

*From 3D Hollywood fantasy to...*

*3D broadcast reality*

***Telecast Fiber's 3D solutions simplify the production of "the" Hollywood blockbuster hit, live World Cup Soccer, and everyday 3D broadcast.***

Telecast's patented, widely used CopperHead™ camera-mounted transceiver elegantly supports dual-camera 3D rigs, putting all bi-directional camera program video/audio, intercom and control data onto just one lightweight "tactical" fiber cable. Or use SMPTE 311M hybrid cable for power to the rig, too. We also work side by side with cutting-edge 3D production companies, developing custom fiber optic solutions using Telecast's standard products as "building blocks."

As 3D grows, we'll be there to help you with the fiber solutions you'll need. And that's no fantasy.
