>> FRIDAY MAY 10, 2019 <<

8.30am - 10.00am – 3 BREAKOUTS

- **All Together Now – Cross Sector Collaboration** (Glover Park Room) *(in-person only at Summit)*
  - o **APIs are Not Enough!** The prevalence of APIs can create an impression that offering and using them, is a good enough solution for sharing credential, competency, job, and other information. It's true that when systems can be mapped to each other's language, data can be shared. However, mapping languages from system to system doesn't scale well. As a result, APIs alone are not the sole solution to interoperability, scalability, or ease of use when sharing data. This session is to start a conversation about the implications of improving data access and scalability that can lead to agreement on the building blocks and guidance for developers, employers, credentialing organizations, and government. Join us to discuss solutions for scalable efforts that can make a lasting impact on the talent marketplace.
