and preserved as the Village grows. It has also been established to insure that the cost of providing the park and recreation sites and facilities necessary to serve the additional people brought into the community by land development may be equitably apportioned on the basis of the additional needs created by the development. The requirements shall apply to all lands proposed for all residential development.
- (b) DESIGN. In the design of a subdivision, provision shall be made for suitable sites of adequate area for schools, parks, playgrounds, open spaces, drainageways and other public purposes. Such sites as are shown on the Village Master Plan shall be made a part of the design. Consideration shall be given to the preservation of scenic and historic sites, stands of trees, marshes, lakes, ponds, streams, watercourses, watersheds and ravines and wood land, prairie and wetland plant and animal communities.
- (c) DEDICATION.
 - (1) The Owner shall dedicate adequate developable land for the park, recreation and open space needs of the development, subject to a determination of acceptability by the Plan Commission.
 - (2) The Owner shall dedicate sufficient land area that is suitable and readily developable to provide adequate park, playground, recreation and open space to meet the needs to be created by and to be provided for the subdivision, land division, group housing project or planned community development project. A minimum of one thousand, three hundred (1,300) square feet of land in R-1 and R-2 zoning, a minimum of one thousand, one hundred (1,100) square feet of land in R-3 zoning and a minimum of seven hundred (700) square feet of land in R-4 zoning shall be dedicated for each proposed dwelling unit.
- (d) FEE IN LIEU OF DEDICATION.
 - (1) Where, in the discretion of the Planning Commission, there is no land suitable for parks within the proposed subdivision or the dedication of land would not be compatible with the Village's comprehensive development plan, or the Planning Commission determines that a cash contribution would better serve the public interest, the

Planning Commission shall recommend to the Village Board that the Owner pay a fee in lieu of making the required land dedication.

- (2) The amount of any fee imposed shall be determined as follows: the number of proposed R-1 or R-2 residential dwelling units within the development shall be multiplied by one thousand, three hundred (1,300) square feet; the number of proposed R-3 residential dwelling units within the development shall be multiplied by one thousand, one hundred (1,100) square feet; the number of proposed R-4 residential dwelling units within the development shall be multiplied by seven hundred (700) square feet; then the resulting product shall be divided by forty-three thousand, five hundred sixty (43,560) [square feet in an acre]; and the resulting quotient shall be multiplied by the fair market value of an acre of comparable land use (regulation). The fair market value shall be determined by the Village Assessor.
- (3) All funds so collected by the Village shall be deposited as "Special Fund for the Acquisition and Development of Public Sites, Recreation Areas, Open Spaces and Greenways" (Park Special Fund), and that said funds so levied and collected shall be used for such purposes at such places and in such manner as shall be approved, ordered and directed by the Village upon recommendation by the Public Works, Parks and Public Property Committee. Any and all interest accumulated upon such funds shall be added to the Special Fund and be used only for acquisition and developments for said purposes. (01-21-03)

(e) DEDICATION AND FEE.

- (1) The Planning Commission may recommend the Owner satisfy the requirements by combining land dedication with fee payments. The fee, in such cases, shall be determined by subtracting the fair market value of the dedicated land, from the total fee which would have been imposed had no land been dedicated by the Owner. The fair market value shall be determined by the Village Assessor.
- (2) Payment may be made by one of the following methods:
 - a. Lump Sum. A lump sum minus a discount of the current interest rate of the Park Special Fund on the day the Village Board accepts the final plat or on the day the certified survey is approved for recording by the Village Administrator shall be paid prior to the issuance of any building permit for a development; or
 - b. Payment of one-third (1/3) of all land dedication and fee payments.
 1. The Owner shall pay the Village 33.4% of the total fee by the date the first building permit is issued. At such time that 33.4% of the building permits are issued for the approved development or

after one (1) year from the date that the Village issued the first building permit, whichever occurs first, the Owner shall pay the second installment of 33.3% of the total fee. At such time that 66.7% of the building permits are issued for the approved development or after two (2) years from the date that the Village issued the first building permit, whichever occurs first, the Owner shall pay the final installment of 33.3% of the total fee.

2. If this method of payment is used, the outstanding balance after the first payment is made shall be charged the interest rate earned by the Park Special Fund for the period of time that the second and third installments are outstanding.
- (3) Owners shall be given the options identified above in Subsection (e)(2) except under the following circumstances:
 - a. The development is less than twenty-five (25) units;
or
 - b. No plat of subdivision or certified survey is involved in the development
- (4) In either event, the Owner will be required to pay the lump sum minus the discount (as defined above) prior to the issuance of any building permits.
- (5) All fees required by Subsection (e) shall be paid within three (3) years from the date of the issuing of the first building permit. Failure to make the proper payments as defined in either option in Subsection (e)(2) shall result in the immediate withholding of all building permits until all delinquent payments are made to the Village. The Village shall not release the developer's Letter of Credit until all fees have been paid.

(f) DEVELOPMENT OF AREA.

