

FIRST LUTHERAN CREATION CARE

Join us in our mission to create a sustainable and eco-friendly world.

Composting

JOIN US IN OUR MISSION TO CREATE A SUSTAINABLE AND ECO-FRIENDLY WORLD. OUR COMMUNITY-DRIVEN INITIATIVE IS DEDICATED TO PROMOTING ENVIRONMENTAL AWARENESS AND ACTION. WE BELIEVE THAT SMALL CHANGES CAN LEAD TO SIGNIFICANT IMPACTS.

WHAT?

- Certain items can be placed in a successful compost bin. They include "greens" and "browns."
- Greens are materials that are rich in nitrogen or protein. They are also the items that tend to heat a compost pile up.
- Browns are carbon or carbohydrate-rich materials. The main job of browns in a compost pile is to be food sources for all of the lovely soil-dwelling organisms that will work with the microbes to break down the contents of your compost pile.

TYPES OF BINS

- Open bins are easy to construct
- Closed bins, including rotating compost bins, allow you to compost without the threat of critters being attracted to your bin.

LIST OF GREENS

Grass clippings, coffee grounds, tea bags, fruit and vegetable scraps, eggshells, trimmings of perennials or annual plants

LIST OF BROWNS

- Leaves, pine needles, twigs, straw, sawdust, newspaper, cotton fabric, cardboard, dryer lint, chipped bark

Together, we can pave the way for a greener, healthier planet. Be the change you wish to see in the world and join us today!
