AGENDA -- Stakeholder Meeting #1

Goal: To begin developing Active Transportation Plan for Scottdale and Smithton by:

1. Setting ground rules and expectations for the committee and plan
2. Discussing the Plan's Vision and framework
3. Introducing committee to DCNR contact and learning about Active Transportation opportunities available from DCNR
4. Identifying Destinations, Barriers, and preliminary priorities as related to Active Transportation.

Key Definitions:

Active Transportation: any self-propelled, human-powered mode of transportation, such as walking, bicycling, using a wheelchair, pushing a stroller.

Physical Inactivity: a major contributor to the steady rise in rates of obesity, diabetes, heart disease, stroke, and other chronic health conditions in the United States.

Destinations: Places people would want to go by Active Transportation. Common categories of destinations include: Schools, Parks, Groceries, Restaurants, Coffee, Bars, Shopping, Entertainment, Errands, Cultural, etc.

Barriers: Things preventing people from engaging in active transportation. Can be physical (busy road, lack of curb cuts) or social (not enough time, does not feel safe).

Agenda Items:

1. Introductions/Ground Rules	5 minutes
2. Expectations/Vision and Framework	15 minutes
3. Definition of Project Scope	15 minutes
4. Role of Project Team	10 minutes
a. Discussion of Community Input (survey, mapping, and assessments)	
b. Identify Specific Potential Improvements	
c. Identify Possible Destinations	
5. Schedule of follow up meetings/how to best meet	5 minutes
6. Closing Comments	5 minutes

AGENDA -- Stakeholder Meeting #2

Goal: To continue developing Active Transportation Plan for Scottdale and Smithton by:

1. Discussing Data Gathering for the Plan
 - a. Survey and Map sent for review - Identifying Destinations, Barriers, and preliminary priorities as related to Active Transportation
 - b. Stakeholder interviews
2. Updating the map, rolling out, posting on websites, social media, press release draft, flyers
3. Reminding of the Plan's Vision and Framework
4. Introducing committee to Southwestern Pennsylvania Commission (SPC) contact and learning about Active Transportation opportunities available from SPC

Agenda Items:

1. Greeting/Introductions	5 minutes
2. Review Survey and Map Program	15 minutes
a. Answer questions, clarify	
b. Identify Specific Potential Improvements	
c. Identify Possible Destinations/Barriers	
3. Discuss Rolling out the Survey/Map to the public	10 minutes
a. Hosting on municipal websites	
b. Press Release	
c. Social media	
d. email lists, poster/flyer, QR codes	
4. Guest Speakers:	15 minutes
Dan Carpenter – Westmoreland County Planning	
Leann Chaney – SPC

AGENDA -- Stakeholder Meeting #3

Goal: To continue developing Active Transportation Plan for Scottdale and Smithton:

1. Discuss Launch of Data Gathering for the Plan - rolling out, posting on websites, social media, press release draft, flyers
 - a. Survey and Map
2. Review Data Gathered -- Identifying Destinations, Barriers, and preliminary priorities, Stakeholder interviews
3. Additional Data for the plan – Community Evaluations
4. Introducing committee to PennDOT contact and learning about Active Transportation opportunities available from PennDOT
5. Introduce new form for requesting assistance in working with agencies

Agenda Items:

- | | |
|---|------------|
| 1. Greeting/Introductions | 5 minutes |
| 2. Discuss Launch of Survey and Map Program | 15 minutes |
| a. Hosting on municipal websites | |

AGENDA Stakeholder Meeting #6

Goal: Review and Finalize drafts of Active Transportation Plan and Complete Streets Policy for adoption by Scottdale and Smithton Councils by:

- 1 Gather input from Complete Streets Policy draft for finalizing
- 2 Review draft of Active Transportation Plan
- 3 Introduce committee to a Regional Trail Corporation committee member and learn about Active Transportation support for realizing trail network connections and hear from Westmoreland County Planner on support for projects.
- 4 Review press release & discuss ways for gathering public input on the ATP / CSP

Agenda Items:

