

HEATERS

In-line Heater

The whirlpool bathtub In-Line Heater is an option that has been specifically designed to enhance enjoyment of your whirlpool bathtub. Once filled, the warm, relaxing temperature of your whirlpool bath is constantly maintained by the built-in thermostat, for as long as you desire. The in-line heater is totally self-contained and is available in either 110 volt or 220 volt models.

Hydro Fusion

Hydro Fusion is a heater option that is independent of a whirlpool system. It will maintain the water temperature in a soaker or Thermal Air tub, operating silently.

Hydro Blanket

Close your eyes, lean back and feel the warmth of the Hydro Blanket that emanates through the acrylic tub surface. By integrating radiant heat panels into the structure of your bathtub the result is a seamless improvement in your overall bathing experience. To best satisfy our full array of models & personalize your experience, we offer multi-zone heat allowing you to pick from 2 – 5 heat zones on your bath. Your bath, your desired session, your design... Simply improved.
