PHILIPS V-60		
FOR USE WITH	PART NUMBER	DESCRIPTION
V-60	RENTAL-RM-801	Fisher Paykel Heater and Cable/Probe
	RENTAL-RM-505	Transport Oxygen Manifold
	V-60-6F	5 Pack of Inlet Filters
	RB-002	Support Arm Rail Bracket
	116-56	Support Arm

The Philips Respironics V60 Ventilator is an assist ventilator that is intended to augment patient breathing. It is intended for spontaneously breathing individuals who require mechanical ventilation.

### V60 AVAILABLE WITH HIGH FLOW THERAPY CAPABILITY

-Allows clinician to switch between NIV and HFT as patient condition changes

RESPIRONICS BiPAP VISION		
FOR USE WITH	PART NUMBER	DESCRIPTION
BiPAP VISION	RENTAL-RM-801	Fisher Paykel Heater and Cable/Probe
	VIS-6F	Replacement Inlet Filter 6/pack
	RB-002	Support Arm Rail Bracket
	116-56	Support Arm

The BiPAP Vision System offers a form of sub-acute therapy for patients and may eliminate the need for intubation in appropriate candidates. The integrated display screen uses easy-to-read real time graphics in waveforms or bar scale format to provide enhanced monitoring for caregivers. Auto-Trak Sensitivity ensures optimum sensitivity despite changing breathing patterns or circuit leaks.

# VENTILATORS

PURITAN BENNETT 980 VENTILATOR		
FOR USE WITH	PART NUMBER	DESCRIPTION
PB 980	RENTAL-RM-801	Fisher Paykel Heater With Cable/Probe
	10043551	Expiratory Filter

The Puritan Bennett 980 ventilator system helps patients breathe more naturally through innovative breath delivery technology. The Puritan Bennett 980 has an intuitive and highly configurable touch screen display that gives clinicians the options to see as little or as much information as needed including five graph and loop layout options. The 980 is equipped with an expiratory filtration system. The ventilator assurance feature will, in the event of certain system failures, will continue to deliver ventilatory support as close to the preset settings as feasible.

# VENTILATORS

MAQUET SERVO-I VENTILATOR		
FOR USE WITH	PART NUMBER	DESCRIPTION
SERVO-I	RENTAL-RM-801	Fisher Paykel Heater With Cable/Ptobe
SERVO-1	64-87-180	Servo I - Replacement battery

The Servo – I ventilator is a flexible ventilation platform and is available for both infants and adults. These configurations for the Servo-I are equipped with a number of ventilation modes that are suitable for each patient category. Ventilation is accomplished via either Invasive or Non-Invasive Intubation. The Non-Intubation mode also features leakage compensation, the Servo-I also has a transport mode.

**\*AVAILABLE IN INFANT AND ADULT MODES**

# BiPAP

PHILLIPS V-30		
FOR USE WITH	PART NUMBER	DESCRIPTION
V 30	RENTAL-RM-801	Fisher Paykel Heater With Cable/Probe

The Respironics V30 ventilator Auto BiPAP airway management system offers cost-effective treatment of obstructive sleep apnea patients. The V30 Auto features:

Nine flexible ventilation therapy modes

Auto-titrating BiPAP

Customizable ventilator alarms, a simple interface, and a convenient roll-stand

The V30 Auto is designed to improve operational efficiency while addressing the needs of your low-acuity, non-invasive ventilation patients.

RESPIRONICS SYSTEM ONE BiPAP AUTO		
FOR USE WITH	PART NUMBER	DESCRIPTION
SYSTEM ONE	1063785	Disposable Water Chamber

Philips Respironics revolutionized sleep therapy by introducing bi-level positive airway pressure technology to treat obstructive sleep apnea. Emulating natural breathing with pressure relief at inhalation and exhalation, this proven technology does more than provide highly effective therapy – it delivers a level of comfort that can mean the difference between compliance and non-compliance for patients having difficulty adapting to traditional CPAP therapy.

# HIGH FLOW OXYGEN THERAPY

FISHER PAYKEL AIRVO 2		
FOR USE WITH	PART NUMBER	DESCRIPTION
AIRVO 2	RENTAL-RM-801	Fisher Paykel Heater With Cables
	900PT600	Red Disinfection Tube
	900PT501	Tube and Chamber Kit
	OPT942	Small Nasal Cannula
	OPT944	Medium Nasal Cannula
	OPT946	Large Nasal Cannula

The AIRVO 2 system features a humidifier with integrated flow source that delivers high flows of air/oxygen mixtures to spontaneously breathing patients, through a variety of interfaces up to **60 L/min**. The AIRVO 2 is an integrated system providing versatility, mobility and convenience.

