

Creando's curriculum uses a combination of our five senses learning approach with our theme-based explorations to provide an interactive, fun, and creative learning experiences.

Our approach allows your little explorer to learn within a trusting, secure and familiar environment, helping them learn a new language faster. Our curriculum focuses on imitating the natural way that each child learns his native language. Each exploration is dedicated to helping your little explorer learn and master the target language.

Our teachers have an extensive background in early childhood education, are native speakers and are fully equipped and prepare to help guide your little explorer during their language exploration, as well as to help them master many other skills.

Creando's Foundation for Effective Learning
