## The Spinneybeck Leather Maintenance Kits

Leather that is properly maintained can last a lifetime. When cleaning leather you should never use solvents, saddle soaps, abrasives, or products with inappropriate pH levels. Spinneybeck has developed Leather Maintenance Kits especially formulated to care for different types of leather.

---

Arizona, Belting Leather, Capri,  
Copenhagen, Cordovan,  
Distressed, Prima, Riva and Saddle

### Finished Leather Maintenance Kit

Finished Leathers are the most popular and have smooth, satiny finishes. The protective finishes make them most widely used for high traffic areas or contract use.

Leather Maintenance Kit for Finished Leathers consists of two special solutions. The first is a special Cleaner, Conditioner & Protector that both removes soil and restores moisture to the leather. The second solution is an Ink Remover formulated for use on all of our leathers.

### Aniline Leather Maintenance Kit

Aniline Leathers have no surface finish to mask the natural state of the leather, and therefore have little or no protection against spillage or staining. These leathers will patina, or improve their appearance with age, but may not be practical for all applications.

Leather Maintenance Kit for Aniline Leathers also consists of two special solutions. In addition to the Ink Remover, this kit includes a versatile Cleaner, Conditioner & Protector that removes soil without damaging the delicate surface of Aniline Leathers.
