

Xander Glasses

A smart glass showing real-time captions of what other people are saying. These lightweight, comfortable display the captions is in obtrusive, allowing the wearer to follow conversations while looking directly at the speaker and surroundings. Xander Glasses allow people who are hard of hearing to clearly understand who is speaking to them, whether at home, work, or in a noisy public venue. This helps people feel more confident and relaxed during conversations. The noise-cancelling microphones capture clear speech from conversations. The speech-to-text technology is built-in to the glasses, which means one need not to rely on your smartphone or connect to WiFi.
