

YOU'RE IN THE DRIVERS SEAT

Connected Dash Cam Video Event Solutions

Fleet Management / Vehicle Tracking / Dash Cameras / Telematics

Driving Risk Visualized!

CGS Fleet Management is a leading global provider of connected solutions designed to remotely track, monitor, trace, control, manage, verify and secure fixed and mobile assets. CGS Fleet Management provides state of the art technology for vehicle tracking, dash cameras and telematics. We supply our clients with the tools to manage their company more efficiently and help save them money. Companies can have the visibility to see where each of their vehicles are located and the route they have traveled at any given moment. With technology like this you can see a breakdown of where you are losing money and how to reverse those actions. We work with most insurance companies to help provide a discount on company premiums if having a tracking device or dash camera installed in their vehicles.

FOR DRIVERS

- Prove your Innocence with What Really Happened
- Defend Against Driving Offense Allegations
- Protect Against Behavior Complaints
- Added Security & Theft Deterrent
- Vehicle Location, Speed & Driving Route

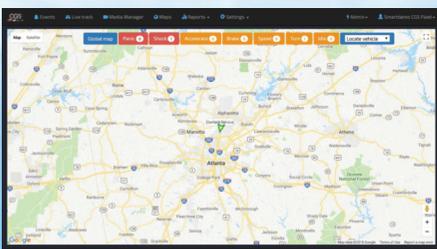

FOR EMPLOYERS