- (1) When park land is dedicated, the Owner is required to bring the dedicated land up to the contours established in the approved street and utility plans, top soiled with a minimum of four (4) inches of quality topsoil, seeded as specified by the Director of Public Works, fertilized with 16-6-6 fertilizer at the rate of seven (7) pounds per one thousand (1,000) square feet and mulched as specified in the Standard Specifications for Road and Bridge Construction Section 627 and 629. The topsoil furnished for the park site shall consist of the natural loam, sandy loam, silt loam, silty clay loam or clay loam humus-bearing soils adapted to the sustenance of plant life, and such topsoil shall be neither excessively acid nor excessively alkaline. Fine grading and seeding must occur within one year following issuance of the first building permit within that subdivision unless otherwise authorized by the Plan Commission.
- (2) It shall be the duty of the Village to maintain the

dedicated areas and the Owner who dedicated said land shall in no way be responsible for its maintenance or liability thereon except that said Owner shall not develop the surrounding area in a manner which would unduly depreciate the purpose, use or value of the dedicated property and except if such Owner shall reside on one of the subdivided parcels, in which case Owner shall be responsible for the maintenance of adjacent public property as may be required in other laws of the Village.

- (g) **ADDITIONAL FEE, ASSESSMENT PER UNIT.** In addition, at the time a building permit is issued for new construction of a single unit or multi-family units, a one-time per dwelling unit fee as set forth in Section 1-1-8 will be assessed for park development. These fees are to be placed in the Park Special Fund for park development. Amended 01-21-03

- (h) **DEFINITIONS.**

- (1) Subdivider. Any person, firm, partnership, corporation, association, estate, or other legal entity using land for residential development. This shall include all residential development whether or not there is an actual subdivision of land. Property which does not require subdivision but will be used* for residential development shall be included.
- (2) Fair Market Value (Market Value). The highest price in terms of money which a property will bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeable and assuming the price is not affected by undue stimulus.
- (3) Land use Regulation. Broadly, any legal restriction, such as zoning ordinances which control the uses to which land may be put. A land use regulation may include such controls as those established by restrictive covenants or by redevelopment or urban renewal plans approved by local governing bodies.
- (4) Phase. A phase ends with the completion of public improvements (as shown in the final plat documents) and a new phase begins with the start of public improvements (as shown in the final plat documents) in the portion of the plat being developed.
- (5) Public Improvements. Installation of streets, electric service, sewer and water, gas lines and telephone lines.

SEC. 10-3-15 VARIATIONS AND EXCEPTIONS.

- (a) Where the Plan Commission finds that extraordinary hardships or particular difficulties may result from strict compliance with these regulations, it may recommend to the Village Board variations or exceptions to the regulations so that substantial

justice may be done and the public interest secured, provided that such variation or exception shall not have the effect of nullifying the intent and purpose of this Chapter.

- (b) The Plan Commission shall not recommend variations or exceptions to the regulations of this Chapter unless it shall make findings based upon the evidence presented to it in each specific case that:
 - (1) The granting of the variation will not be detrimental to the public safety, health, or welfare or injurious to other property or improvements in the neighborhood in which the property is located;
 - (2) The conditions upon which the request for a variation is based are unique to the property for which the variation is sought and are not applicable, generally to other property;
 - (3) Because of the particular physical surroundings, shape or topographical conditions of the specific property involved, a particular hardship to the Owner would result, as distinguished from a mere inconvenience, if the strict letter of the regulations were carried out.
- (c) Any recommendations by the Plan Commission shall be so endorsed by the Village Administrator and transmitted to the Village Board. The Village Board, if it approves, shall do so by motion or resolution and instruct the Village Administrator to notify the Plan Commission and the Owner.

SEC. 10-3-16 **ENFORCEMENT, PENALTIES AND REMEDIES.**

- (a) VIOLATIONS. It shall be unlawful to build upon, divide, convey, record or monument any land in violation of this Chapter or the Wisconsin Statutes and no person shall be issued a building permit by the Village authorizing the building on, or improvement of, any subdivision, land division or replat with the jurisdiction of this Chapter not of record as of the effective date of this Code until the provisions and requirements of this Chapter have been fully met. The Village may institute appropriate action or proceedings to enjoin violations of this Chapter or the applicable Wisconsin Statutes.
- (b)
 - (1) Any person, firm or corporation who fails to comply with the provisions of this Chapter shall, upon conviction thereof, forfeit no less than twenty-five (\$25.00) dollars nor more than five hundred (\$500.00) dollars and the costs of prosecution for each violation and in default of payment of such forfeiture costs shall be imprisoned in the County Jail until payment thereof but not exceeding thirty (30) days. Each day a violation exists or continues shall constitute a separate offense.
 - (2) Recordation improperly made has penalties provided in Sec. 236.30, Wis. Stats.

(3) Conveyance of lots in unrecorded plats has penalties provided for in Sec. 236.31, Wis. Stats.

(4) Monuments disturbed or not placed have penalties as provided for in Sec. 236.32, Wis..Stats.

Adopted this 20th day of October, 1998

SEC. 10-3-17

CONDOMINIUMS

Adopted 09-17-02

(a) PURPOSE

(1) The Village Board finds that certain issues arise in condominium developments that require limited applicability of this chapter. The State Legislature has recognized that subdivision ordinances may apply to condominiums, but that subdivision ordinances shall not impose requirements upon condominiums that are different from those imposed on other property that is physically identical, but under a different form of ownership.

(2) This section applies to condominium developments, since condominiums involve the creation of multiple, distinct property entities or units at or near the ground surface, subject to property taxation as separate parcels, each of which may have different ownership and management. The village board determines that this makes a condominium development dissimilar, both physically and in ownership from developments in which the land and improvements are under unitary ownership, management and control.