- | | |
|---|------------|
| 1. Greeting/Introductions | 5 minutes |
| 2. Guest Speakers: | 20 minutes |
| Daniel Carpenter – Director, Westmoreland County Planning | |
| Dr. Robert Keeler – Regional Trail Corporation | |
| 3. Q&A for Daniel and Robert | 10 minutes |
| 4. Complete Streets Policy Review | 20 minutes |
| 5. Additional Data Gathering: | 10 minutes |
| a. Bike Counters | |
| 5. Active Transportation Plan | 10 minutes |
| a. Priority List (review survey results so far) | |
| b. Gathering public input for this and the Complete Streets Policy – draft press release review. Public, official advertisement also necessary? | |
| c. Adoption by councils (extension was granted) | |
| 7. Thank You all for your participation and input into these planning documents | |
| 8. Closing Comments | 5 minutes |

Smithton-Scottdale Active Transportation Plan

Metrics: Potential Linear Miles, Connected Destinations and New/Enhanced Destinations SMITHTON BOROUGH

Number of potential linear miles: For each location, please indicate: a) whether the planned/potential new/improved routes are bicycle, pedestrian (sidewalks) or otherwise; and b) the corresponding number of proposed miles. If the plan proposes two new or improved routes at the same location, the location will be listed twice; see examples, below. Add more rows as needed.

Potential Linear Miles		
Description of Location	Type of New/Improved Routes	# of Miles
Center St, between 2 nd St and Recreation Park	<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	0.20m
Route 981 route - between Recreation Park and Boat Launch Parking Area	<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	0.018m
Route 981 route - between Recreation Park and Great Allegheny Passage (GAP) Trailhead Parking area	<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	0.287m
Peer St., between 2 nd St and Recreation Park	<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	0.15m
2 nd St.	<input type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	0.30m

Number of potential connected destinations: Please specify the destinations that would be connected – i.e., destinations that shall will be connected as a result of the new/improved routes, above. The connected destinations refer to desirable, useful, and attractive places that people need to or want to go and could feasibly travel by walking, bicycling, or taking public transit for at least part of their trip. Examples include, though are not limited to: home, work, school, childcare, friend or family member’s home, grocery store, restaurant, café or bar, mall or retail center, transit station, place of worship, bank or ATM, gym or health club, senior center or community center, park, playground, trail, library, museum, arts center, doctor’s office and pharmacy. Add more rows as needed.

Type of New/Improved Routes (i.e., means to connect)	Potential Connected Destinations
<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	Smithton Borough with Smithton Boat Launch (Youghiogheny River)
<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	Smithton Borough with Great Allegheny Passage (GAP) Trail Trailhead parking area
<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	Youghiogheny River Boat with: <ul style="list-style-type: none"> - Recreation Park - Pollinator Garden - Millennium Park - Smithton Borough’s retail/business area - Smithton Borough’s retail/business area (2nd St and Peer St.)
<input checked="" type="checkbox"/> Bicycle <input type="checkbox"/> Public Transit <input checked="" type="checkbox"/> Pedestrian <input type="checkbox"/> Multi-use path (enhancement) <input type="checkbox"/> Other	Great Allegheny Passage (GAP) Trail Trailhead parking area <ul style="list-style-type: none"> - Recreation Park - Pollinator Garden - Millennium Park - Smithton Borough’s retail/business area (2nd St and Peer St.)

Smithton-Scottdale Active Transportation Plan

**Metrics: Potential Linear Miles, Connected Destinations and New/Enhanced Destinations
SMITHTON BOROUGH**

Number of potential new or enhanced sites: For each location, grant recipients will be expected to indicate what type of site is being created or enhanced. Sites include, though are not limited to: parks, playgrounds, commercial centers, mixed-use buildings, farmers’ markets, and community centers. Again, Appendix B provides definitions of all terms. Add more rows as needed.

