

# PUMP MOTOR COVER

Made in USA

BUILT TO LAST & DESIGNED TO PROTECT

White PVC reflects the sun's heat

Motor Cover shields the pump's motor from rain & roof runoff

Round, dome-like design, directs air to flow in and around the pump's motor

6 vent holes are strategically placed to allow ample cross ventilation

Made of Durable PVC:  
Corrosion,  
Chemical & UV  
Resistant

Pavilion-like shelter keeps the pump's motor cool by providing shade & blocking direct sunlight

Partial back piece allows clearance for electrical conduit and provides additional ventilation

All hardware is made of Aluminum and is Rust-Free

Reduces the motor's surface temperature by an average of 15 degrees

**PATENT  
PENDING**

Available in two sizes

Single Speed Dimensions: 16" Long X 11" Wide X 11" High  
Variable Speed Dimensions: 16" Long X 11" Wide X 15.5" High
