ABOUT US

SCS Technologies LLC is a full service design and fabrication company. We specialize in PLC based control systems, control panel fabrication, and custody transfer liquid measurements, including LACT units, through all current metering technologies.

Based in Big Spring, Texas, SCS Technologies is locally owned and operated in the West Texas area.

Our goal is to develop long-term relationships with our clients based on mutual trust and a commitment to customer service and satisfaction. We place our clients first and go the extra mile to earn their business.

We're ready to provide the most cost effective approach and technical solutions that meet your needs today.