Description of Location	Potential New/Enhanced Sites
Smithton Borough’s retail/business area (2 nd St and Peer St.)	Install and/or promote Trail Town related enhancements, including: <ul style="list-style-type: none"> - Install flower planters, sidewalk lighting, trash & recycling cans, shade trees and historic/heritage reminders. - Install Public art/murals depicting GAP Trail and Youghiogheny River Assets. - Install signage for public parking areas, information kiosks and resting areas.
Smithton – Pollinator Garden (existing)	Add new amenities to serve as a Pedestrian/Bike Destination: <ul style="list-style-type: none"> - Install shade trees, benches, picnic tables, pavilions and water fountains for resting - Install tool/equipment/air stations for biker use
Smithton – Recreation Park (existing)	Add new amenities to serve as a Pedestrian/Bike Destination: <ul style="list-style-type: none"> - Install shade trees, benches, picnic tables, pavilions and water fountains for resting - Install tool/equipment/air stations for biker use - Bike racks for designated bike parking area
Smithton – Youghiogheny River Boat Launch (existing)	Install Information Kiosk highlighting: <ul style="list-style-type: none"> - GAP Trail - Youghiogheny River - Float Smithton - Pollinator Garden - Millennium Park
Smithton – Great Allegheny Passage (GAO) Trail Trailhead parking area (existing)	<ul style="list-style-type: none"> - Install signage welcoming visitors to Smithton - GAP Trail Entrance Improvements - Paving, traffic calming, clear vegetation, install larger entrance signage and signage directing users towards Smithton - Install Information Kiosk highlighting: <ul style="list-style-type: none"> - GAP Trail - Youghiogheny River - Float Smithton - Pollinator Garden - Millennium Park

Smithton-Scottdale Active Transportation Plan

**Metrics: Potential Linear Miles, Connected Destinations and New/Enhanced Destinations
SCOTSDALE BOROUGH**

Number of potential linear miles: For each location, please indicate: a) whether the planned/potential new/improved routes are bicycle, pedestrian (sidewalks) or otherwise; and b) the corresponding number of proposed miles. Gazebo Park	Install Information Kiosk highlighting: <ul style="list-style-type: none"> - On-road portion(s) of the C&C Trail - Jacob’s Creek and Trail - Intercommunity Trail Route - Scottdale History
Loucks Park	Add Amenities to serve as a Pedestrian/Bike Destination: <ul style="list-style-type: none"> - Resting Areas with Shade Trees, Water Fountains & Bike Racks - Install tool/equipment/air stations for biker use

Smithton-Scottdale Active Transportation Plan

INTERRELATIONSHIPS BETWEEN RECOMMENDATIONS AND ACTIVE TRANSPORTATION THEMES

Smithton and Scottdale embrace biking and walking as integral elements of their community's transportation system and that biking and walking contributes to community health, economic mobility and quality of life.

Pennsylvania's Active Transportation themes	Smithton-Scottdale Active Transportation Plan Recommendations				
	Wayfinding <i>focused on educating residents and visitors on transportation facilities and</i>	Biking and Walking Enhancements <i>focused on improving existing and installing new transportation facilities</i>	Connectivity <i>focused on connecting people to places</i>	Community Enhancements <i>focused on creating a positive transportation experience</i>	Outreach <i>focused on creating partnerships and utilizing existing resources</i>
Enhance Safety	Recommended directional signage will guide residents and visitors along designated safe routes within the communities	Sidewalk improvements will be made to eliminate uneven, cracked or missing segments. Lighting, crossing signals and other improvements will be made to improve pedestrian and bike safety within the Communities	Level of Comfort mapping was used to distinguish safer pedestrian and biking routes. The Plan also discourages use of routes with a low Level of Comfort rating	The Plan recommends a number of Trail Town related improvements including signage, pavement markings, water fountains, information kiosks and resting areas	The Plan encourages forming partnerships with local trails groups, watershed organizations and stakeholders groups to improve safety for all non-motorized users
Provide Transportation Equity	Installed signage and route mapping will be made available in different formats and locations to accommodate users of all age groups and abilities	Improvements will focus on improving the conditions of the existing sidewalks, routes and facilities that will accommodate all segments of the community	Providing safe and reliable pedestrian and bike routes will serve all segments of the community including vulnerable populations without access to vehicles	The Plan provides opportunities for people of all ages, abilities and all socio-economic groups to bicycle and walk in Smithton and Scottdale	Smithton and Scottdale will conduct outreach with partners that focus on underserved segments of their populations
Connect Walking and Bicycle Networks	Directional signage will guide users to existing walking and biking trails within the communities	Improvements will be targeted at heavily used intersections and walking routes to improve pedestrian and bike access to the existing Great Allegheny Passage Trail and the Coal & Coke Trail	The Plan addresses connections to various community assets including Allegheny Passage Trail and the Coal & Coke Trail, State Gamelands, local Parks, Jacobs Creek and the Youghiogheny River and other local businesses and assets	The Plan focuses on making it easier for bikers, hikers, and boaters to come into Scottdale and Smithton to have a positive experience	Smithton and Scottdale will conduct field trips to Ohiopyle, Connellsville and other Trail Towns to learn about and to compare how they are successfully connecting to their trail and water amenities and facilities
Leverage Partnerships	Smithton and Scottdale will partner with existing trail groups, stakeholder organizations and watershed associations to install wayfinding signage, prepare mapping and content for municipal websites	Developing partnerships with the Coal & Coke Trail Chapter of the RTC and the Allegheny Trail Alliance (ATA) is recommended to improve connections to those existing trail assets	The Plan identifies Excelsa Heath as an important partner for promoting various recommendations included in the Plan	Land and water trail groups and the Jacobs Creek watershed association are identified as important partners for connecting residents and regional visitors to a range of existing transportation assets in the communities	Smithton and Scottdale will partner with the Grants Committee to complete beautification efforts and with the Sewer and Water Authority to add events to their newsletter
Improve Public Health	Wayfinding efforts will remove barriers to active movement within the communities and will encourage new walkers and bikers to actively participate	Enabling residents and visitors to access and use existing trail assets and newly developed community pedestrian and bike routes will improve the health for all users	The Plan provides for safe, connected and accessible facilities that encourage walking and bicycling	The Plan addresses health disparities by recommending programs and activities that will get larger segments of the population involved with walking and biking	The Plan recommends reaching out to Excelsa Heath to develop events and activities within Smithton and Scottdale
Increase Economic Mobility	Wayfinding efforts will attract and encourage vulnerable and underserved segments of the communities to more actively move about their community	Enabling and encouraging active transportation in Smithton and Scottdale will directly support their economies and will positively influence spending patterns and economic growth	Connections to existing local points of interest and regional trail systems will maximize the economic competitiveness of Smithton and Scottdale Boroughs	The Plan recommends that local bike rides supported by local businesses be held on a weekly basis	A Complete Street Policy was adopted by Smithton and Scottdale to support increased bicycling and walking and add to the overall livability and vitality of the communities

