

“It’s About Time”

Quality, Functionality and Satisfaction

D’ttach Attachment Series has you Covered!

When it comes to moving around a barrel full of landscaping material, the Carry Barrel Transporter (DTCBT) built for the D’ttach™ Attachment Series, will make the job much easier. The DTCBT holds a standard 60 gallon carry barrel out in front of your commercial mower. Grass that is being bagged can be emptied directly into the carry barrel. When full, the barrel can be driven to its final destination and emptied. The DTCBT will also be useful for transporting mulch and landscape tools such as rakes, shovels, line trimmers, blowers, etc. The DTCBT quickly and easily mounts to your D’ttach™ Attachment Series hitch. The barrel is quickly and securely mounted using the ALS (Auto Lock System). The DTCBT is designed to allow you to move your carry barrel as quickly as your mower can travel while reducing the manpower necessary to transport your carry barrel.

Available to accommodate most commercial walk-behind or ZTR Mowers. The D’ttach™ was developed to fit the Wright Mfg’s Stander RH and Sentar Sport

DTCBT

D’ttach™ Carry Barrel

Transporter

The D’ttach™ Carry Barrel Transporter quickly attaches and “D’ttaches” from your commercial mower in seconds! D’ttach™ Attachment Series is constructed to endure the high demands of a professional landscaper with heavy duty materials. Quality combined with efficiency equates to saving time and money and being more productive with your power equipment - “It’s about time”.
