

MADE IN THE U. S. A.

COMFORT ZONE Mattresses

ComfortZone pressure redistribution mattresses are manufactured in the USA, (Huffman, TX) from the highest quality materials and workmanship. ComfortZone mattresses are designed to provide pressure redistribution above and beyond standard hospital mattresses to assist in preventing and treating pressure ulcers*.

ComfortZone (CM-100F) Foam Mattress Replacement

- Single Density High spec pressure reduction foam to assist in the prevention of pressure ulcers.
- The soft comfortable low shear, low friction nylon cover reduces shear and friction forces and is moisture repellant.

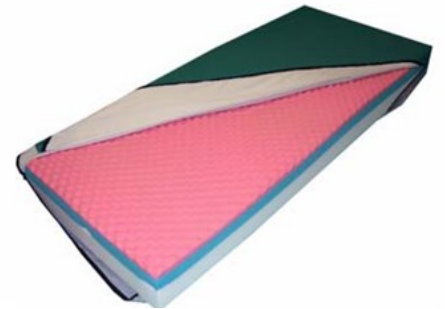

ComfortZone (CURVE) Foam Mattress Replacement

- Varying size channels allow the Curve to provide zoned pressure redistribution from a single piece high-spec foam.
- The soft comfortable low shear, low friction nylon cover reduces shear and friction forces and is moisture repellant.

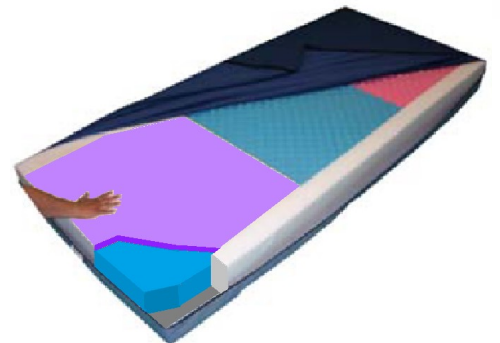

ComfortZone (CM-MDM-100) Multi-Density Mattress

- Layered multi-density high spec pressure reduction foam is combined to provide advanced pressure redistribution to aid in the prevention of pressure ulcers.
- Four-way stretch cover further enhances advanced pressure reduction. Low shear, low friction and water-proof.

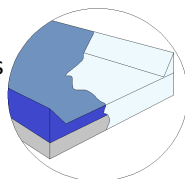

Premiere (CM-Premiere) Multi-Zoned Replacement

- Three separate foam density zones including memory foam in the heel/foot zone for most advanced pressure redistribution.
- High density lateral sides for stable lateral support.
- Four-way stretch, fluid resistant, low friction cover.
- Heavy-duty vinyl base for added durability.
- 5 year limited warranty.

Each of our ComfortZone Mattresses are available with built in side bolsters.

All ComfortZone Mattresses meet the latest Federal flammability standards.
