

# POWERFILL™ SNORKEL

EXTERNAL SHALLOW-FILL FOR BAMBI BUCKET

The Bambi Powerfill Snorkel is one of the most recently sought after accessories for the Bambi Bucket product line. During fire season, especially today with extended drought, many of the existing natural water sources such as rivers, creeks, stream beds or alpine meadows are too shallow to fully dip a bucket. The Powerfill Snorkel gives the ability to fill the bucket in shallow water sources where dry summer conditions limit dip site possibilities. It also provides additional functionality for load regulation and quicker dips.

Powerfill Snorkel is retrofittable and provide hover filling capability in 18" (48 cm) at a maximum rate of 450 USG per minute. With its built-in flange, the snorkel can be bolted on in the field by one person in a matter of minutes.

The Powerfill Snorkel is available in Bambi Bucket models ranging between the 240 USG to 660 USG.

## FEATURES

- Fill bucket (450 USG/min) in only 18" (45 cm) of water with minimal debris uptake
- Maximize use of water in helicopter dip tanks
- Requires 45 Amps to operate
- The conventional dipping method may still be used with the Powerfill installed
- Retrofittable to most existing Bambi Buckets
- Increases operational efficiencies as almost any water source can now be used
- With the flange kit installed, the Powerfill pump can be bolted on for action, or removed in the field by one person

## BAMBI BUCKET WITH POWERFILL SNORKEL

MODEL	CURRENT DRAW	* FILL TIME
	AMPS	SEC
<b>BB2024</b>	45	30
<b>BB2226</b>	45	33
<b>BB2732</b>	45	45
<b>BB3542</b>	45	52
<b>BB4453</b>	45	65
<b>BB5566</b>	45	88

\* Fill times are based on completely empty to completely full, true fill time can be less if partial dip is possible.
