

City Uses High Performance Interlayer To Control Cracking on Composite Pavement

GENERAL INFORMATION

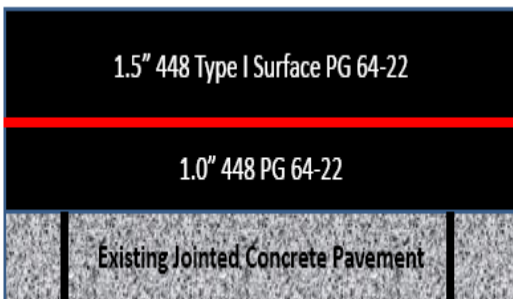

Project Title: Lena Drive Resurfacing
Property Owner: City of Aurora
Location: East of 306 in Industrial Zone
Product Used: GlasPave 50
Quantity: Aprox. 15,000sy
Install Date: July 2012
Contact: John Trew
 Public Works Director
 City of Aurora

BACKGROUND

Reason for Product Use:
 Past performance on prior resurfacings influenced the owner to utilize this product over the old concrete pavement rather than employing conventional resurfacing design.
Problem Being Addressed:
 Reflective cracking over jointed concrete pavement.

RESULTS

Installation went smoothly with zero construction delays or issues. City will monitor performance annually.

→ GlasPave 50 Reinforcement & Waterproofing
