EXECUTIVE EXPERIENCE

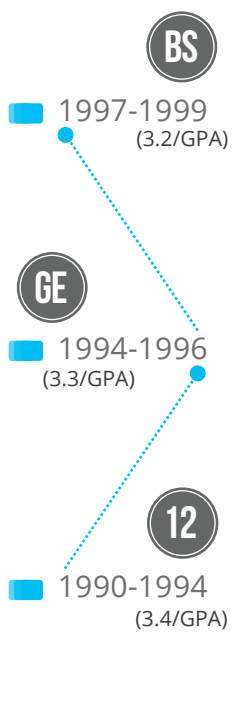

2009-2013
Flux Power Inc. (OTC: FLUX)
CEO/Founder
Flux Power was founded in 2009 to bring cost efficient lithium storage systems to the EV, Grid (Solar, Back-Up, Peak-Shaving) and Industrial Equipment Markets. Since inception Flux has developed compelling Intellectual Property, shipped over 60,000 batteries, and recognized almost \$10m in revenue with notable customers such as Hyster, GM, Toyota, GE, General Atomics, and Quantum Technologies. Flux also completed a merger to become a public company in June of 2012.

2005-2009
Aptera Motors Inc.
COO/Co-Founder
Aptera Motors Inc. was conceived to deliver to the world the most efficient commuter car ever built. A production worthy design was developed through the use of Computational Fluid Dynamics, Advanced Composites, and EV Technologies. With much industry and public interest Aptera raised \$62m for production efforts. Unfortunately, while under new leadership Aptera was unsuccessful in a \$300m bid for DOE funding and closed its doors in late 2011.

2002-Present
Epic Boats LLC.
CEO/Founder then R&D Advisor
Epic Boats was created to enhance the sport of wakeboarding through better boat design. With the use of Computational Fluid Dynamics, a superior hull was created in CAD and then built by hand in a driveway. This design proved superior to existing boat hulls in many ways and once coupled with Vector Steering, Transom Audio and Resin Infusion, this design has become a professional standard for competitions around the world. Epic now employs over 100 people and builds a diverse line of boats in Vivian, Louisiana.

EDUCATION

1997-1999
BS
(3.2/GPA)
Univ. of North Carolina
Wilmington, NC
Transferred to UNC to complete a Bachelor of Science in Finance at the Cameron School of Business. Led as an athlete and coached our track and field team to 3 Conference Championships

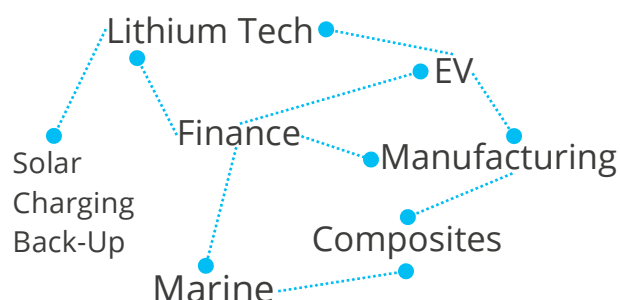

1994-1996
GE
(3.3/GPA)
Northern Arizona Univ.
Flagstaff, AZ
Completed general education courses and selected Finance as my focus. Honored as a Scholar Athlete in football and track and was active with the Sigma Nu Fraternity.

1990-1994
12
(3.4/GPA)
Croughton Int. School
Croughton, England
This was my second international High School, the first being in Germany. Excelled in academics, graduating with Honors, and competed for the British Junior National Track and Field Team.

AWARDS/RECOGNITION

-  Breakthrough Innovator: Popular Mechanics - Aptera - 2009
-  Best Sci-Fi Car of All Time: Jalopnik - Aptera/Star Trek - 2013
-  FutureTech Innovator: Museum of Science and Industry - Epic/Aptera - 2010
-  Products Featured in; Magazines: Time, Popular Science, Wired - Movies: Star Trek, Shark Night 3D - TV: 60 Minutes, Family Guy
