Major: Computer Science

2020-2021: Senior

Academic and Extracurricular Highlights:

- **2.81** High School College GPA
- Women in Tech Club incoming President
- Girls who Code - instructor at Gateway Middle School

Quotes:

“The applicant has represented USF at the Grace Hopper Celebration of Women in Computing with class and I know she can represent any organization with honor. I also know that her financial situation is not great, but even though that is the case, she **STILL** goes out of her way to volunteer her time for women in tech, the department, and the university when she could be trying to earn money. That speaks volumes about her character.” **Beste F. Yuksel** - Assistant Professor of Computer Science

“I am currently a Senior at the University of San Francisco where I am studying computer science. I am very passionate about my major and am very involved with my department and school. This semester I will proudly manage our Women in Tech club as the next President. I have been teaching children to code for the last year and am continuing to do so, while also volunteering at a local middle school....This award...has made a huge impact on my education. I am able to quit my job as a waitress this next semester and focus my time on both school and volunteer work. Thank you so much for this support and generosity, I hope to one day give back to the community in this value as well.” **Alexandria**
