

FREE Workshop for Small Water Systems

Compliance with the Safe Drinking Water Act

November 15, 2023

8:00 am – 5:00 pm

Maryland Department of the Environment

1800 Washington Blvd., Baltimore, MD 21230

AWWA/RCAP is offering a **FREE** one-day workshop on compliance with the Safe Drinking Water Act (SDWA). **Lunch is included!**

The Workshop will cover the following topics:

- AWIA Small Systems Resilience – *This topic provides a refresh of the AWIA Deadlines and Requirements; introduces AWWA/RCAP Risk & Resiliency Resources for RRAs and ERPs; and equips small systems to be resilient to all hazards.*
- Regulatory Overview – *Presented by Maryland Department of the Environment.*
- PFAS – Contaminant of Concern – *Attendees will achieve greater knowledge of PFAS/PFOA and associated health concerns; understand current regulations; identify proper sampling procedures; understand how to address the problem and identify resources for assistance.*
- Distribution System Infrastructure and Water Quality – *Covers problems with common Distribution System components (piping, valves, storage tanks, and hydrants), and how they can drastically affect water quality, and public health. Provides preventive actions and solutions to common problems. Includes a deep dive on Water Main Flushing.*
- Coliform Sampling – *Understand why coliform sampling is important for a public water system, and identify factors, conditions, and common issues that can lead to undesirable results when collecting samples*

Who Should Attend?

Operators, Superintendents, and Managers of Small Drinking Water Systems

Continuing Education

Content for this workshop will be submitted for operator continuing education approval by *Maryland Department of the Environment, Board of Waterworks and Waste System Operators*. **7 hours of instruction are scheduled.**