Smithton-Scottdale Active Transportation Plan

Key Stakeholders' Interview Summary

As part of the data gathering for the Active Transportation Plan, we interviewed local people with an interest in Active Transportation. There were 12 people interviewed: 3 from Smithton, 7 from Scottdale and 2 with Regional perspective. They included a public health representative, a police chief, several local active transportation advocates, and elected officials from both municipalities. Below is a summary of their answers.

1 What is your vision for the future of walking and cycling and equestrian riding in Smithton/Scottdale?

Scottdale:

Important to be inclusive to make a path for the community – walking, biking and horses. Would be great to have any path that can be used safely.

I'd like to have the paths connected – behind Kendi and to Connellsville to bring more people to downtown. Other businesses could benefit from this– Parks Commission is trying to get bike apparatus there but struggling with funding right now.

More beneficial for each community to get to the GAP separately and not connecting directly between Scottdale and Smithton.

Connect into the GAP trail within 5 miles of location working on C+C Trail - Scottdale – Mt Pleasant, tie into Mammoth – tie into 5 Star Trail out of Greensburg to Youngstown.

Difficult to connect Scottdale to Smithton in a direct line because of the 12-14' topo change. Makes more sense to connect Scottdale and Smithton each to the GAP trail – use the GAP Trail to connect the communities. Study has been done to connect Scottdale to the GAP via Fayette County has support of all townships and commissioners to make this connection.

Wish list is to connect C+C Trail with the majority of Scottdale but must cross 819 = too busy/uncomfortable. Sharrows and/or Bike/Ped signs would be helpful. Extend Trail along Jacobs Creek further into town. Connect Scottdale to Connellsville to GAP then it would connect Mt Pleasant to the GAP Trail. Scottdale is fairly walkable. Leading a Sat am bike ride from local coffee shop is envisioned. There are good cycling roads around Scottdale.

Easy access, safety, and bicycling = rentals possibly

Wants to expand and join different communities with biking and walking. Get bike shop and food stands like in Connellsville put tents up

Smithton:

Access, area is not well marked, there is no safe way into town.

Add kinds of business for functioning small town. Need designated parking for small businesses.

Bring business to town and support what is here. A waterway connection is hard to envision. TrailTown would capitalize on the proximity to GAP. Need signage and consistency to get Trail and a sign on the GAP leading to town. PennDOT signs (bikes can take whole lane) make safer. Walking community and path to trail is pretty safe and walkable.