(3) The Village Board finds that condominium developments can place impacts on community resources in the same manner as other new developments, which are characterized by the division of land into lots. These impacts include:

- a. Additional population density.
- b. Possibility of use of particular land in a manner unsuitable to the land's characteristics.
- c. Additional demands upon the Village's parks, recreation areas, utilities and schools.
- d. Additional traffic and street use.

(b) APPLICABILITY OF CHAPTER TO CONDO

(1) General Rule. Pursuant to Section 703.27(1), Wis. Stats., the sections of this chapter listed in subsection (3) below are made expressly applicable to condominium developments within the Village's jurisdiction.

(2) Certain Condominiums Excluded from General Rule. The provisions of this ordinance shall not apply to:

- a. A single principal building located on a single lot or parcel which is in compliance with the current zoning and land use ordinances and which is subsequently transformed into a condominium, without resulting in a land division.
 - b. A condominium consisting of a single principal building, which is constructed after adoption of this ordinance, is situated on a single lot or parcel, and which does not involve a division of land.
- (3) Specific sections of this chapter which apply to condominiums
- a. Sec. 10-3-1 Introduction & Purpose
 - b. Sec. 10-3-2 Definitions
 - c. Sec. 10-3-3 General Provisions

 - n. Sec. 10-3-15 Variations and Exceptions
 - o. Sec. 10-3-16 Enforcement, Penalties and Remedies

(c) ADDITIONAL REQUIREMENTS APPLICABLE TO CONDOMINIUM DEVELOPMENTS

Proposed condominium developments shall include the following provisions in addition to those otherwise required by law or ordinance:

- (1) Declarations for condominium developments consisting of an even number of unit members must include a mandatory third-party arbitration provision for conflict resolution.
- (2) Condominium Declarations shall include a voluntary termination provision that requires Village Board consent prior to termination.
- (3) All condominium developments shall include a provision for the establishment of a mandatory escrow account with sufficient funding for purposes of maintenance, repair and/or replacement of common elements.
- (4) All condominium developments shall establish a Declaration of Easements, Restrictions, Covenants and Conditions for

operation and maintenance of said units, which shall be submitted to the Plan Commission for its consideration. The Declaration must be approved by the Plan Commission before the condominium development is considered approved. After approval, the developer shall record the Declaration with the County Register of Deeds.

- (5) The owner shall be in control of all property above and below the condominium units.
- (6) All condominium owned sewer and water mains shall be installed no closer than ten feet (10') from any building.
- (7) To insure proper fire protection, the Village of Pardeeville will perform mandatory inspections and/or flushing of condominium owned hydrants for a fee of \$25.00 per hydrant.

(d) MISCELLANEOUS PROVISIONS

- (1) for purposes of this chapter, a condominium unit and any associated limited or general common elements shall be deemed to be equivalent to a lot or parcel created by the act of subdivision.
- (2) In addition to complying with other requirements hereunder, a Condominium Plat shall follow the procedure and requirements of the certified survey map procedures set forth in Section 10-3-4(a).

SEC. 10-4-1 BUILDING CODE ESTABLISHED.

- (a) TITLE. This Chapter shall be known as the "Building Code of the Village of Pardeeville" and will be referred to in this Chapter as "this Code" or "this Chapter."
- (b) PURPOSE. This Chapter provides certain minimum standards, provisions and requirements for safe and stable design, methods of construction and uses of materials in buildings and/or structures hereafter erected, constructed, enlarged, altered, repaired, moved, converted to other uses or demolished, and regulates the equipment, maintenance, use and occupancy of all such buildings and/or structures. Its purpose is to protect and foster the health, safety, and well-being of persons occupying or using such buildings and the general public.
- (c) GENERAL PERMIT REQUIRED. No building, plumbing or electrical work, building moving or razing shall be performed in the Village of Pardeeville unless a permit therefor is obtained as required in the provisions of this Chapter.
- (d) PAYMENT OF FEES. All fees shall be paid to the Clerk-Treasurer as agent for the Village Building Inspector, and no permit shall be issued until fees as prescribed by this Chapter have been paid.
- (e) PERMIT LAPSES. A building, electrical or plumbing permit shall

lapse and be void unless operations under the permit are commenced within six (6) months from the date of issuance thereof. Permit shall also lapse if work is discontinued for a period of six (6) months or more and a new permit will have to be obtained before work can be started again.

- (f) REVOCATION. If the Building Inspector shall find at any time that the above mentioned ordinances, laws, orders, plan and specifications are not being complied with, and that the holder of the permit refuses to conform after written warning or instruction has been issued to him, he shall revoke the building, electrical or plumbing permit by written notice posted at the site of the work. When any such permit is revoked, it shall be unlawful to do any further work there under until the permit is reissued, excepting such work as the Building Inspector may order to be done as a condition precedent to the issuance of the permit, or as he may require for the preservation of human life and safety or property.
- (g) REPORT OF VIOLATIONS. It shall be the duty of all police officers as well as other Village officials to report at once to the Building Inspector any building, electrical or plumbing work or sign erection which is being carried on without a permit as required by this Chapter.
- (h) RECORDS. The Building Inspector shall keep a record of all permits, fees and inspections and shall make an annual report therein to the Village Board.
- (i) SURVEY. The Building Inspector may require the builder to survey the lot being built on if corner markers are not in and lot lines cannot be accurately established without a survey. Certified surveys are required in the case of a land split.

SEC. 10-4-2

BUILDING PERMITS AND INSPECTION.

