Dean had to hire a licensed individual to trim some of the taller palm trees as they have gotten to the height that his insurance coverage no longer covers him to trim them (approx. 12 trees). This will generate an additional expense that will become an ongoing budget consideration, as the palms grow taller. It will be taken into consideration when next years budget is proposed. In addition, diseased palm trees will be removed. No type palm can be planted where a diseased palm is taken out but woody trees or shrubs can be planted. Dean is aware to clean any equipment used to cut diseased palms.
