## PREVENTION OF UNWANTED RODENTS

Recently, there has been a few reports of rats sited in the village. Our pest control officer has been working diligently to prevent/ eradicate any future problems. Rat colonies will send out "scouts" this time of year and in the spring to look for new harborage. If they find food source and harborage they go back to colony to collect a harem start their new colony. A colony can swell up to over 1000 in one year. If you see one you may have a problem, they can live anywhere as long as you provide shelter and food. Please read the following tips to prevent a potential problem:
