*Proudly Crafted in the USA!*

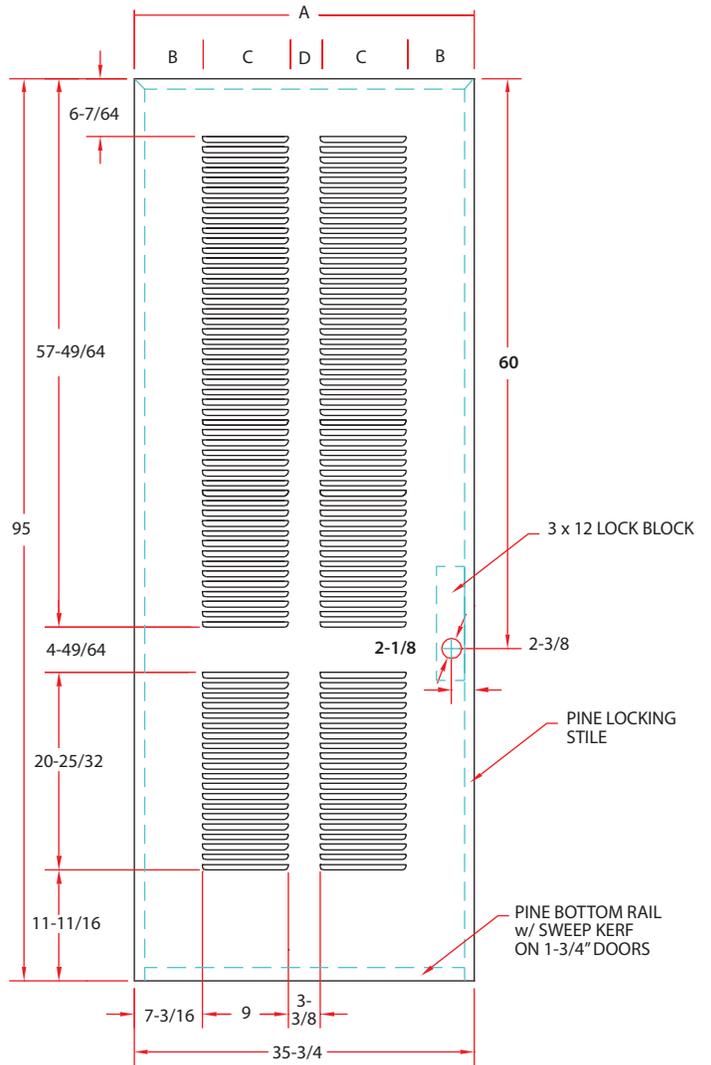

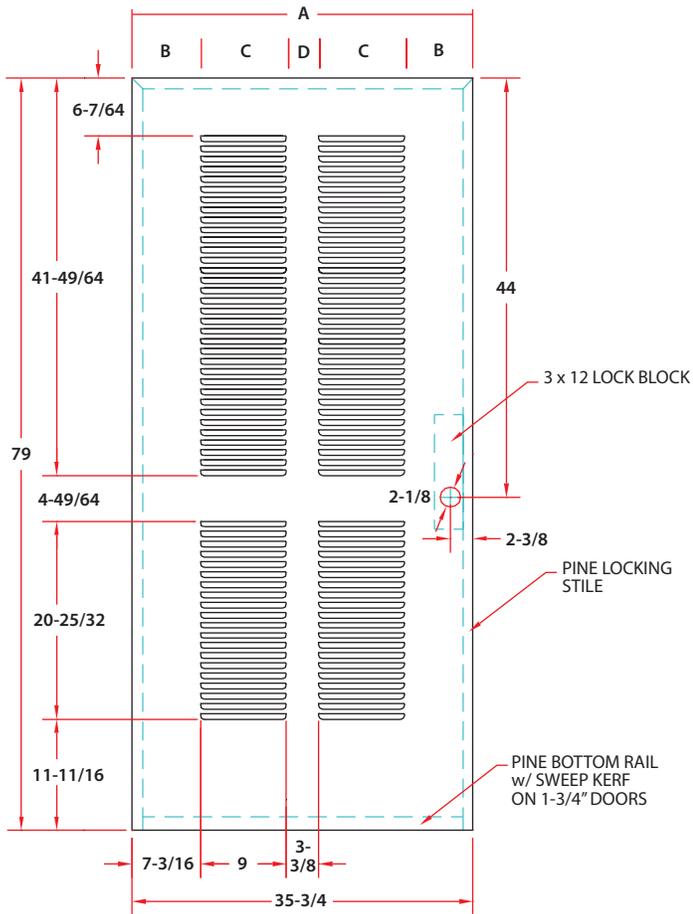

## *Residential Metal Louver Utility Door*

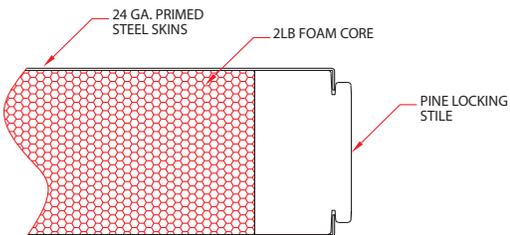

This residential steel utility door features metal louvers pressed into the skin on both sides for full ventilation. Made from 24-gauge galvanized steel with internal bracing and is pre-primed to accept finish paint. Doors have softwood stiles for easy machining and typical hardware applications. Bored for lockset 2-1/8" bore with 2-3/8" backset or available with no bore. Perfect for utility applications where ventilation is desired. Kerfed bottom rail on 1-3/4" doors accepts popular door sweeps. Doors are not fire rated.

- Integral pressed metal louvers
- Wood stiles for easy hardware application
- Single bore prep for cylindrical lockset 2-1/8" x 2-3/8"
- Also available with no bore
- Primed galvanized 24-gauge steel
- 11-11/16" bottom rail
- 1-3/8" and 1-3/4" thick
- 6/8 and 8/0 high
