

Tahoe

Turf Type Tall Fescue

Product Sheet

CHARACTERISTICS

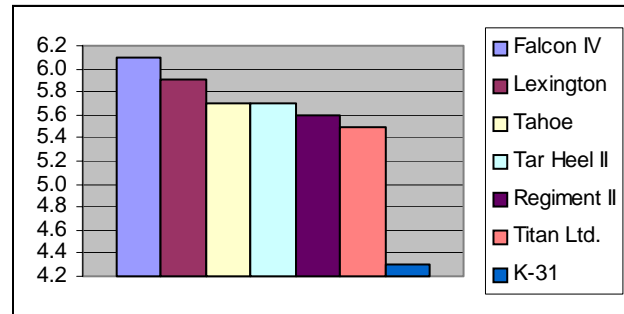

Tahoe is an advanced generation variety developed from naturalized selections for improved summer performance and overall turf quality.

Tahoe exhibits very good turf quality, genetic color, summer turf density, good leaf texture, early spring green-up, brown patch resistance and improved wear tolerance.

Tahoe is adapted well for the Southeast, South, Mid-Atlantic, Midwest and Western regions. It has shown good disease resistance and good recuperative potential due to aggressive tillers.

TRIAL DATA

2001 National Tall Fescue Test
2002-05 Data
Maintenance Using "Schedule B"
Ratings 1-9, 9=Ideal Turf

SEEDING RATE

8-10 LBS/1,000 square feet for new establishment
4-5 LBS/1,000 square feet for overseeding

BENEFITS

- Improved Summer Activity
- Dark Green Color
- Good Establishment
- Good Disease Resistance
