

GRAND COUNTY WATER CONSERVANCY DISTRICT  
GRAND COUNTY SPECIAL SERVICE DISTRICT  
SPECIAL MEETING ----- May 24, 1979

Meeting was called to order by Chairman Ken McDougald with the following Grand County Water Conservancy District members present: Bill Hines, Bob Norman, Ev Schumaker and D.L. Taylor. Also present: Dave Bretzke, Executive Director; Beulah Croasmun, Assistant Secretary; and Carl Carpenter from Nielsen, Maxwell & Wangsgard.

Attendance

Special Service District members present: Ken McDougald and Ev Schumaker.

Minutes of meeting held May 14, 1979 were read and approved as read.

Minute Approval

McDougald reported that Rollins, Brown & Gunnell should have the results this week on the additional testing performed on the bedrock area of the reservoir site.

Reservoir Blanket

Bretzke reported that Century Geophysical prepared geophysical logs on all three Schumaker Wells on Wednesday, May 16th. They ran a Gamma CP.S, S.P.MV, N-N CPS, and Resistance OHMS. They went to a depth of 206' on Well No. 1 and 221' on Well No. 3. Well No. 2 was plugged and they could only go down 12'. He said that the results were sent to Carl Carpenter and Larry Anderson for their review.

Schumaker Wells

Carl Carpenter stated that the logs do not show anything about the formation in Well No. 1. He said that it was his opinion that the shale formation is about where the driller's report indicated, and he thinks the well will yield a good quality and quantity of water if the bottom 10' is sealed off. Bretzke stated that Zimmerman bid \$700 to seal off the bottom 10'.

Board asked Bretzke to contact Mark Page about drilling Well No. 3 but not using any of the water until permits are received. If this is permissible, Board agreed to wait to test Well No. 1 until Well No. 3 is also ready to test.

Carpenter reported that Mark Page said the Corbin Well is being reviewed by the State Engineer, Dee Hansen.

Corbin Well

Discussion was held on the Highland Hills area. McDougald stated that the water rights were deeded and assigned from Grand County to the Grand County Water Conservancy District and the water and sewer system were deeded and assigned to Spanish Valley Water & Sewer Improvement District. Schumaker suggested that the Conservancy District should be taking care of the well and wholesaling the water to the Spanish Valley District. If this is done, Grand County would need to deed the land where the tanks are to the Conservancy District and the SVW&SID should deed the well and land where the well site is to GCWCD.

Highland Hills Area

Carpenter said that he did not think a 1/2 million gallon storage tank could supply enough water for fire protection in Spanish Valley. He suggested that the district consider putting in a million gallon tank.

Storage Tank

Carpenter presented a Spanish Valley distribution map. After review, Board decided that the proposed system will not serve Bob Norman's property.

SV Water  
Distribution

Carpenter presented the Colorado River Evaluation and stated that it would be more feasible to drill wells than pump directly from the Colorado River. Discussion was held on this matter.

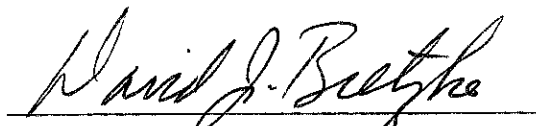

Colorado  
River  
Evaluation

Bretzke stated that he sent samples from Ray Klepzig's and Pete Byrd's wells in the river area to Utah State University for analysis.

With no further business, meeting adjourned.

  
K.E. McDougald, Chairman

ATTEST:

  
David J. Bretzke, Secretary
