

For processing cores

For collection and separation of organic material and sand.

For processing cores
For collection and separation of organic material and sand.

The CORE RECYCLER is a self-contained walking machine for collecting and processing cores. The sweeping head gently collects the cores and transfers them into 4 rotating screens, which separate the sand from the organic material (thatch). The sand is then returned to the surface and the thatch is collected into the high dump hopper. The hopper can then be dumped directly into the bed of a utility vehicle. This process saves money by re-using topdressing material and eliminates the need to run a heavy topdresser over a freshly aerified green. Plastic inserts can also be placed on the inside of the rotating screens for core collecting.

The CORE RECYCLER has a Honda engine and a hydrostatic drive. The drives of the rotating screens and the sweeping unit also function hydraulically.

An optional trailer for transporting the CORE RECYCLER with a utility vehicle is available. The trailer hydraulically tilts down for fast loading and unloading.

TECHNICAL DATA: CORE RECYCLER			
Working width in approximate inches:	48	Engine:	Honda GX390 with E- Starter
Dimensions in approximate inches L/W/H:	102"/70"/44"	Capacity:	13HP
Maximum empty weight in approximate pounds:	1150	Fuel tank approximate capacity:	1.5 gallons
Front tires:	23"x10.5"x12"	Collection container approximate maximum capacity without high lift:	16.5 cubic feet
Rear tires (dual tires):	13"x5"x6"	Collection container approximate maximum capacity with high lift:	14 cubic feet
TECHNICAL DATA: OPTIONAL TRAILER FOR CORE RECYCLER			
Dimensions in approximate inches L/W/H:	141"/73"/15"	Tires:	23"/10.5"/12"
Weight in approximate pounds:	551	Loading:	Platform tip down angle: 13°

Descriptions and illustrations are not binding. Changes in design and execution are possible.

Solutions as different as the seasons.

Whether spring, summer, autumn or winter – whether professional turf and golf course maintenance or dirt cleaning, you can rely on machines from Wiedenmann GmbH in every season.

As one of the worldwide leading manufacturers of high-quality accessory equipment for compact tractors and light municipal vehicles, we offer demand-driven solutions for turf regeneration, pick up and removal of grass and foliage, and turf sweeping.

Our workforce of 210 has regularly set new standards with regard to innovative technological solutions and uncompromising quality.