Regional:

Every 3 years a Community Health Needs Assessment for Westmoreland County is conducted. The recent top 3 priorities in the Assessment are Opioid/Substance Abuse, Obesity, and Transportation. To address the obesity priority, a mall walkers program was developed to increase activity and the local hospital supports other events that get people active. With the quarantine, more virtual programming has been developed. A database with 800 people has been assembled over the last 9 years. Pre-recorded segments are emailed to database that include: activities, dietician information, healthy cooking demonstrations, information on low sugar, low salt and healthier popular snacks. In addition information is sent from their partners – dieticians, Diabetes Center and American Heart Association. They survey their group every 3 months for input. They provide programs and information that will work for their group.

Vision would be safe, comfortable, connected walking routes.

2 What is the Borough's role/Role of Individuals/Community in achieving this vision? to improve walking conditions? to improve cycling conditions? Equestrian conditions?

Scottdale:

Difficult because super foresty and rocky, rides through a creek bed which is frustrating, Effort by everyone, Jacob Creeks Watershed has very cool community event to remove lots of litter and junk that is dumped in the woods – 9 trailers of trash last year.

Borough is supportive but funds are tight. Haven't raised taxes in long time so hard to come up with matches with grants. Each council member has own specialty to see the projects through.

Safe Routes to Schools initiative widened the sidewalks, now need new sidewalks and ADA accessible ramps at curbs. Town has a sidewalk program – missing, crooked. The new Share the Road is good for cycling. Would like to combine property owners/Co-op to update sidewalks – get a better price from contractors to make affordable and likely to happen.

The borough has done its job to get the trail to the boro line now they are advocates to endorse the trail.

Could lead group rides then maybe it will turn into something. Volunteers cleaning path, connecting paths, planting trees, volunteer with Jacobs Creek.

Boro can be active in planning and working out easements if needed.

Borough unable to maintain new infrastructure. The trails is about all that the road crew could do. Maybe boys scouts to provide projects along trail – signs, benches, bird houses, bulletin board Encourage public to participate in different ways.

Smithton:

Council will do what they can. They have lots of connections and can hopefully get things done.

No street in boro is faster than 25 so cars are generally slow and can handle mix of traffic – wide roads. Need bike racks and spaces for car parking.

Smithton-Scottdale Active Transportation Plan

Role of the grants committee = beautification. Community leadership weighs pros/cons and takes action when needed. Communication is needed to improve getting folks on board.

Regional:

Providing resources to munic officials and community leaders and administering funds for community infrastructure project. Technical resources and money and technical assistance.

3 Are there any areas of the Borough or planning concepts that the team should focus on during this planning process?

Scottdale:

(Rob Ferguson) Individuals and groups are involved with trying to make connections. Borough supports C+C Trail but funds may not be available for the usual support of this trail.

Help C+C Trail to make connection happen – C+C to Twin Lakes in Fayette County.

There should be trail head parking area and signage at Garfield Park parking area of C&C trail. Portable Restrooms at this location would be good too.

Painting, signage is already up. Small portion that needs to be completed along Jacob's Creek about 300' = Connect Garfield Park to 5th Avenue Bridge.

C+C to Connellsville concept. Jacob's Creek wants to do water trails through Scottdale – starting in Bridgeport. Could connect via water to Smithton. Banning Road has less traffic than 981 – route goes through Jacobs Creek and Linden Hall.

Already implemented a Safe Routes to School (SRTS) on Grove St thru PennDOT. This should be a main corridor for students to get to ES. Also to walk to school/home. This could be a central focus point.

Entrance to existing bike and wading trail near the Boro building.

(Rob Ferguson) Folks are working on a vision to connect SE end of town to Fayette County. Once this is connected, the downtown area only main route will be is Route 819 = lots of traffic, could easily layout for additional bike traffic on one-way streets to move bikes. Sharrows could be added easily on the one-way streets.

Extend trail between Garfield Park and 5th Avenue would be nice to focus on.

Smithton:

Corridor from bridge into town and from Center Street to Bridge and the railroad crossing.

End of bridge will be playground, will be great destination. Will need bike racks, crossings, signs, assist boro with proper planning of that area. Visual entrance to town.

