# LUPUS AWARENESS MONTH

What is Lupus? Many people have heard of Lupus, but only a few truly understand what this horrific illness is all about. Lupus is a chronic, autoimmune disease that affects many different parts of the body. In this illness, the body's immune system attacks itself because it cannot tell the difference between healthy tissue and foreign invaders, such as bacteria and viruses. Often times, Lupus symptoms, which can range from mild to life threatening, are mistaken for symptoms of other diseases making it hard to diagnose.

For information and insight, please visit:

<https://youtu.be/Q2XwzynYTqM>

**Living with Lupus....**
