

# Tank Compliance for Commercial Operators

Even if selling gas isn't your business...

If you store fuel in a UST, staying on top of the regulations and protecting your assets needs to be.

Storing and dispensing fuel may not be how your business makes money, but it can be a very quick way to lose a whole lot of it.

Federal, state and local environmental regulations are no less applicable to non-retail fuel facilities – and they continue to get more stringent all the time.

Are you confident that your facility is up-to-date with the latest regulations and that your compliance program is adequately protecting you from a costly leak of fuel?

**Tanknology** is the largest company in the United States devoted to the testing and related compliance services for fuel tank systems, with extensive experience in the complexities of non-retail fueling facilities.

**UST Inspection Services, Inc** is Massachusetts' leader in Third-Party Inspections for fuel systems operators, specializing in the complexities of permitting, environmental investigation and remediation services.

**Together, we can help you manage complex environmental regulations at fuel storage and dispensing facilities. Here is a list of just some of our services:**

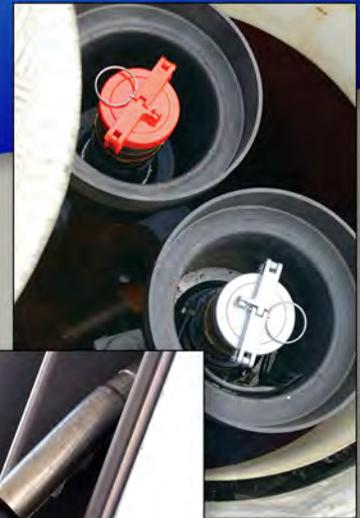

- Tank, Line & Leak Detection Testing
- Third-Party Inspection Services
- Stage II Vapor Recovery Testing and Training
- Phase I Site Assessments
- Monitoring System Installations, Certifications and Repair
- Above Ground Store Tank (AST) Inspection and Testing
- And much, much more...

Whether you desire a turn-key compliance solution for your facility or help with a single environmental regulatory issue, call UST Inspection Services at (781) 383-8783.