- (a) PERMIT REQUIRED. No building of any part thereof shall hereafter be erected within the Village of Pardeeville or ground broken for the same, except as hereinafter provided, until a permit therefor shall first have been obtained from the Building Inspector by the owner, or his authorized agent. The term "building" as used in this Section shall include any building or structure, and any enlargement, alteration, heating or ventilating installation, sign, building moving, building razing, or anything affecting the fire hazards or safety of any building or structure.
- (b) APPLICATION. Application for a building permit shall be made in writing upon a form furnished by the Building Inspector and shall state the name and address of the owner of the land and also the owner of the building if different, the legal description of the land upon which the building is to be located, the name and address of the designer, the use to which said building is to be put, and such other information as the Building Inspector may require.

- (c) DEDICATED STREET REQUIRED. No building permit for a residential structure shall be issued unless the property on which the building is proposed to be built abuts a street that has been dedicated for street purposes.
- (d) UTILITIES REQUIRED.
 - (1) Residential Buildings. No building permit shall be issued for the construction of any residential building until sewer, water, grading and graveling are installed in the streets necessary to service the property for which the permit is required, and a receipt for payment of electrical hookup is presented to the Building Inspector.
 - (2) Non-Residential Building. No building permit shall be issued for the construction of any building other than residential until contracts have been let for the installation of sewer, water, grading and graveling in the streets necessary to service the property for which the permit is requested.
- (e) PLANS. With such application there shall be submitted two (2) complete sets of plans and specifications, including a plot plan showing the location of the proposed building with respect to adjoining roads, highways, streets, alleys, lot lines and buildings. - (b) COMPLAINT PROCEDURE.
- (1) Complaints should be filed with the Village Clerk-Treasurer, who has been designated to coordinate Section 504 Compliance.
 - (2) A complaint should be filed in writing or verbally, contain the name and address of the person filing it, and briefly describe the alleged violation of the regulations.
 - (3) A complaint should be filed within thirty (30) days after the complainant becomes aware of the alleged violation. (Processing of allegations of discrimination occurring before this grievance procedure was in place will be considered on a case-by-case basis.)
 - (4) An investigation, as may be appropriate, shall follow a filing of a complaint. The investigation will be conducted by an appropriate person designated by the Clerk-Treasurer who should review the handicapped Requirements Handbook published by the Federal Programs Advisory Service.
 - (5) A written determination as to the validity of the complaint and description of resolution, if any, shall be issued by the designated person and a copy forwarded to the complainant no later than thirty (30) days after its filing.

Utilization of this grievance procedure is not a prerequisite to the pursuit of other remedies. However, the Village believes that resolution of the complaint will be more promptly achieved if the Village is able to provide a remedy before the complaint is brought to an external organization.

- (1) When lots within the proposed mobile home community back upon the right-of-way of an existing or proposed limited access highway or a railroad, a planting strip at least thirty (30) feet in depth shall be provided adjacent to the highway or railroad in addition to the normal lot depth. This strip shall be a part of the platted parcels but shall have the following restriction lettered on the face of the mobile home community plat: "This strip reserved for the planting of trees and shrubs, the building of structures hereon prohibited."
 - (2) Streets parallel to a limited access highway or railroad right-of-way, when intersecting a major street and highway or collector street which crosses said railroad or highway, shall be located at a minimum distance of two hundred and fifty (250) feet from said highway or railroad right-of-way. Such distance, where desirable and practicable, shall be determined with due consideration of the minimum distance required for the future separation of grades by means of appropriate approach gradients.
 - (3) Minor streets immediately adjacent and parallel to railroad rights-of-way shall be avoided, and location of minor streets immediately adjacent to arterial streets and highways and to railroad rights-of-way shall be avoided in residential areas.

SEC. 10-7-19 STREET DESIGN STANDARDS.

The design standards for streets, street intersections, and blocks shall be as specified in the Village Subdivision Ordinance.

SEC. 10-7-20 LOT SIZE AND DIMENSION.

- (a) LOT SIZE. The size, shape, and orientation of lots shall be appropriate for the location of the mobile home development and for the type of development and use contemplated. The lots should be designed to provide an aesthetically pleasing site and a proper architectural setting for the use contemplated. The density requirements of Section 10-7-13 shall be complied with.
- (b) LOT LINE DESIGN. Side lot lines shall be at right angles to straight street lines or radial to curved street lines on which the lots face. Lot lines shall follow corporate boundary lines rather than cross them.
- (c) DOUBLE FRONTAGE. Double frontage and reverse frontage lots shall be prohibited except where necessary to provide separation of

residential development from through traffic or to overcome specific disadvantages of topography and orientation.

- (d) MOBILE HOME STANDS: The mobile home stand shall be improved to provide adequate support for the placement and tie-down of the mobile home. Construction specifications of the mobile home stands shall be as determined by the Village Engineer. Anchors or tie-downs shall be provided, such as cast-in-place concrete "dead men," eyelets imbedded in concrete screw augers or arrow head anchors shall be placed at each corner of the mobile home stand and at intervals of at least twenty (20) feet. Each device shall be able to adequately sustain the weight of the mobile home, its contents and inhabitants.
- (e) DRIVEWAYS: Improved driveways should be provided on lots where necessary for convenient access to mobile homes. Such driveways shall comply with the provisions governing construction of driveways in this Code of Ordinances.
- (f) PARKING SPACES: The design criteria for automobile parking shall be based upon two parking spaces for each mobile home lot. Parking may be in tandem.
- (g) CORNER LOTS. Corner lots shall have an extra width of ten (10) feet to permit adequate setbacks from side streets.

