Others that are recommended but not on list:
1) 3X Watch For Androids
2) App Lock - Android
3) Saavi Accountability Software
4) Mobicip
5) K9--it's free, and it's highly effective.

Many professionals prefer that clients use **content trackers** rather than **content blockers**, as they are more focused on accountability, not simply trying to have images, pictures, sites, etc. externally eliminated. **Content trackers** however do require that the client have someone who receives the tracking update such as a sponsor, therapist or clergy. It is not appropriate to use your spouse.