Accessibility for ADA compliance – some areas are not. Safety to trail and water problem is the RR tracks. Get more community input for vision. Increase people for local businesses.

Regional:

Scottdale's C&C trail and GAP trail - Raising awareness of the trails and connecting trails and streets to community destinations.

4 Are there any areas of the Borough or planning concepts that you believe should not be under consideration through this planning process?

Scottdale:

Super excited about this project Active Transportation Plan as it will help out everyone in the community.

Not anyone against any of it. Has not heard of folks against any of this. Scottdale-Smithton road is dangerous, narrow road and people drive fast on that road.

Cannot think of any – Scottdale to Connellsville has 2 realistic possibilities for connections.

There was grant money supposed to be used for a bikeway for kids to ride bikes to school on west side of town – thinks not necessary. It was built but was poorly thought out so don't put any more money into this.

Is there a need for transportation between the two communities? Buses have bike racks maybe transport this way.

SRTS already done this. Only connector missing is the connection of people from the West side of town to Grove Street.

Current bike path already exists near Mt. Pleasant Road – already taken care of.

Not that I know of.

Smithton:

There is a need to connect with Scottdale to Bike trail, a connection from Scottdale to Smithton with bikes is the hardest part. Maybe connect Smithton to the bike trail and Scottdale to the bike trail but how?

take a look at everything.

Float Smithton – kayak launch being developed. Playground has some safety issues proximity to road.

Regional:

Cannot imagine anything that wouldn't be a part of it.

5 What is the best way to engage residents in this planning process?

Scottdale:

Right now best way is through community groups on facebook like Chaintown Neighbors page and Across Westmoreland page.

Savvy Citizen is an app that they use (Borough pays for) for updates on events, road closure. They can use this to advertise the survey. Booth at the Scottdale Picnic in the Park in August. Everyone comes to this event. Scottdale Heritage Festival people come from all over in September.

March 26th Historical Society meeting, tie into facebook

Wait until Post Pandemic – call public meeting to engage residents, governments of municipalities, senators, house of reps, constituents to get involved. Provide a virtual trail tour with iphone or ipad. Facebook stream or YouTube video and social media. Get people to view it and become engaged in it and be active participants.

Local newspaper shared by Scottdale and Smithton – Independent Observer. Get out on Facebook, August Community Picnic in Scottdale – set up booth there. Fall Festival in Sept. Have a meeting at Scratch Living Coffee Shop 12-15 people, they have a Bulletin Board information could be posted there.

Prefers webinars to reach out to people if cannot meet in public. Webinar is better. Can control the feedback. Only a presentation of the ideas. SM not a good way too much negativity. Right now best to present at 12N lunch hour. If go back to prior to quarantine then evening would be best.

On Facebook:

Scottdale Alive

Community action committee of Scottdale – Jim Williams

Savvy Citizen meetings posted on –line.

Also Boro website if up to date – not always up to date

Armstrong cable on TV – good for older people

Newspaper – good too, Connellsville paper or Tribune Review

Smithton:

Survey Monkey, Phone call, be creative, we had a good response from a survey a few years about about sprucing up the town. Post on borough's facebook page to get people who don't want to talk on the phone. We are limited on what we could do.

Community Facebook Groups seem to be well attended.

Same folks come to meetings. Events like library program for kids, fish fries, events, social media, newsletter with Water Authority bills.

Regional:

Don't have any idea, with coronavirus it is tough....usually a biking/walking audit or gathering with food. Instead, maybe Individual audits using a bike/walk safety checklist.

6 What needs to be included and emphasized in the plan for you to consider it a successful Active Transportation Plan?

Scottdale:

Successful if we have routes throughout the game lands that people could access without rocky spaces and treacherous spaces – if it is inclusive.

People using it. Families getting together, businesses flourishing. Seeing connections made between paths that exist. Funds are the biggest obstacle.

Would be nice to have better public transportation to Pittsburgh so don't have to fight traffic from Greensburg, Jeannette. Had chance to live anywhere near an airport and chose this location – Cultural, historical, recreation. Vision as Scottdale as bedroom community of Pittsburgh. Would love to see a Lazy River Ride down Jacob's Creek.

Have to have boots on the ground, engage people who know the lay of the land, use commonsense on connect S&S and geographic obstacles. Use GAP to connect S&S, Connect Scottdale to GAP and connect Smithton to the GAP.