SEC. 10-7-21 UTILITY EASEMENTS.

- (a) UTILITIES. The Village Board may require utility easements of widths deemed adequate for the intended purpose on each side of all rear lot lines and on side lot lines or across lots where necessary or advisable for electric power and communication poles, wires, conduits; storm and sanitary sewers; and gas, water and other utility lines. All utilities shall be underground unless accepted by the Village Board.
- (b) DRAINAGE EASEMENTS. Where a mobile home development is traversed by a watercourse, drainage way channel or stream, an adequate drainage way or easement shall be provided as may be required by the Village Board. The location, width, alignment and improvement of such drainage way or easement shall be subject to the approval of the Village Board; and parallel streets or parkways may be required in connection therewith. Where necessary storm water drainage shall be maintained by landscaped open channels of adequate size and grade to hydraulically accommodate maximum potential volumes of flow. These design details are subject to review and approval by the Village Board.

SEC. 10-7-22 REQUIRED IMPROVEMENTS.

- (a) SURVEY MONUMENTS. Survey monuments, street grading, surfacing, curb and gutter and sidewalks shall comply with the provisions of the Village Subdivision Ordinance.

(b) SANITARY SEWAGE DISPOSAL SYSTEMS.

- (1) The mobile home community developer shall make adequate sewage disposal systems available to each lot with the mobile home park.
- (2) Mobile home parks shall be served by public sewer facilities. The size, type, and installation of all sanitary sewers proposed to be constructed shall be in accordance with plans and specifications approved by the Village Board and the Village Engineer.

(c) STORM WATER DRAINAGE FACILITIES. The developer shall construct storm water drainage facilities, which may include curbs and gutters, catch basins and inlets, storm sewers, road ditches and open channels, as may be required. All such facilities are to be of adequate size and grade to hydraulically accommodate maximum potential volumes of flow; the type of facility required, the design criteria and the sizes and grades to be determined by the Village Engineer. Storm drainage facilities shall be so designed as to present no hazard to life or property; and the size, type, and installation of all storm water drains and sewers proposed to be constructed shall be in accordance with the plans and specifications approved by the Village Board and the Village Engineer.

(d) WATER SUPPLY FACILITIES.

- (1) The developer shall make adequate domestic water supplies available to each lot within the mobile home park.
- (2) Where public water service is available, the developer shall construct water mains in such a manner as to make adequate water service available to each lot within the mobile home community. The size, type, and installation of all public water mains proposed to be constructed shall be in accordance with plans and specifications approved by the Village Board and the Village Engineer.
- (3) If at the time of final platting, public water service is not available, but will become available within a period of five (5) years from the date of the approval of the park, the Village Board may require the developer to install or cause to be installed water laterals to the street lot line.

(e) OTHER UTILITIES.

- (1) The developer shall cause gas, electric power and telephone facilities to be installed in such a manner as to make adequate service available to each lot in the mobile home park. All new electrical distribution television cables, and telephone lines from which lots are individually served shall be underground unless the Village Board specifically allows overhead poles for the following reasons:
 - a. Topography, soil, water table, solid rock, boulders, or other physical conditions would make underground installation unreasonable or impractical; or
 - b. The lots to be served by said facilities can be served

directly from existing overhead facilities.

- (2) Plans indicating the proposed location of all gas, electrical power and telephone distribution and transmission lines required to service the mobile home park shall be approved by the Village.
- (f) STREET LAMPS. The developer shall install ornamental streets lamps along all streets proposed to be dedicated of a design compatible with the neighborhood and type of development proposed. Such lamps shall be placed at each street intersection and at such interior block spacing as may be required by the Village Engineer and Village Board.

The required trees shall be planted in accordance with plans and specifications approved by the Village Board.
- (h) EROSION CONTROL. The developer shall cause all gradings, excavations, open cuts, side slopes, and other land surface disturbances to be mulched, seeded, sodded or otherwise protected so that erosion, siltation, sedimentation and washing are prevented.
- (i) PARTITION FENCES. When the land included in the mobile home park abuts upon or is adjacent to land used for farming or grazing purposes, the developer shall erect, keep, and maintain partition fences, satisfying the requirements of the Wisconsin Statutes for a legal and sufficient fence, between such land and the adjacent land. A covenant binding the developer, its grantees, heirs, successors, and assigns to erect and maintain such fences, without cost to the adjoining property owners, so long as the land is used for farming or grazing purposes shall be included upon the mobile home development map.
- (j) STREET NAME SIGNS AND POSTS. The developer shall install or cause to be installed street name signs at all street intersections. Plans and specifications for the street name signs and posts shall be approved by the Village Board.

SEC. 10-7-23 FIRE EXTINGUISHERS REQUIRED.

Each mobile home occupied as a place of human habitation under any of the provisions of this ordinance shall be equipped with a fire extinguisher, conveniently attached thereto. Such extinguisher to be of one (1) unit of fire protection capacity, and of a type suitable for extinguishing Class A or Class B fires, approved by the Fire Department.

SEC. 10-7-24 COMPLIANCE WITH PLUMBING, ELECTRICAL & BUILDING CODES

All plumbing, electrical, building and other work done on or at any mobile home park licensed under this ordinance shall be in accordance with the ordinances of the Village of Pardeeville, and the requirements of the State plumbing, electrical and building codes and the regulations of the State Board of Health. Licenses and permits granted under this Chapter grant no right to erect or repair any structure, to do any plumbing work or to do any electrical work.

