

Adopt a Working Cat

Save a Life!

All natural, pesticide free, pest control.

These are Working Cats, former street cats used to outdoor living who prefer little to no human contact, and will control your rodent problems.

You'll be saving lives!

Barn, yard, and warehouse homes are the last option for these cats, without them there is no place else for them to go.

Working Cats have been altered.

No need to worry about endless litters of kittens.

Your Obligations:

The ground owners who adopt them agree to give them:

- Daily Food and Water– Cats can't live on mice alone
- Shelter in a barn, outbuilding, stable, warehouse, or permanent feral cat enclosure.
- Vet care, as needed (Cats will arrive with clean bill of health)
- A secure place to acclimate the cats to their new home for at least 4 weeks. This must be a secure area or acclimation cage that cats can't escape. TNR Riverside can help guide you through set up and may be able to offer a temporary enclosure for 1 month.

For more information visit www.TNRriverside.org or email TNRriverside@yahoo.com