**IDEAL FOR ROOMS WITHOUT PIPED MEDICAL AIR**

FISHER PAYKEL OPTIFLOW / MAXVENTURI		
FOR USE WITH	PART NUMBER	DESCRIPTION
OPTIFLOW / MAXVENTURI	RT202	Circuit & Chamber Kit
	OPT942	Small Nasal Cannula
	OPT944	Medium Nasal Cannula
	OPT946	Large Nasal Cannula
	MAX250-E	Replacement Oxygen Sensor

The MaxVenturi has been specifically designed to work with high-flow Optiflow canulas. Using the Venturi principle, the MaxVenturi allows users to mix ambient air and oxygen without the need for piped medical-grade air. This is the perfect solution for adult high-flow oxygen therapy in almost any environment. Maxventuri delivers up to **60 L/Min of blended gas**.

# HIGH FLOW OXYGEN THERAPY

VAPOTHERM-PRECISION FLOW		
FOR USE WITH	PART NUMBER	DESCRIPTION
VAPOTHERM PRECISION FLOW	PF-DPC-HIGH	High Flow Kit-Circuit & Cannula 5-40 LPM
	PF-DPC-LOW	Low Flow Kit-Circuit & Cannula 1-8 LPM
	MAX250	Replacement Oxygen Sensor

Vapotherm Precision Flow is designed for ease of use in mind. Control flow, oxygen, and temperature independently with the push of a single button. Vapotherm can be used on Neonates to Adults.

Flow up to 40 LPM

HIGH FLOW BLENDER AND FISHER PAYKEL HEATER		
FOR USE WITH	PART NUMBER	DESCRIPTION
HIGH FLOW BLENDER & HEATER	RT202	Circuit & Chamber Kit
	OPT942	Small Nasal Cannula
	OPT944	Medium Nasal Cannula
	OPT946	Large Nasal Cannula

The High Flow Air/Oxygen Blender / Optiflow system uses a blender, 70 and 15 LPM flowmeter to deliver precise, humidified, blended gasses to patients up to **70 LPM**. Oxygen concentrations are adjustable form **21% to 100%**. When used in conjunction with the Optiflow nasal canulas, this system offers the ability to comfortably deliver a wide range of oxygen therapy.

# THERAPY EQUIPMENT

## HILL-ROM THE VEST

FOR USE WITH	PART NUMBER	DESCRIPTION
<b>THE VEST UNIT</b>	P300629000	X-Small Wrap - 19 inches-23 inches
	P300630000	Small Wrap - 23 inches-33 inches
	P300631000	Medium Wrap - 33 inches-43 inches
	P300632000	Large Wrap - 43 inches-53 inches
	P300633000	X Large Wrap - 53 inches-67 inches
	P300634000	XX Large Wrap - 67 inches-75 inches

The Vest Airway Clearance System is designed to assist patients in the mobilization of retained secretions. If not removed, retained secretions may contribute to increased rates of respiratory infection, hospitalization, and reduced lung function.

Through High Frequency Chest Wall Oscillation technology, The Vest® Airway Clearance System dislodges mucus from the bronchial walls, and mobilizes secretions and mucus from the smaller to larger airways where it can be cleared by coughing or suctioning.

## HILL-ROM METANEB

The MetaNeb System is indicated for mobilization of secretions, lung expansion therapy, the treatment and prevention of pulmonary atelectasis, and also has the ability to provide supplemental oxygen when used with compressed oxygen.

Metaneb introduces continuous high frequency oscillation (CHFO) therapy immediately after lungs have been expanded through continuous positive expiratory pressure (CPEP) The Metaneb also integrates aerosol delivery of medications for maximum efficiency.

# THErapy EQUIPMENT

## RESPIRONICS COUGH ASSIST

Cough Assist safely removes broncho-pulmonary secretions by stimulating individual to cough. This is a desired approach to respiratory therapy as it's less invasive over suctioning the bronchial secretions. Respiratory Therapy is vital for individuals with respiratory conditions that make it difficult to cough and therefore mucus builds up which increases risk of respiratory infections. This model offers both automatic and manual modes of operation. Therapy involves slow inhale and rapid exhale of airflow to create positive to negative pressure. This loosens the mucus to stimulate a cough consisting of five coughing cycles.

## PHILIPS RESPIRONICS COUGH ASSIST T-70

CoughAssist T70 is a mechanical insufflation-exsufflation device designed to noninvasively clear secretions from the lungs by simulating a natural cough. Similar to a normal deep breath, CoughAssist gradually applies positive air pressure (insufflation) to obtain a large volume of air within the lungs. The device then quickly reverses the flow of air by shifting to negative air pressure. The resulting high expiratory flow helps mobilize secretions out of the airway as a deep, natural cough would do.
