## H-PST-1 Plumbing Trainer

### Description

The Hampden **MODEL H-PST-1** Plumbing Trainer is used to demonstrate an environmentally friendly toilet flushing system. Utilizing gray water, ie. water drained from a sink, the vanity tank will fill and pump the gray water into the water storage tank of a standard toilet. The gray water will be used to flush the toilet instead of using clean water.

### Specifications

- Water supply tank with pump
- Simulated sink
- Sink fill switch
- Vanity tank (gray water storage)
- Simulated toilet tank/bowl
- Drain valve
- Water storage tank with drain valve
- Steel bench with maple top
- Power cord with GFI circuit breaker

All Hampden units are available for operation at any voltage or frequency
