

FALLSTOP® ADVENTURE SAFE LINK SSB®

SAFE LINK SSB® — The best selling and most advanced belay system worldwide

FALLSTOP® ADVENTURE

SAFE LINK SSB®

The smartest and most advanced belay system for aerial adventure parks and high ropes courses!

Conventional belay systems in ropes courses and aerial adventure parks allow climbers to voluntarily or involuntarily completely detach themselves from the safety line.

The SAFE LINK SSB® ensures that the climber is never detached from the safety line! Once attached, the interconnected carabiners can only be opened one at a time.

SAFE LINK SSB® ist available in 70 cm / 80 cm lengths

The only intelligent self-belay system in the world, the SAFE LINK SSB®, uses a "key & lock" system to only allow a participant to attach at a predesignated attachment point where a TWEEZLE®, the key, has been mounted. Apart from the safety advantages of having the participant always attached, with the use of the TWEEZLE®, the SSB does not allow clients to attach onto anything that is not designated as an attachment point. The TWEEZLE® allows the course operator to direct the client exactly where they want the client to go and the TWEEZLE® can be used to allow the operator to discharge the client at designated spots. By installing the TWEEZLES® on existing belay cables, the course can be retrofitted for SSB use with very little modifications of the course.

New to the market this year, is an SSB and TWEEZLE® system exclusively made for children. This allows operators to limit children to their own designated courses but be accompanied by an adult, who can use the smaller TWEEZLE®, but not vice-versa.

SAFE LINK SSB® — unique safety, optimum performance, and as smart as they come!

TWEEZLE®

The TWEEZLE® system used with the SSB, allows interconnecting carabiners to lock and unlock from one attachment point to the next, guiding the participant to designated points. The TWEEZLE® principle is the most advanced self-belay system in the world.

TWEEZLES® come in different colors which can be used to mark emergency exits or different course levels.

Children TWEEZLE®

The children TWEEZLE® does not allow children to access adult courses, if so desired.

TWEEZLES® are available in red, yellow, blue, black and green. The children TWEEZLE® is available in the color purple.

For fall arresting devices, Swings etc. we do have more different TWEEZLE®-solutions. Our consultants will happily support you during course construction or for the modification of your course.
