# The High Yield Soybean solution

Increased confidence

Break through the yield ceiling

Consistently higher yields

More convenience

Higher return on investment

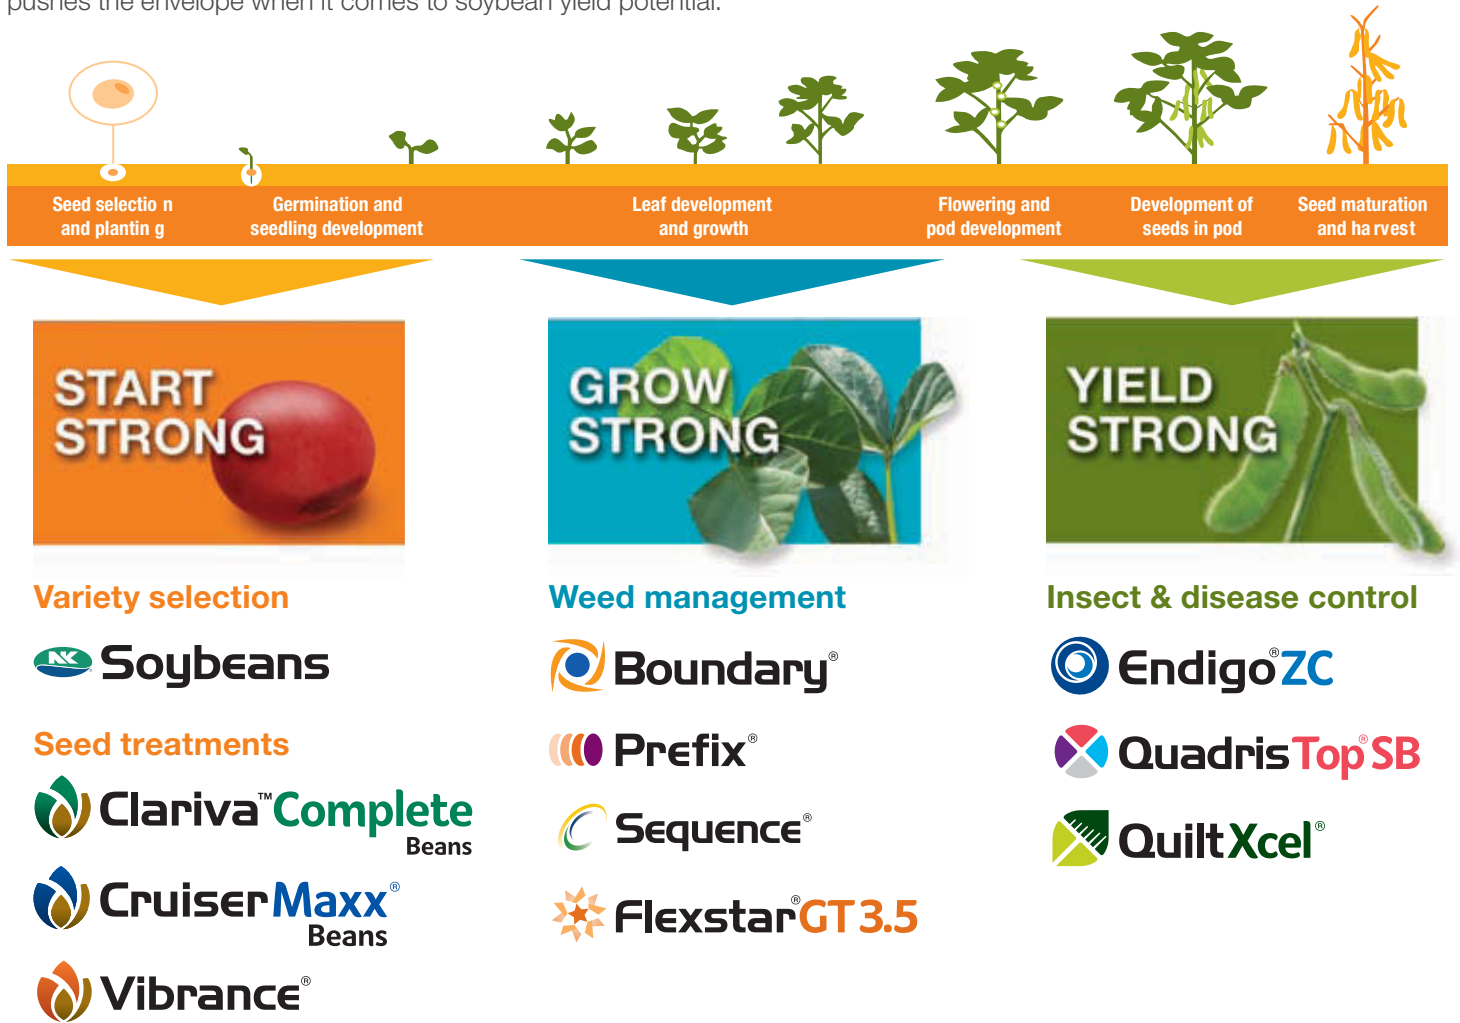

syngenta®

TM

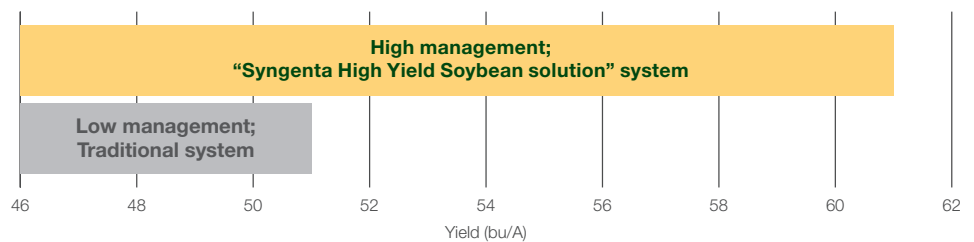

# A 'strong' step forward

Advances in soybean technology require a commitment to research and development. And we take a 'strong' approach to this commitment. Our continued progress in genetics, seed treatments and crop protection products pushes the envelope when it comes to soybean yield potential.

Sleep better at night by knowing you can achieve higher yield. The chart below illustrates how the High Yield Soybean solution consistently increases yield by 10 bu/A, a 16 percent yield increase over the traditional system.

**Syngenta high-yield soybean system vs. Traditional management system**

# Your High Yield Soybean offer

## Step 1: Purchase at least 200 units of NK® soybeans treated with:

- CruiserMaxx® Beans with Vibrance® seed treatment, an on-seed application of separately registered products

or

- Clariva™ Complete Beans seed treatment, an on-seed application of separately registered products

## Step 2: Purchase matching acres of eligible in-season soybean crop protection products.

- \$2/acre with an eligible NK soybean purchase, including matching acres of a residual soybean herbicide
- \$4/acre with an eligible fungicide and insecticide purchase on matching acres of NK soybeans & residual soybean herbicides as indicated above
- Eligible for a total of \$6/acre

 <p><b>START STRONG</b></p>	<p><b>Required purchase</b></p>	<p><b>Required purchase:</b> NK soybeans treated with: CruiserMaxx Beans with Vibrance or Clariva Complete Beans</p>
 <p><b>GROW STRONG</b></p>	<p><b>\$2/A cost share</b></p>	<p><b>Required purchase:</b> One residual herbicide, <b>Eligible products:</b> Boundary®, Prefix®, Sequence® and Flexstar® GT 3.5 herbicides</p>
