

JOSÉPHINE CHARTER

To whom it may concern,

Josephine Charter own and operate m/v Josephine, a twin engine charter vessel of 49 gr.t. classified to carry 100 passengers. The vessel is typically undertaking exclusive and tailored exploring and leisure trips in the Stockholm outer archipelago i. e .in areas where few other vessels are able to navigate. This due to shallow waters and reefs combined with challenging weather and stream conditions. Something which demands extraordinary skills when it comes to route planning, navigation and maneuvering. The customers are typically a demanding clientele with high expectations.

Apart from the route planning and navigation, the Captain, is responsible for ensuring that the customer expectations are reached. He is in addition responsible for provisioning, maintenance management, engineering, crew management, trouble shooting and all regulatory tasks which normally falls under the Master onboard a vessel.

Mr Strom has been employed as Captain onboard m/v Josephine since April 9, 2018. He has in this regard proven to be both competent and appreciated by both the crew and our clients/passengers. His positive attitude, strong desire to continually improve in combination with his management skills, stable nature and representative manners have created confidence at all levels.

M/V Josephine is now planned to become idle as of this summer but we hope that Mr Strom wants to work for us again as a Captain in coming seasons.
