Evolution is 1GOD's favorite creation.

Evolution was created to help **1GOD's** other creations survive. New creations & imperfections in previous creations resulted in changing surroundings & survival chances. They needed modifying & evolving.

Scroll: 6, Khronicle, Week 1 Day 2.

... The newly created mixtures were slightly imperfect, unequal, different, just the way **1GOD** liked it. The '**Cycle of Beginning & End & Recycling**' (*Birth _ Death _ use remains*) is used by Evolution. Evolution being imperfect made mistakes but also resulted in uniqueness. Nothing is perfect or without mistakes. Imperfection started **Evolution**.

1G O D's Evolution versus Human interference.

After the 'Cycle of Beginning & End & Recycling' Evolution works by modifying to adapt to changed circumstance. This modifying takes into consideration all parts of a changed circumstance. Modifying creates multiple outcome possibilities. **The most adaptable will survive not the fittest.**

Human interference sets an outcome (*not an unknown 1*) GM (*genetic-modification*) or Cloning without considering imperfection, changing circumstances & adaptability. Resulting in increasing unknown dangers & decreasing (*weakening*) survival. GM & Cloning are the greatest threat to Human survival, as well as other species & vegetation.

GM-Crop is Anti-**1GOD** a threat to humankind, environment & all other creatures. GM-Crop is grown for feed of Farm Animals & manufacture GM Food. The food creatures eat influences their digestion. To digest Modified plants a creatures digestive system must modify (*genetic re-engineer*) itself via Evolution. This unnatural (*Anti-1GOD*) type Evolution creates unnatural new types of Mutations. **These Mutations have a flow-on effect altering the whole Food-chain. Resulting in new Health (diseases) & Survival (incurable) threats. This applies to all creatures (e. g. humans) eating GM-Crop direct or indirect (e. g. eating meat).**

GM-Food: Alfalfa, Baby-food, Bacon, Bread, Breakfast-Cereal, Canola, Chicory, Corn, Cotton-seed oil, Eggs, Ham, Margarine, Meat, Papaya, Peas, Potato, Poultry, Sausages, Soybean, Sugar-beet, Sugarcane, Sweet-Peppers, Tomatoes, Wheat, Zucchini,...

Bees stay clear of GM-Crop knowing it is not good for them. [More GM-Crop = less food for bees. Less food for Bees less honey...](#)

MUST – DO :

Government eliminates Threat by *scorching* GM-Research & Seed manufacturing facilities. GM Crops are burned. Contaminated Soil were GM-Crops were grown is scorched 3 years running. Government that doesn't implement this 'Treatment' is replaced.

Government prosecutes: GM-Scientist, manufacturing Executives, Directors, Owners & Crop-Growers for "Crime against Humankind & against the Ecosystem". **MS/R7.**

Zero Tolerance to Genetic Modifying & Cloning of Humans, Other Species or Vegetation..