If we have enough support to make it happen. Lots of backing behind the plan. A viable plan that might happen. It has taken 20 years to get from Scottdale to Connellsville – people got their hopes up then nothing happening. envisioned this plan to draw people into the town. If connect to GAP then becomes a destination. Generates more activity = more vibrant community. This is the ultimate goal. Need to bring in people from outside for social and economic “shot in the arm” of making the town a designation.

What is needed for Borough Council to adopt this plan?

Potential for economic activity.

Transit system is a big thing that some are interested in. Working to get more stops on Westmoreland Transit System. Some of the busses have bike racks.

Fayette transit is better than Westmoreland for handicapped and bikes.

Smithton:

Access to bike trail, boat ramp, increase safety on Rte 981.

Better quality of life, livable, walkable, function, look nice. On board with anything to make town more livable = lower crime rates.

Safer, accessible, support for town financially.

Regional:

If people want to be active they will be and they will find it. More hesitant people need incentives to participate and will be more inclined to use the trails. Once a year outdoor program at Twin Lakes otherwise is an indoor program. Each year Twin Lakes Park's walking track is used for an event and walk along a path with exercise equipment – to work out. They do participate in walks/walks for babies, heart, suicide, MS...provide water, granola bars but they do not organize these event but they are happy to support these.

Smithton-Scottdale Active Transportation Plan

If a community came to them with a plan on what to do to get people out walking, they can support the program with their exercise physicians, dieticians, etc but they cannot lead.
If there were a track between Scottdale and Smithton, that would be amazing, not a lot of physician practices in smithton area. In Scottdale and Connellsville, they have clinicians and relations with physicians in the area.

Interested in learning more, wonderful program, would like to be involved if possible.
If a track or trail is developed they will work with the group to get people up and moving with the partners to make projects happen.

Measurable results and realistic goal setting. Increase biking and walking by % or miles of bike-friendly streets and/or bike lanes.

7 Any additional comments for the project team about your expectations for development of the Active Transportation Plan?

Scottdale:

How will items in the plan be paid for? Can use PennDOT to match with other plans/grants.

C+C would like to be kept informed of our plans/progress

Keep politics out of the effort will result in shorter amounts of time with less money. Smithton is further ahead with the B&B and restaurants there. Scottdale has opportunity to tell story of their history not only recreation opportunities but educational too. Lots of places for good signs.

Thank you! Appreciate you doing this. Attract people back to the community.

It's a plan, initial stages. This is important. The rest is up to the community boro to implement this plan.

Bike Education in town? As far as is known, there isn't any.

Engagement –

The Boro has not done surveys in the past so no experience with this
Boro has had discussions on transit and the biking but was not posted.
Most citizens don't want to participate in a telephone survey.
Survey on-line would get more interested citizens participating.
Bike education – none in the Borough that are known but that is another way that the Borough could help.

Smithton:

All that is going on now. It is a different world now.

No one looking to bring in a huge crowd but more of a steady stream of people passing through. Get people to patronize the existing businesses.

Sidewalk Survey – would be beneficial

Parking Survey – definitely beneficial to the community

Street/Route preferential for Biking/Walking – needs to be studied, most folks come off trail over bridge, into downtown, right there are no bike racks or places to park, wants route to downtown safely, add a covered place to work would be a great idea.

Cannot visualize what we're doing. Pollinator Palooza to highlight pollinator habitat – have a connection. Destination Smithton – has a lot going for the town – on river, hwys nearby, near trail, playground, B&B – how to capitalize on all of these.

Regional:

Cannot think of anything not mentioned already. Consider the importance of biking and walking for public health and environmental benefits.
Looking at SPC overlay for Smithton there is no connection to the GAP trail shown from the town. If municipalities want the interested but concerned people to bike in Smithton, consider if on-street bike lanes are needed.

Notes: Bike counts include people riding bikes or using other undefined forms of non-motorized transportation (wheel chairs, strollers, wagons, scooters, skateboards, rollerblades, etc).

Fair-weather days are considered days with a maximum temperature between 55° and 95°, and less than .11 inches of rain. Days with counts that are ≥ the daily average for "all days" are counted as fair-weather days, although they do not meet the established criteria. These counts are identified by a bold border.

