

Purely Organic—Amazing Results™

54 Green Acres is a Southern Oregon award winning farm producing quality craft cannabis with the highest combination of terpenes and THC to delight the mind and the body. The terpenes produce the smell, aroma, and taste that are derived from our genetics and thrive in our organic terroir.

We use all means possible to produce amazing aroma and quality bud structure. We complete our harvest early through regenerative farming and the deprivation of light during the growing cycle. This allows us to cure our flower longer thus enhancing a smooth flavor experience.

Our biodiverse garden is both Certified Kind™ and Sun & Earth Certified™. Our crystal clear water flows from Sucker Creek where our water rights were granted in 1882.

### Featured Cannabis 2024

#### SATIVA STRAINS

#### LINEAGE
