

National Association for Children and Safe Technology

Newsletter | July 2016

Dear Members:

We hope you are enjoying the summertime, in spite of the wireless matters we face. Children will be heading back to school soon and this is very concerning to parents who understand the health hazards from Wi-Fi exposure.

Although we see changes being implemented around the world to protect children from wireless radiation, the U.S. has not, yet, made any significant strides in legislation or policy. Please continue to inform others and call for the removal of Wi-Fi in schools.

We are looking forward to providing some more resources to help our members address these challenges in the near future. Thanks to all of you for your efforts and dedication to a healthy future for our children.
