Cluster Leaders

Response Team for a group of 9 neighbors in Las Cumbres

When the BIG ONE Hits:

1. Inspect and secure our house. Leave note on front door of our status and location.
2. Turn on our Las Cumbres net 2-way radio and report our location and status.
3. Wearing safety vests, Emergency Response Team ID and disaster response backpacks, recruit a partner to conduct a quick house-to-house damage assessment of my assigned neighborhood from the outside.
4. Record status of each residence and report immediately via radio to the Operations Center any life-threatening medical, fire or structural emergency.
5. If appropriate, shut off power, propane, or water, to residences using owner-supplied diagram.
6. Proceed to Emergency Operations Center or alternate location as directed by Operations Team Leader.
