

Problem Solved, LLC

Design & Fabrication Services

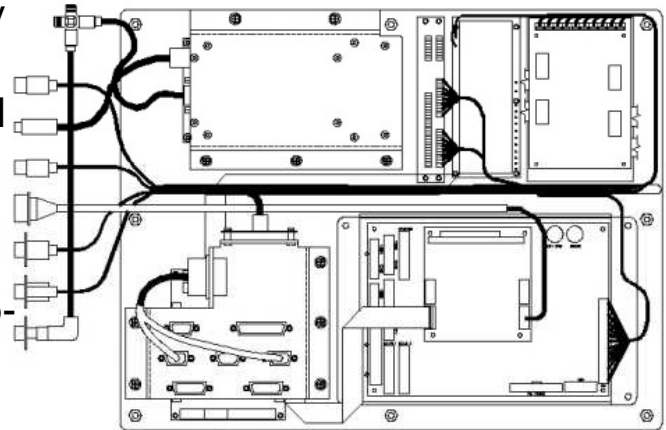

Problem Solved, LLC (PSLLC) is a small company located in North Alabama, specializing in providing Electro-Mechanical Design, Welding, and Metal Fabrication services.

PSLLC has extensive experience in solving customer problems, whether small or large, custom one-off parts to manufacturing assemblies and/or supporting programs.

With an Electro-Mechanical Design background spanning over 20 years, PSLLC is able to offer our customers not only quality fabrication but also detailing, design, and engineering assistance.

We offer a full range of material processing, design, and fabrication.

We develop prototypes from drawings quickly and precisely. After the prototype is initially fabricated, it is scrutinized to the highest level to ensure specified compliance is achieved. We thoroughly examine the component in order to improve production quality, functionality, and cost. All of our hard work up-front allows us to produce a product that performs flawlessly.

From small, production run parts, to large weldments, we have the expertise and equipment to get your job done. From raw material to a high quality painted product, our team can handle small to large quantity items and on time deliveries. Our experienced welders regularly weld steel, stainless steel and aluminum, in a variety of welding processes.

PSLLC is your one stop shop to your design & fabrication solutions.

Problem Solved, LLC

Design & Fabrication Services

DESIGN SERVICES:

Computer Generated Design
System Design Engineering Support
Electro-Mechanical Packaging
Reverse (Obsolescence) Engineering
Research and Development
Technical Risk Reduction Analysis
Electronic Hardware Interface Design
Cable Wire Harness Design
Technical Data Package (TDP) Support
Technical Manual (TM) Support
Field Service Support

FABRICATION SERVICES:

Metal Fabrication
Bending, Forming, & Cutting
Machining Services
Plastic & Nylon Composites
Welding Services
Steel, Aluminum, & Stainless Steel
Painting/Finishing
Production
Custom Fabrication: Hospital Equipment, Commercial
Awnings, Trailers, Handrails, Racks, Portable Hoist, etc.
