

Engineering Consultants Services, Inc.

ATLANTA, GEORGIA

NASHVILLE, TENNESSEE

ELECTRICAL AND MECHANICAL ENGINEERS

PHILOSOPHY

ECSI strives to exceed our client's expectations for service and engineering design for all its projects. Quality control procedure must be integrated with the project development from the start of the project, and continues throughout the design. A complete quality control and construct-ability review is completed prior to release of construction documents. This minority owned and operated company is an equal opportunity employer.

PROJECTS

We have a wide variety of project experience, from simple office buildings to large industrial, airports, water treatment plants, libraries and medical facilities, from small private schools to large middle and high schools and colleges. There is also a wide range in the scope of services we offer. They cover a comprehensive array of traditional MEP & FP design, value engineering based on cost analysis to determine best fits for the system operation and project budget, evaluation reports for existing installations, and LEED building systems design.
