

COLLABORATION IS  
THE CORNERSTONE  
OF OUR BUSINESS:

Having a single point of contact throughout a building project provides significant benefits to customers. Capex Solutions appoints a dedicated customer contact for every job, who comes on board from the start of the project through to handover. This approach means we build rapport with our customers, fostering a collaborative relationship of trust and mutual respect. Ultimately it results in a better understanding of our customers' requirements.

One of our key strengths is our remote area construction experience. Our personnel understand the intricacies of working in areas where minimal infrastructure and other services are available. We apply our knowledge and expertise to develop tailored project execution plans to cater to local conditions, which are then skilfully executed by our specialist teams.

# Let the experts work for you

## CONNECTING YOUR BUSINESS TO THE RESOURCES YOU NEED

Capex Solutions is servicing the mining, industrial, commercial and residential markets of Papua New Guinea. We work closely with our clients and stakeholders to produce a high quality project that is both cost effective and delivery oriented.

Capex Solutions is a Papua New Guinean, family owned company. Founding Director Wayne Uechtritz has over 20 years' experience as both a builder and company owner and his persistent and consistent pursuit of excellence has resulted in an outstanding track record for quality and integrity in the

delivery of the projects he undertakes.

Wayne was raised in Morobe Province, PNG, and has a long family history with the country dating back to 1882. He is well respected in the local community and has intimate knowledge of the intricacies of traditional cultures, languages and land histories of the region.

Our core areas of business are building and construction, civil engineering, concrete batching, civil project management and tailored mining and exploration solutions.

*"For me the basics in business do not change. Our focus is on our customers. With great people, excellent service, integrity and sound leadership, Capex Solutions has built the foundations on which our continued growth and success will stand."*

  
Wayne Uechtritz  
Founder and Director

### CONCRETE SOLUTIONS

Capex Solutions can provide a comprehensive mobile concrete batching service and can supply up to 50 cubic metres of concrete per hour. Ideal solution for site specific batching. Our mobile batch plant is compliant to mine specifications and is a fully stand-alone batch plant system.

## CAPABILITES

Capex Solutions draws on a wealth of experience from a variety of construction and development projects, working with some of Papua New Guinea's leading mining companies and high profile clients.

Capex Solution services reflect the complete project lifecycle from concept through to handover.

Key services include:

- Design and Construction
- Civil Engineering
- Marine Civil Engineering
- Mobile Concrete Batching
- Civil Project Management
- Property Maintenance and Retro Fitout
- Labour Solutions
- Plant and Equipment Hire

# flexible solutions for your capital works needs

WE PROVIDE A TOTAL END TO END SOLUTION.

## DESIGN & CONSTRUCTION SOLUTIONS

Capex Solutions provides design and construction, construction only or construction management services for a wide range of projects.

The Capex Solutions team can manage the entire building process from feasibility studies through to planning and development approvals, full detail design, drafting and architectural services to achieve the client's vision in the most cost-effective manner.

- Industrial developments and factories
- Commercial offices
- Mining infrastructure
- Domestic dwellings
- Steel and concrete structures

## PROJECT MANAGEMENT SOLUTIONS

The Capex Solutions project planning team is responsible for providing policy guidance and development, project execution, performance management and customer relations. Our team of experienced construction personnel ensures

compliance with construction projects is achieved from the outset. Working closely with our Clients and their Contractors, we provide the experience and support necessary to deliver quality outcomes through our experience and knowledge.

## PROPERTY MAINTENANCE AND RETRO FITOUTS

Capex Solutions offers part or whole refurbishment and extension projects for your properties. From small additions to multi residential unit development, we have all bases covered. We build to your tailored requirements and more importantly budget, whilst using the highest quality materials by our team of experienced tradespeople. Capex Solutions will work with you to develop the conceptual design for your office or retail space, taking into consideration everything from the planning of traffic flow, to fixture and lighting design, through to making your colour and material selections.

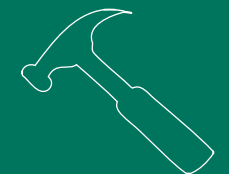

## CIVIL ENGINEERING

Our engineering staff are industry experts with vast technical competence and experience who engage with our specialist technology partners to ensure appropriate value solutions are identified and implemented on our projects.

### LABOUR SOLUTIONS

We deliver innovative workforce solutions that maximise results and minimise time to value. We have a variety of trades and managers at our fingertips to assist your needs.

### PLANT & EQUIPMENT SOLUTIONS

Capex Solutions stocks only the leading brands for plant & equipment hire. Our range is tough, reliable and ready to go. We offer simple hiring solutions with the right gear and real service.
