

Date: 5/24/18

Subcommittee Meeting: Definitive Care

Present: Dr. Jen Roberts, Jason Keffeler, and Terry Nichols

Today's General Meeting requested the Definitive Care committee work on trying to resolve the difficulty some Level III & IV hospitals have had getting injured patients accepted at a Level II trauma center.

- We will draft a position statement on providing contact information of the trauma medical director and the trauma program manager if injured patients with a mechanism of injury are declined at a Level II Trauma Center.
- At the General Meeting, we could inform others on the NCRTAC website under "File Center", they can access all the Position Statements that are available. There could be newer NCRTAC members not aware of the multiple position statements that have been approved for our region.
