NATIONAL MATCH BOWS

**AMERICA'S FINEST ARCHERY EQUIPMENT
IS COLT**

National Match 68

This bow is designed to make it the ideal target shooter's bow. It is perfectly balanced for the sight shooter, and has a long (7½"), sight window. It has the weight in the handle that sight shooters prefer.

National Match 66

Here is the perfect bow for field and target use. The 66" National Match features a 7" sight window.

National Match 62

This, the shortest version of the National Match series, is a powerful hunting bow for men, and the ultimate in a field or target bow for men or women with shorter draws. Sight window is 5½".

MODEL	LENGTH	DRAW WEIGHT @ 28"	HEIGHT OF SIGHT WINDOW	PRICE
NATIONAL MATCH, 68	68"	25-60	7½"	\$89.95
NATIONAL MATCH, 66	66"	25-60	7"	\$89.95
NATIONAL MATCH, 62	62"	25-60	5½"	\$89.95

NATIONAL MATCH

DUO-DIRECTIONAL FIBREGLOSS

COMPOSITE BOWS

All National Match Bows are custom-quality, precision shooting instruments featuring the stability and uniformly superior performance demanded by tournament shooters.

Duo-Directional fibreglass, skillfully engineered two-stage tapered laminations of hard Canadian maple, and rare hard woods selected for strength, weight, and beauty in the handle section are fused together with the finest of modern adhesives to make National Match Bows the finest obtainable.

Duo-Directional fibreglass is constructed of thousands of parallel glass fibres, laid together under tension and bonded with plastic resins to a woven fibreglass strip, thereby producing an integral unit that provides maximum longitudinal strength and power, as well as lateral stability. The possibility of limb twist is greatly reduced and longitudinal checks or cracks are eliminated.

Only sawed, edge-grain hard Canadian maple laminations are used in National Match Bows (no veneers such as commonly used). Core laminations have two-stage multiple tapers to provide the optimum combination of smoothness in draw, velocity, and equalization of limb stresses. Longer bow life, as well as superior shooting qualities are the result of the engineered design, craftsmanship in aligning and tillering, and painstaking inspection and testing that go into every National Match Bow. Selected hard woods in the handle are carefully shaped and finished to provide shooting comfort and accuracy as well as beauty. The beauty is sealed in with multiple coats of specially formulated varnish, hand-rubbed between coats.

All National Match Bows are full center shot. The Colt semi-pistol grip affords a comfortable straight-wrist or conventional hold. Nocks are reinforced with an overlay of attractively laminated fibres. Bows are tested for velocity on Colt's electronic chronograph used in measuring bullet velocities.

Behind the superior quality of Colt National Match Bows stands 125 years of design and engineering of precision shooting weapons—plus the experience and craftsmanship of world renowned bowyers. All National Match Bows are equipped with vertical feather arrow rests, leather arrow plates, and top-quality Dacron bowstrings, and carry a Colt Three Year Written Guarantee.

QUIVERS AND LEATHER ACCESSORIES

All Colt leather accessories have been designed and field tested for utility, dependability and beauty, using the finest materials. These and other Colt accessories bear the famous Colt emblem... your assurance of quality.

COLT'S PATENT FIRE ARMS MFG. CO., INC.

HARTFORD 14, CONN.

