

Blue Group: Your Task

You are planning a big Thanksgiving feast for **24 people**. You have a **budget of \$100** to buy the food items below. You must use **multiplication and division** to create a budget. Work together by assigning each member of your group a food item. Each person is to calculate enough food to feed 24 people. **Show all of your work and calculate the total cost of the feast.** Do you have enough money?

<p>Apple Cider: \$3.75 per gallon. One gallon serves 12 people</p> <p>\$2.25 per half gallon ½ half gallon serves 6 people.</p>	<p>Mashed Potatoes: \$1.50 for a 3 pound bag. 3 pounds serves 8 people.</p>	<p>Green Beans: \$1.09 for a large can A large can serves 4 people.</p> <p>\$0.79 for a small can A small can serves 2 people.</p>
<p>Turkey \$1.25 per pound. A 10 pound turkey serves 8 people. A 12 pound turkey serves 12 people.</p>	<p>Dinner Rolls: \$2.50 per package. One package will serve 8 people.</p>	
	<p>Pumpkin Pie: \$6.50 for a small pie. A small pie serves 6 people. \$8.50 for a large pie. A large pie serves 8 people.</p>

Blue Group: Your Solution	
Final Cost for Each Item:	All members of the team should write in the final cost for the food item they calculated.
Cider: \$ _____	Next, use addition to get a total cost of the food items.
Turkey: \$ _____	Then tell me if you were able to stay in a budget of \$100.
Mashed Potatoes: \$ _____	
Green Beans: \$ _____	
Dinner Rolls: \$ _____	
Pumpkin Pie: \$ _____	
TOTAL: \$ _____	
Are you in budget of \$100? YES NO	

Blue Group: Your Reflection / Exit Slip

Your name: _____

Was your team able to purchase all of the food items to serve 24 people AND stay within a budget of \$100?

How did multiplication and division make your task easier?

How could you have used estimation to make your task easier?

Purple Group: Your Task

Your school is running a Thanksgiving pie sale!
You have to calculate how much money the school made from selling all of the pies. Work together by assigning each member of your group a class. If there is an extra class share it. **Use multiplication to calculate the totals for each class.** Once all the classes are totaled, tell me how much the school made in the pie sale.

Using the information below, **show all of your work!**

Small pies cost **\$6.25 each**

Large pies cost **\$8.50 each**

Orders by Class:

Room 257:	11 small 6 large
Room 256:	2 small 13 large
Room 253:	5 small 5 large
Room 244:	8 small 12 large
Room 260:	3 small 9 large
Room 263:	7 small 2 large

Green Group: Your Reflection / Exit Slip

Your name: _____

Look at your total cost per person column. How could you have used estimation to make your task easier?

Orange Group: Your Task

Your group is buying items for a Thanksgiving meal. Using money, you will have to show your responses to the questions. You will need the prices below.

Turkey: \$32.24

Rolls: \$6.95

Corn: \$3.20

**Mashed Potatoes:
\$4.70**

**Pumpkin Pie:
\$9.99**

Orange Group: Your Task

1. What is the most expensive item? _____ Least expensive? _____
2. **How much more** is the turkey than the mashed potatoes?
3. How much would **6 pumpkin pies** cost?
4. If you bought **corn AND bread**, how much would you spend?

Orange Group: Your Task

5. How many turkeys could you buy if you had **\$100 to spend**?

6. If you purchased **all five items**, how much would you spend altogether?

Orange Group: Your Reflection / Exit Slip

Your name: _____

Using money, show me how you would solve: $\$2.35 \times 6$

How could you estimate a solution to $\$2.35 \times 6$?