The building containing such emergency sanitary facilities shall be accessible to all mobile homes.
- (c) PERMANENT BUILDINGS.
 - (1) All portions of the structure shall be properly protected from damage by ordinary uses and by decay, corrosion, termites and other destructive elements. Exterior portions shall be of such material and be so constructed and protected as to prevent entrance or penetration of moisture and weather.

- § 10-8-10 Termination of Permits
- § 10-8-11 Preservation of Rights

SEC. 10-8-1 STATEMENT OF FINDINGS AND PURPOSE.

- (a) The Village Board finds that:
 - (1) Diminishing supplies of nonrenewable energy resources threaten the physical and economic well being of the residents of this community who presently rely on such resources to maintain their homes, industries, businesses and institutions;
 - (2) Solar energy systems hold great promise for the future energy needs of this community because they use a renewable energy resource; because they require less capital, land, water and other resources needed for central-station generation of electricity; and because they do not pollute the community's water and air; and
 - (3) The successful use of solar energy systems for such purposes as supplying space heating, water heating or the production of electricity is dependent upon sufficient access to direct sunlight.
- (b) This chapter is adopted under authority contained in sec. 66.032, Wis. Stats., for the purpose of protecting the health, safety, and general welfare of the community by:
 - (1) Promoting the use of solar energy systems;
 - (2) Protecting access to sunlight for solar energy systems; and
 - (3) Assuring that potentially conflicting interests of individual property owners are accommodated to the greatest extent possible compatible with the overall goal of this ordinance.

- (b) CONDITIONS.
 - (1) The Village Board may grant a permit subject to any condition or exemption the Village Board deems necessary to minimize the possibility that the future development of nearby property will create an impermissible interference or to minimize any other burden on any person affected by granting the permit. Such conditions or exemptions may include but are not limited to restrictions on the location of the collector and requirements for the compensation of persons affected by the granting of the permit.
 - (2) As a condition of receiving a permit, the permit holder shall be responsible for the cost of trimming [pre-existing] vegetation on property affected by the permit to prevent an impermissible interference. The permit holder shall give consideration to the desires of the property owner in trimming such vegetation and shall not unnecessarily remove vegetation which does not or will not in a reasonable period of time create an impermissible interference.

SEC. 10-8-6 APPEALS.

Any person aggrieved by a decision under this chapter may appeal the decision by making a written request to the Village Board within ten (10) days of the decision. The decision shall be reviewed by the Zoning Board of Appeals.

- (a) The Village Board shall specify the property restricted by the permit and shall prepare notice of the granting of the permit. The notice shall include the legal description pursuant to sec. 706.05(2)(c), Wis. Stats., for the property upon which the solar collector is or will be located and for any property restricted by the permit, and shall indicate that the property may not be developed and vegetation may not be planted on the property so as to create an impermissible interference with the solar collector which is the subject of the permit unless the permit affecting the property is terminated or unless a waiver agreement affecting the property is recorded under Section 10-8-9.
- (b) The applicant shall record with the register of deeds of the county in which the property is located the notice under Subsection (a) for each property specified under Subsection (a) and for the property upon which the solar collector is or will be located.
- (c) The Village Board shall note the location of any solar collector which is the subject of a permit on a map showing the location of all solar collectors for which permits have been granted and shall identify on the map all properties which are subject to restrictions resulting from the granting of a permit.

SEC. 10-8-8 RIGHTS OF PERMIT HOLDER.

The holder of a permit granted under this Chapter is entitled to access to sunlight for the solar collector subject to any conditions or exemptions in the permit and may seek damages for any loss caused by an impermissible interference or an injunction to prevent an impermissible interference as provided under sec. 66.032(7), Wis. Stats.

Erosion and Storm Water Runoff Control

- § 10-9-1 Title of Chapter
- § 10-9-2 Finding and Declaration of Purpose
- § 10-9-3 Erosion and Sedimentation Control Plans
- § 10-9-4 Prohibited Sediment Deposits
- § 10-9-5 Required Subdivision Construction Site Erosion Control
- § 10-9-6 Performance of Work by the Village

SEC. 10-9-1 TITLE OF CHAPTER.

This Chapter shall be known, cited and referred to as the "Erosion and Storm Water Runoff Control Ordinance.

SEC. 10-9-2 FINDING AND DECLARATION OF PURPOSE.

The Village finds that urbanizing land uses have accelerated the process of soil erosion, runoff and sediment deposition in the waters of the Village. Therefore, it is declared to be the purpose of this Chapter to control and prevent soil erosion and minimize storm water runoff increases and thereby to preserve the natural resources, control floods and prevent impairment of dams and reservoirs, protect the quality of public waters, protect wildlife, protect the tax base, and protect and promote the health, safety and general welfare of the people of the Village.

SEC. 10-9-3 EROSION AND SEDIMENTATION CONTROL PLANS.