 <p><b>YIELD STRONG</b></p>	<p><b>\$6/A cost share</b></p>	<p><b>Required purchase:</b> One of each: residual herbicide, fungicide &amp; insecticide: Endigo® ZC insecticide; Quadris Top® SB or Quilt Xcel® fungicides</p>

And don't forget to register for the Soybean Insider to be delivered directly to your email at [www.FarmAssist.com/SoyInsider](http://www.FarmAssist.com/SoyInsider).

# The High Yield Soybean solution

We're partners in helping you achieve a successful growing season. Let's apply our High Yield Soybean solution to your fields, so you can start breaking through the yield ceiling.

### **Risk sharing**

Higher yield with a cost-share offer to maximize your return on investment

### **A simple solution for high yield**

### **Robust agronomic management plan**

Custom-designed plan backed by your Syngenta reseller

### **Proven protocol**

The Syngenta High Yield Soybean solution out-yields the traditional system by 10 bu/A

### **Out-performing technology**

An integrated portfolio of products from planting to harvest

**syngenta**® ©2014 Syngenta. **Important: Always read and follow label instructions. Some crop protection products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status. Endigo ZC is a Restricted Use Pesticide.** Endigo ZC is highly toxic to bees exposed to direct treatment on blooming crops and weeds. Do not apply this product or allow it to drift onto blooming plants while bees are foraging adjacent to the treatment area. Clariva Complete Beans is an on-seed application of Clariva pn and CruiserMaxx Vibrance. CruiserMaxx Beans is an on-seed application of CruiserMaxx alone or with Apron XL. CruiserMaxx Beans with Vibrance is an on-seed application of CruiserMaxx Vibrance alone or with Apron XL. Apron XL®, Boundary®, Clariva™, CruiserMaxx®, Endigo®, Flexstar®, Prefix®, Quadris Top®, Qult Xcel®, Vibrance®, the Alliance Frame, the Purpose Icon and the Syngenta logo are trademarks of a Syngenta Group Company.
