SUPREME VINYL WRAPS in CINCINNATI

CARING FOR YOUR VEHICLE WRAP

Vehicle wraps aren't meant to be installed and forgotten. Like the rest of your vehicle, your wrap requires regular cleaning and maintenance. For longer-lasting, vibrant color, wash your wrap on a regular basis. Common sense is king with vinyl!

Park out of the sunlight and in the shade as often as possible. This is not imperative, but aids in keeping the colors vibrant. Do not leave the car covered in dirt, grime, bird droppings, tree sap or wet leaves.

If you see a bubble in the vinyl, do NOT poke! It's an easy fix for our installers and it's FREE.

When it's time to clean your vinyl wrapped car, truck or motorcycle, DreamWrapsUSA recommends hand washing with the two-bucket method using only quality automotive cleaning products. You can treat your wrap like paint, but AVOID using harsh chemicals, solvents or compounds and swirl/scratch removers at all costs.

We also recommend ceramic or glass coatings on our wraps. Ask for details. We also suggest using spray quick detailer on clean microfiber cloths to maintain your cars vinyl wrap between major washes.

Brush-type car washes are NOT recommended on a vinyl wrapped vehicle as they can scratch the film, cause edges to lift, and dull the film's appearance. Brushless or Touchless car washes are acceptable for vinyl wrap.

Although hand washing is the preferred cleaning method, pressure washing may be used under these conditions: Ensure the pressure is kept below 2,000 psi. Use a spray nozzle with a 40 degree wide angle spray pattern and keep water temperature below 140 degrees Fahrenheit. Keep the spray nozzle at least 12 inches away from the car edges.

When waxing or sealing vinyl wraps DO NOT use petroleum distillates or abrasives! These will damage your vinyl. DreamWrapsUSA can not be held liable for any damage caused to vinyl or vehicle due to neglect or product use.

For Gloss vinyl you can use products such as:

- Maguire's NXT Generation Tech Wax 2.0 & Ultimate Quik Detailer
- CroftgateUSA Wrap Care products
- Cemical Guys Wrap Detailer

For Matte/Flat or Satin/Semi-gloss vinyl use the following for removing stains or difficult containments:

- 70% Isopropyl alcohol (IPA) or mix with water (ratio 2:1)
- Chemical Guys Meticulous Matte

For Black Carbon Fiber or Brushed Metal Texture:

- 70% Isopropyl alcohol (IPA)
- Avery Dennison Supreme Wrap Care
- Maguire's Natural Shine Protectant

Do not to use any silica or wax on Matte/Flat, Carbon or Brushed Metal vinyl as they alter the finishes appearance. All vinyl is different and results vary.

For Chrome vinyl, extra care is necessary as it is easily prone to scratching and swirls.