- (a) MAY BE REQUIRED. Erosion and sedimentation control plans may be required by the Plan Commission before authorization of construction or installation of improvements showing those structures required to retard the rate of runoff water and those grading and excavating practices that will prevent erosion and sedimentation. Such plans shall generally follow the guidelines and standards set forth in the publication, Minimizing Erosion in Urbanizing Areas, as prepared by the U.S. Department of Agriculture, Soil Conservation Service, 1972, and the standards contained in this Chapter.
- (b) STANDARD FOR EROSION AND SEDIMENT CONTROL FOR LAND-DISTURBING ACTIVITIES. If required by the Plan Commission, plans will not be approved nor permits issued unless erosion and sedimentation leaving the site during and after the land disturbance will not exceed that which would have been eroded if the land had been

left in its undisturbed state and/or are controlled in accordance with established procedures, including, but not limited to, Minimizing Erosion in Urbanizing Areas or other technical guidelines as developed by the U.S. Department of Agriculture, Soil Conservation Service.

- (c) STANDARDS FOR ON-SITE DETENTION AND RUNOFF CONTROL FOR LAND DISTURBING ACTIVITIES. Activities subject to on-site detention and runoff control regulation under this Section shall comply with the following standards:
 - (1) The peak runoff rate after the proposed activities should not be greater than the peak rate which would have resulted from the same ten (10) year storm event occurring over the site with the land in its natural undeveloped state.
 - (2) Where on-site detention is used for runoff control, the detention facilities shall safely contain and/or safely pass the runoff of a one hundred (100) year storm of any duration.
 - (3) Determination of on-site detention volumes shall be computed by established procedures equivalent to and calibrated against that procedure promulgated by the United States Soil Conservation Service in its National Engineering Handbook or the technical publication entitled "Urban Hydrology for Small Watersheds, TR-55," and accepted by the Village Engineer.
- (d) STANDARD FOR TRACKING. For plan approval there must be adequate provisions to prevent the tracking or dropping of dirt or other materials from the site onto any public or private street.
- (e) DESIGN CRITERIA, ENGINEERING STANDARDS AND GENERAL PRINCIPLES. The person engaged in land-disturbing activities may employ structural or non-structural measures necessary to achieve all applicable standards set out in this Chapter. However, these measures will be evaluated to determine that they follow currently accepted design criteria and engineering standards. The following general principles shall be used when evaluating control plans and granting permits under this Section:
 - (1) The smallest area of land shall be exposed for the shortest period at any given time during development.
 - (2) The rough grading of the lot shall include backfilling the basement and all excess earth shall be hauled off the lot.
 - (3) Accommodation of the increased runoff caused by changed soil and surface conditions during and after development.
 - (4) Permanent, final plant covering or structures shall be installed prior to final acceptance.
 - (5) The plan of development shall relate to the topography and soils of the site so that the lowest potential for erosion is created.
 - (6) Natural plant covering shall be retained and protected and shall be deemed a dominating factor in developing the site and temporary vegetation, mulching or other cover shall be used to protect the area exposed during the land-disturbing activity.

(f) CONTENTS OF THE CONTROL PLAN. The control plan that may be required by this Section shall contain such information needed to determine soil erosion, sedimentation and runoff control:

- (1) A map of the site location showing the location of the predominant soil types.
- (2) A topographic map of the site location, including the contiguous properties, existing drainage patterns and watercourses affected by the proposed development of the site and the existing vegetative cover.
- (3) A plan of the site showing:
 - a. Name, address and telephone number of the occupant and party responsible for maintaining erosion control.

Statutory Authorization, Findings of Fact, Statement of Purpose and Title

SEC. 10-10-1 STATUTORY AUTHORIZATION.

This Chapter is adopted pursuant to the authorization in Sections 61.35, 62.23, 62.231, 87.30 and 144.26, Wis. Stats.

SEC. 10-10-2 FINDINGS OF FACT.

- (a) FINDINGS OF FACT. Uncontrolled use of the shoreland-wetlands and the pollution of the navigable waters of the Village of Pardeeville would adversely affect the public health, safety, convenience, and general welfare and impair the tax base. The Legislature of Wisconsin has delegated responsibility to all municipalities to further the maintenance of safe and healthful conditions; prevent and control water pollution; protect spawning grounds, fish and aquatic life; control building sites, placement of structures and land uses; and preserve shore cover and natural beauty.
- (b) PURPOSE. To promote the public health, safety, convenience and general welfare, this Chapter has been established to:
 - (1) Further the maintenance of safe and healthful conditions;
 - (2) Prevent and control water pollution by filtering or storage of sediments, nutrients, heavy metals or organic compounds that would otherwise drain into navigable waters and to maintain storm and flood water capacity;
 - (3) Protect fish spawning grounds, fish, aquatic life and wildlife by preserving wetlands and other fish and aquatic habitat;
 - (4) Prohibit certain uses detrimental to the shoreland-wetland area; and
 - (5) Preserve shore cover and natural beauty by restricting the removal of natural shoreland cover and controlling shoreland-wetland excavation, filling and other earth moving activities.

SEC. 10-10-3 TITLE OF CHAPTER.

Shoreland-Wetland Zoning Ordinance/Chapter for the Village of Pardeeville, Wisconsin.

SEC. 10-10-4 THROUGH SEC. 10-10-9 RESERVED FOR FUTURE USE.

ARTICLE B

General Provisions

SEC. 10-10-10 COMPLIANCE.

The use of wetlands, and the alteration of wetlands within the shoreland area of the Village of Pardeeville shall be in full compliance with the terms of this Chapter and other applicable local, state or federal regulations. (However, see Section 10-10-25 of this Chapter, for the standards applicable to nonconforming uses.) AU permitted development shall require the issuance of a zoning permit unless otherwise expressly excluded by a provision of this Chapter.