Temperature < 55° or ≥ 96° Rain ≥ .11 inches

Bikes IN, reduced by 75%	392			
Bikes OUT, reduced by 80%		609		
Adjusted total bikes			1,001	
Adjusted daily average bikes			35	

Cars IN, no adjustments			33,474	
Cars OUT, increased by 2%				34,387
Adjusted total cars				67,861
Adjusted daily average cars:				2,340

Comparison notes:

Adjusted daily average cars 2020 / counter-produced data:	2,340
SPC traffic counts / Annual Average Daily Traffic (AADT) 2015 / route #: 0981 / segment begin: 0020 / segment end: 0044	2,018

Notes: Bike counts include people riding bikes or using other undefined forms of non-motorized transportation (wheel chairs, strollers, wagons, scooters, skateboards, rollerblades, etc).

Fair-weather days are considered days with a maximum temperature between 55° and 95°, and less than .11 inches of rain. Days with counts that are ≥ the daily average for "all days" are counted as fair-weather days, although they do not meet the established criteria. These counts are identified by a bold border.

Temperature < 55° or ≥ 96° Rain ≥ .11 inches

Daily Data

Weekly Profile

Hourly Profile during Weekdays

Hourly Profile during the Weekend

Notes: Counts include people riding bikes or using other undefined forms of non-motorized transportation (wheel chairs, strollers, wagons, scooters, skateboards, rollerblades, etc).

Fair-weather days are considered days with a maximum temperature between 55° and 95°, and less than .11 inches of rain. Days with counts that are ≥ the daily average for "all days" are counted as fair-weather days, although they do not meet the established criteria. These counts are identified by a bold border.

Temperature < 55° or ≥ 96° Rain ≥ .11 inches

Funding Application Support:

NOTIFICATION OF APPLICATION TO STATE AGENCY

WalkWorks Grant Recipient:

WalkWorks is interested in supporting your applications for funds to State Agencies – Department of Community and Economic Development (DCED), Department of Conservation and Natural Resources (DCNR), and the Department of Transportation (PennDOT). The Agencies are supportive of WalkWorks and, especially, your efforts with regard to active transportation. Given the collaboration and synergistic impact of your plans/policies developed with the assistance of WalkWorks funding and our mutual hope for implementation, we want to assist by calling your applications to the attention of our colleagues at the respective agencies.

If you have plans to submit or have recently submitted an application to any of the above Agencies, please advise WalkWorks by completing this form and sending to carolr@pitt.edu.

Your name or contact name on application to agency:

Borough/Township/City:

Funding agency (i.e., application for funds submitted to): DCED; DCNR; PennDOT

Date of submission:

Name of grant program:

Brief description of proposal (2-3 sentences):

Amount requested: \$

Penn State Extension Educational webinars --

- [Transportation related land use webinars.docx](#)
- [Land Use webinar Winter-Spring2020 flyer.pdf](#)

These webinars offer guidance and additional resources and options available as plans are Developed and implemented. Among others, relevant sessions in the series include the topics:

- Transportation Connectivity and Land Use
- Using the Official Map for Your Community's Infrastructure
- Using the Municipal Budget as a Planning Tool
- Acquiring Trail Easements and Easements for Land Conservation

Penn State Extension

Land Use Decision-making Winter-Spring 2020 Webinar Series

January 15 - Planning for Active Transportation in Southwestern Pennsylvania

February 19 - Affordable Housing Opportunities in Communities

March 18 - Brownfield Remediation to Rebuild Communities

April 15 - Creating Vibrant Communities

May 20 - Improving Retail Activities in Rural Communities by Collaborating with the Department of Transportation.

To register:
<https://extension.psu.edu/land-use-webinar>
Register for "Winter/Spring" series.

Participants can learn about

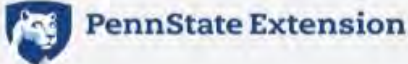

- Current planning issues
- Land use planning tools and techniques
- Local regulations

These monthly webinars are offered from 12 Noon - 1:15 pm . The webinars are designed to help planners, elected officials and citizens better engage in land use decision-making processes.

Questions about the webinar?
Contact Peter Wulforst at
ptw3@psu.edu or call 570-296-3400.

Non-Credit Registration - \$50
RLA Credit Registration - \$65
CM Credit Registration Fee - \$95
Individual webinar registration - \$20
Each webinar is 1.25 CM credits or 6.25 CM credits for the series
