<sup>c</sup>Estimated. <sup>4</sup>Revised.

<sup>1</sup>Grand totals, U.S. data, and estimated data are rounded to no more than three significant digits; may not add to totals shown.

<sup>2</sup>Includes data available through March 29, 2017. One cubic meter of peat equals 0.8806 metric ton.

<sup>3</sup>In addition to the countries listed, Austria, Chile, Iceland, Italy, and Romania produced negligible amounts of peat. Australia and New Zealand also produced peat, but information is inadequate to make reliable estimates of output levels.

<sup>4</sup>Reported figure.

<sup>5</sup>Data are for fiscal year ended April 5.