SEC. 10-10-11 MUNICIPALITIES AND STATE AGENCIES REGULATED.

Unless specifically exempted by law, all cities, villages, towns, and counties are required to comply with this Chapter and obtain all necessary permits. State agencies are required to comply if Section 13.48(13), Wis. Stats., applies. The construction, reconstruction, maintenance and repair of state highways and bridges by the Wisconsin Department of Transportation are exempt when Section 30.1 2(4)(a), Wis. Stats., applies.

SEC 10-10-12 ABROGATION AND GREATER RESTRICTIONS.

- (a) This Chapter supersedes all the provisions of any municipal zoning ordinance enacted under Section 62.23 or 87.30, Wis. Stats., which relate to shoreland-wetlands, except that where another municipal zoning ordinance is more restrictive than the provisions contained in this Chapter, that ordinance shall continue in full force and effect to the extent of the greater restrictions, but not otherwise.
- (b) This Chapter is not intended to repeal, abrogate or impair any existing deed restrictions, covenants or easements. However, where this Chapter imposes greater restrictions, the provisions of this Chapter shall prevail.

SEC. 10-10-13 INTERPRETATION.

In their interpretation and application, the provisions of this Chapter shall be held to be minimum requirements and shall be liberally construed in favor of the municipality and shall not be deemed a limitation or repeal of any other powers granted by the Wisconsin Statutes. Where a provision of this Chapter is required by a

standard in Chapter NR 117, Wis. Adm. Code, and where the Chapter provision is unclear, the provision shall be interpreted in light of the Chapter NR 117 standards in effect on the date of the adoption of this Chapter or in effect on the date of the most recent text amendment to this Chapter.

SEC. 10-10-14 SEVERABILITY.

Should any portion of this Chapter be declared invalid or unconstitutional for any reason, by a court of competent jurisdiction, the remainder of this Chapter shall not be affected.

SEC. 10-10-15 THROUGH SEC. 10-10-19 RESERVED FOR FUTURE USE.

ARTICLE C

Shoreland-Wetland Zoning District

SEC. 10-10-20 PURPOSE OF SHORELAND-WETLAND ZONING.

This Chapter is adopted to maintain safe and healthful conditions, to prevent and control water pollution, to protect fish spawning grounds, fish and aquatic life and wildlife habitat, to preserve shore cover and natural beauty and to control building and development in wetlands whenever possible. When development is permitted in a wetland, the development should occur in a manner which minimizes adverse impacts upon the wetland.

SEC. 10-10-21 OFFICIAL SHORELAND-WETLAND ZONING MAPS.

The following maps are hereby adopted and made a part of this ordinance and are on file in the office of the Clerk of Pardeeville, Wisconsin:

- (a) Wisconsin Wetland Inventory maps stamped "FINAL" on April 16.
- (b) Floodplain zoning maps titled as such and dated August 15, 1983.
- (c) United States Geological Survey maps dated September, 1984.
- (d) Zoning maps titled Zoning Code for the Village of Pardeeville and dated September 6, 1960.

SEC. 10-10-22 DISTRICT BOUNDARIES.

- (a) The shoreland-wetland zoning district includes all wetlands in the Village of Pardeeville, Wisconsin which are five acres or more and are shown on the final Wetland Inventory Map that has been adopted and made a part of this Chapter in Section 10-10-21 and which are:
 - (1) Within one thousand (1,000) feet of the ordinary high-water mark of navigable lakes, ponds or flowages. Lakes, ponds or flowages in the Village of Pardeeville shall be presumed to be navigable if they are listed in the Department publication "Surface Water Resources of Columbia County" or are shown on the United States Geological Survey quadrangle maps or other zoning base maps which have been incorporated by reference and made a part of this Chapter in Section 10-10-21 of this Chapter.
 - (2) Within three hundred (300) feet of the ordinary high-water mark of navigable rivers or streams, or to the landward side of the floodplain, whichever distance is greater. Rivers and streams shall be presumed to be navigable if they are designated as either continuous or intermittent

waterways on the United States Geological Survey quadrangle maps or other zoning base maps which have been incorporated by reference and made a part of this Chapter in Section 10-10-22. Flood Hazard Boundary Maps, Flood Insurance Rate Maps, Flood Boundary-Floodway Maps, County Soil Survey Maps or other existing community floodplain zoning maps used to delineate floodplain area which have been adopted by the Village, shall be used to determine the extent of floodplain areas in the Village.

- (b) Determinations of navigability and ordinary high-water mark shall initially be made by the Zoning Administrator. When questions arise, the Zoning Administrator shall contact the appropriate district office of the Department for a final determination of navigability or ordinary high-water mark.
- (c) When an apparent discrepancy exists between the shoreland-wetland district boundary shown on the official shoreland-wetland zoning maps and the actual field conditions at the item the maps were adopted, the Zoning Administrator shall contact the appropriate district office of the Department to determine if the shoreland-wetland district boundary as mapped, is in error. If the Department staff concur with the Zoning Administrator that a particular area was incorrectly mapped as a wetland, the Zoning Administrator shall have the authority to immediately grant to deny land use or building permit in accordance with the regulations applicable to the correct zoning district. In order to correct wetland mapping errors shown on the official shoreland-wetland zoning maps, the Zoning Administrator shall be responsible for initiating a shoreland-wetland map amendment within a reasonable period.
