

Under eye puffiness and dark circles can make a person look tired, unhealthy and older. Factors that contribute to this may include : Sun exposure, weakened circulation, irritation, fat and/or water retention, collagen loss, dryness and loss of skin elasticity.

To reduce these unsightly bags and restore a brighter, more youthful appearance, ARGAN introduces ARG-EyeKare, a revolutionary product based on Poria cocos, a fungus in the mushroom family (Polyoporaaceae) with a rich history of use in Traditional Chinese Medicine.

**Poria cocos:** Poria, also referred to as Hoelen or Fu-Ling, is the chief ingredient in about 10% of all Traditional Chinese Medicinal formulations. The fruiting body (sclerotium) of Poria has been used for centuries for its anti-aging, diuretic, sedative and tonic effects

**Acetyl tetrapeptide-5:** Anti-glycation, anti-edema, humectant, moisturizing to improve skin elasticity and smoothness. Reduces both under-eye puffiness and dark circles

**Dipeptide-2:** Anti-aging. Inhibits angiotensin, converting enzyme (ACE) to improve lymphatic drainage and provide anti-edema effect. Structurally, resembles lipids found in the epidermis to help skin retain moisture and improve barrier properties
