

OPEN HOUSE IN THE COMPUTER LAB

WHAT ST. GERALD SCHOOL MEANS TO ITS STUDENTS

St. Gerald students share their love of St. Gerald at Open House. For the second year in a row, the students in grades 5 through 8 were asked to create a PowerPoint presentation on why they are happy that their parents chose to send them to St. Gerald School. The “Winning” presentation was displayed on the main screen in the computer lab with other “Honorable Mentions” displayed on the aisle computers. The work done by these students is a real testament to our school. The most common sentiments expressed were St. Gerald school is a diverse environment where every student feels welcomed; Students respect and are grateful for their teachers; Students are sad over the loss of their pastor Father Malcolm. The students spoke from their hearts and it was very moving to read their work.

This year there was a definite Winning entry created by Liliana Kolar, a fifth-grade student here at St. Gerald. Her 29-slide presentation was displayed at both the Sunday and the mid-week evening Open House. You can view it here.
