Summer Updates

July 2018

Well here we are again, another wet month in Florida, summer rains have slowed us down a bit on projects, but we are still plugging away. Look at the pictures below the first picture (left) is # 6 Green, the next picture (center) is # 2 forward tee, and the last picture (right) is # 8 green, this is after an afternoon rain just over 6" on Friday July 27th

The new ADA accessible ramp was poured this month at the Hobby House. (picture right) we will be installing railings on entire ramp and then that will complete the job.

We installed 2 ADA lifts at the pool complex in July. One in the Pool and another in the Spa. Both lifts operate off hydraulic water pressure no electricity or battery packs are needed. They are very smooth and simple operating lifts

We purchased a couple of new lounge chairs for the pool that are about 3 inches higher than the old lounge chairs to make it a little easier to get in and out of. We are trying them out now. so far, they seem to be well liked. Should be able to purchase replacements and have them in by Nov 1st

Rows 60 and 70 on Gulf view are complete. All utilities were moved to the proper side, concrete was poured for patio, benches were installed on each patio and roads were installed.

What a great upgrade!!!!

#1 well pump ,motor and shaft were pulled this month and they are currently working on running cameras and inspection tools down the well to inspect the casing . we will determine what needs to be done after all

Sadly, we had to take down the tree between the Hobby House and the Citrus Center. We were maintenance pruning and saw that the center of the tree was rotten .

□

Have a Great Summer !!!!!

See Ya soon