AMERICA'S FINEST COMPOSITE BOWS

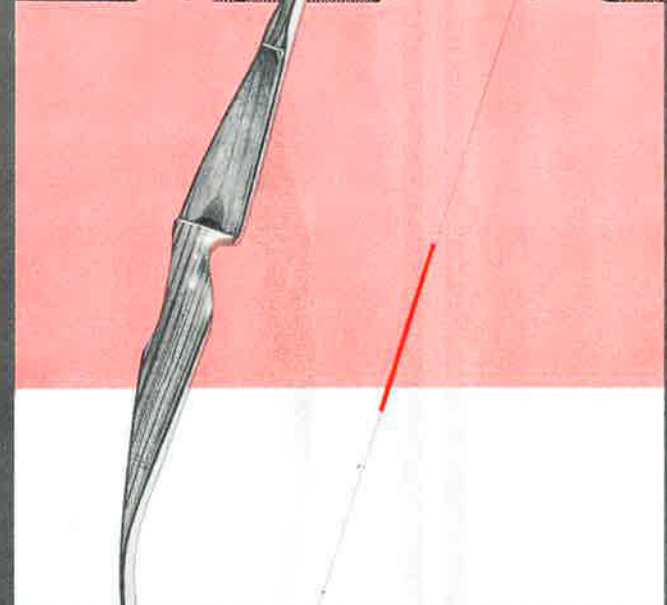

All Colt Composite Bows reflect the same superb quality and master craftsmanship that has been associated with the Colt name since 1836. Here is truly top performance in every sense of the word. Newly improved woven fibreglass construction means greater "cast" and lateral stability. Carefully engineered design and meticulous tillering means greater accuracy and greater bow life. Woven fibreglass on all Colt Composite Bows eliminates any chance of longitudinal cracks or checks and offers a greater resistance to heat. This means better performance in hot and humid weather. All Colt Composite Bows carry a three year written guarantee.

COLT TARGETSMAN

Designed by world renowned, custom bow makers, the Colt Targetsman incorporates the famous "duoflex" principle, a feature that has made this type of bow a favorite with top target shooters around the world. The "duoflex" principle provides a balanced deflex reflex limb with full working recurve. The Targetsman features a handle section of beautiful Bubinga and Zebra woods set off with Rosewood. Its jar-free action and stability delivers accuracy comparable to that of Colt's National Match Bows. In velocity, flat trajectory and smoothness of draw, it will out-perform any bow in its price class. The 66" Targetsman is an ideal mens target and field bow. The 62" length is perfect for archers with a shorter draw, including the ladies. Both models are equipped with quality vertical feather arrow rest, leather arrow plate, and custom made Dacron bow string.

COLT HUNTSMAN

A husky 52" hunting bow that is built for power and accuracy. Carpet-type arrow rest of high pile mohair and a leather arrow plate insure smooth, quiet passage of heavy hunting arrows in any weather—wet or dry. This accurate, stable bow generates power sufficient to stop any game, is easy to handle in brush—and can be shot from any position—sitting, kneeling, standing. Expensive Bubinga wood in the riser provides a handsome contrast to forest green woven fibreglass backing and facing. **No better hunting bow is made.**

COLT WOODSMAN

A ruggedly handsome 64" bow with the length to provide smooth draw—the stability to insure accuracy. Rare African Zebra wood handle with the same rich shade of green glass used on National Match Bows, gives the Woodsman the luxury look of more expensive bows. Equipped with vertical feather arrow rest and leather arrow plate. An ideal bow for the archer with a medium and long draw who wants a versatile bow for a moderate price.

COLT FIELDMASTER

The medium length Fieldmaster has strength and stability characteristic of more expensive bows. This 62" bow has unusual versatility, and therefore is ideal for the archer who wants an all around bow for hunting, field and target shooting. Moderately deflexed and reflexed limbs, with parallel maple laminations, provide stability, making this an easy bow to shoot. Rugged limb construction lessens chance of bow damage due to improper stringing or other abuses. Solid mahogany handle, forest green fibreglass backing, and wedge-type nock reinforcements of contrasting woods, combine to make this a most attractive bow.

COLT SCOUT

A top-flight, quality-crafted "center shot" 60" bow at a price that will delight the average bowman. Includes such expensive features as solid mahogany riser, multi-ply fibreglass backing and facing in a wide range of colors, rock maple limb laminations, semi-pistol type grip, PLUS a three year product guarantee that backs up this matchless value. Delivers composite bow performance and durability for a price less than some solid wood or glass bows. The perfect target, field and hunting bow for the archer who wants center shot composite bow performance at a modest price. A rugged, easy-to-shoot bow that is ideal for schools, camps, Scout Troops and other archery groups.
