  - Night Fly's
  - Float Fly

This is the perfect environment for both new and experienced pilots. Our club offers fun for the whole family. If you are new to the hobby or an experienced flyer looking for a field in the area, come out and join us. The club was informally organized in 1969 and chartered with the AMA in 1971. Club members fly a variety of aircraft from large scale gas airplanes to small electric assisted gliders. They range from RTF's to scratch-built works of art. Club Meetings are held the second Wednesday of each month at 7:00pm at the club field (weather permitting) or in the case of inclement weather the club meeting is held at the Marion Township Hall on West Coon Lake Road.
